ABSTRACT

Georgia's Quality Core Curriculum (QCC) originated in 1984 with a recommendation for review every 5 years. In 1996, teachers, administrators, parents, and business leaders throughout Georgia reviewed and analyzed the existing QCC in an effort to update the curriculum, reflect technological advances, and create a more effective base for teaching. This 1999 report on Georgia's education for students in grades 6-8 presents core curriculum requirements in the areas of language arts, mathematics, science, social studies, health and physical education, fine arts (dance, music, theater, and visual arts), technology/career education; and agriculture education. For each curriculum area, the report presents an introduction and a description of the revision process and revisions made for that specific area. (SM)

Introduction to Language Arts Quality Core Curriculum K-12

The Quality Core Curriculum (QCC) originated in 1984 with a recommendation for review every five years. In 1996, teachers, administrators, parents, and business leaders throughout the state reviewed and analyzed the existing Quality Core Curriculum. The QCC revision process was an effort to update the curriculum, to reflect technological advances, and to create a more effective base for teaching. The Language Arts revision team refined the existing QCC Language Arts objectives to enhance clarity, accessibility, K-12 coordination, and academic excellence.

In order to promote these elements, the Language Arts revision team established a K-8 matrix that includes 9-12 core skills. The matrix is designed to provide a scope and sequence for the revised Language Arts QCC.

The revision team recommends that every Language Arts teacher receive a copy of the revised standards in order to implement the scope and sequence of the Language Arts content standards. Standards can be measured and taught by a variety of instructional strategies which actively engage and meet the needs of all students. The revision team sincerely desires that this QCC be a practical and valuable guide for Language Arts instruction in Georgia.

Oral Communication
Listening/Speaking

The Student:	K	1	2	3	4	5	6	7	8	9_12
Listens and speaks in informal conversations with peers and adults.	*									
Adapts or changes oral language to fit the situation by following the rules of conversation with peers and adults.		*	*	*	*	*	*	*	*	*
Listens to a variety of literary forms, including stories and poems.	*	*	*							
Listens and responds to a variety of literary forms.				*	*					
Listens and responds to a variety of literary forms including prose, poetry, and drama.						*	*	*	*	*
Follows one- and two-part oral directions.	*									
Follows two- and three-part oral directions.		*								
Follows three-part oral directions.			*							
Follows multiple oral directions.				*	*	*				
Follows oral directions and asks questions for clarification.							*	*	*	*

* Standards will be reinforced as necessary each subsequent year

Oral Communication
Listening/Speaking

The Student:	K	1	2	3	4	5	6	7	8	9_12
Repeats auditory sequences: letters, words, numbers, and rhythmic patterns.	*									
Recognizes rhyming words.	*									
Recites short poems, rhymes, songs, and stories with repeated patterns.	*									
Participates in choral speaking and creative drama.	*									
Recalls information presented orally.		*								
Recalls and interprets information presented orally.			*							
Uses oral language for different purposes: to inform, to persuade, and to entertain.			*	*	*	*	*	*	*	*
Recalls, interprets, and summarizes information presented orally.				*	*	*	*	*	*	*
Delivers a planned oral presentation.					*	*	*	*	*	*
Adjusts manner and style of speaking to suit an audience and situation.					*	*	*	*	*	*

* Standards will be reinforced as necessary each subsequent year

Oral Communication Listening/Speaking

Language Arts QCC Scope and Sequence

The Student:	K	1	2	3	4	5	6	7	8	9_12
Speaks so others can hear and understand.										*
Defends conclusions rationally.										*
Paraphrases and discusses information.						*	*	*	*	*
Summarizes and/or records orally presented information.						*	*	*	*	*
Interprets the meaning of questions in order to give an appropriate response.	*									
Responds to questions on orally presented materials.			*							
Responds appropriately to various types of questions on orally presented material.				*						
Responds to literal, inferential, and evaluative questions on orally presented material.					*		*	*	*	*
Increases vocabulary to reflect a growing range of interests and knowledge.	*	*	*	*	*	*	*	*	*	*

• Standards will be reinforced as necessary each subsequent year

Oral Communication
Listening/Speaking

The Student:	K	1	2	3	4	5	6	7	8	9_12
Communicates effectively when using descriptive language, relating experiences, and retelling stories.	*									
Communicates effectively when using descriptive language, relating experiences, and retelling stories read, heard, or viewed.		*	*	*	*	*	*	*	*	*
Uses a variety of language patterns and sentence structures.		*	*							
Uses increasingly complex sentence structures in oral communication.			*	*	*	*				
Determines the literal and figurative meaning of words.					*	*				
Demonstrates an understanding of words and ideas when heard in context.		*								
Determines the meaning of a word based on how it is used in an orally presented sentence.			*	*	*					
Adjust manner and style of speaking to suit an audience and situation.						*	*	*	*	*

* Standards will be reinforced as necessary each subsequent year

Oral Communication
Listening/Speaking

The Student:	K	1	2	3	4	5	6	7	8	9_12
Uses grade/age appropriate standard American English when communicating orally.			*	*	*	*				
Paraphrases and discusses information.						*	*	*	*	
Begins to discriminate between spoken words and sentences.	*									
Summarizes and/or records orally presented information.							*	*	*	
Blends sounds orally to make words.	*	*	*	*						
Divides words into syllables.		*	*	*						
Participates in oral presentations.							*	*	*	*
Participates in dramatic activities such as puppetry, pantomime, plays, choral speaking, and expressions.							*	*	*	
Develops awareness of nonverbal communication such as gestures, body language, and facial expressions.										
Uses standard conventions of American English in appropriate settings.							*	*	*	*

• Standards will be reinforced as necessary each subsequent year

Oral Communication
Listening/Speaking

Language Arts
QCC Scope and Sequence

The Student:	K	1	2	3	4	5	6	7	8	9_12
Listens and responds to various language patterns and literary forms including regional examples (dialect).							*	*	*	
Responds to literal, inferential, and critical questions.							*	*	*	*
Determines the denotative and connotative meanings of words in oral context.							*	*	*	*
Records orally presented information (note-taking).							*	*	*	*
Critically responds to various media. Evaluates messages and effect of mass media.							*	*	*	*

• Standards will be reinforced as necessary each subsequent year

Written Communication
Reading

The Student:	K	1	2	3	4	5	6	7	8	9	12
Recognizes own name in print.	*										
Recognizes words in familiar contexts.	*										
Recognizes common signs and logos.	*										
Holds print materials in correct position.	*										
Demonstrates left-to-right and top-to-bottom progression.	*										
Discriminates visual similarities and differences in words.	*										
Distinguishes between written letters, words, and sentences.	*										
Identifies upper- and lower-case letters of the alphabet out of sequence.	*										
Associates sounds with letters.	*										
Verbalizes consonant sound when shown the consonant letter.	*										
Recognizes rhyming words (e.g., CVC words, word families, etc.).	*										

* Standards will be reinforced as necessary each subsequent year

Written Communication
Reading

The Student:	K	1	2	3	4	5	6	7	8	9_12
Reads selected sight words.	*									
Recalls orally a series of three visually presented items.	*									
Uses words that signal sequence relationships such as first, next, and last.	*									
Classifies by characteristics such as color, size, shape, structure, and function.	*									
Sequences pictures to tell a story.	*									
Interprets pictures to identify main idea, sequence of events, cause/effect, and prediction of logical outcomes.	*									
Demonstrates an understanding that print makes sense by reading and explaining own writings and drawings.	*									
Increases vocabulary to reflect a growing range of interests and knowledge.	*	*	*	*	*	*	*	*	*	*

* Standards will be reinforced as necessary each subsequent year

Written Communication
Reading

The Student:	K	1	2	3	4	5	6	7	8	9_12
Distinguishes between letter/word, word/sentence, left/right, and beginning/ending of words and sentences.	*									
Classifies and categorizes words into sets and groups with common characteristics.	*	*	*	*	*	*	*	*	*	
Follows written directions.		*	*	*	*	*	*	*	*	*
Reads a variety of materials for information and pleasure.		*	*	*	*	*	*	*	*	*
Reads for a variety of purposes in different kinds of texts.			*	*	*	*	*	*	*	*
Applies phonetic strategies to read by:										
Using initial consonant substitution in rhyming words and word families.	*									
Using beginning, medial, and ending consonants to orally decode one and two syllable words.	*									
Using short, long, and "i" controlled vowel sounds to orally decode one and two syllable words.	*									
Using consonant blends and diagraphs to orally decode one- and two-syllable words.	*									

* Standards will be reinforced as necessary each subsequent year

Written Communication
Reading

The Student:	K	1	2	3	4	5	6	7	8	9_12
Applies phonetic strategies to read by:										
Using initial consonant substitution in rhyming words and word families.			*	*	*	*				
Using beginning, medial, and ending consonants to orally decode words.			*	*	*	*				
Using short, long, and "r" controlled vowel sounds to orally decode words.			*	*	*	*				
Using consonant blends, digraphs, and diphthongs to orally decode words.			*	*	*	*				
Uses word order and sentence structure to read. (Syntax-"Does it sound right?")		*	*	*	*	*	*	*	*	
Demonstrates an understanding of semantic relationships by using pictures, using context clues, word meanings, and prior knowledge in reading. (Semantics - "Does it make sense?")		*								
Demonstrates an understanding of semantic relationships by using context clues, word meanings, and prior knowledge in reading. (Semantics - "Does it make sense?")			*	*	*	*	*	*	*	*
Increases existing sight vocabulary (instant recognition).		*	*	*	*	*	*	*	*	*

- Standards will be reinforced as necessary each subsequent year

Written Communication
Reading

The Student:	K	1	2	3	4	5	6	7	8	9_12
Integrates language structure (syntax), meaning clues (semantics), phonetic strategies, and sight vocabulary when reading orally and silently.	*	*	*	*	*	*	*	*	*	*
Reads with fluency and expression.	*	*	*	*	*	*	*	*	*	*
Recognizes EXPLICIT main ideas, details, sequence of events, cause-effect relationships in fiction and nonfiction.	*	*	*	*	*	*	*	*	*	*
Recognizes IMPLICIT main ideas, details, sequence of events, and cause/effect relationships in fiction and nonfiction.	*	*	*	*	*	*	*	*	*	*
Identifies the main characters.	*	*	*	*	*	*	*	*	*	*
Identifies the characters' actions, motives, emotions, traits, and feelings.	*	*	*	*	*	*	*	*	*	*
Draws conclusions and makes predictions and comparisons.	*	*	*	*	*	*	*	*	*	*
Draws conclusions, makes predictions, compares/contrasts, and makes generalizations.	*	*	*	*	*	*	*	*	*	*

* Standards will be reinforced as necessary each subsequent year

Written Communication
Reading

The Student:	K	1	2	3	4	5	6	7	8	9_12
Reads for understanding and rereads as needed for clarification, self-correction, and further comprehension.		*	*	*	*	*	*	*	*	*
Distinguishes between fact and opinion.					*	*	*	*	*	*
Demonstrates comprehension when reading a variety of literary forms (e.g., fiction, nonfiction, poetry, and drama).		*	*	*	*	*	*	*	*	*
Recognizes and reads compound words, contractions, possessives, and words containing the suffixes "ing," "ed," "s," and "es."		*	*	*	*	*				
Uses knowledge of root words, prefixes, and suffixes in word recognition.		*	*	*	*	*	*	*	*	*
Recognizes simple word opposites.	*	*	*							
Uses knowledge of synonyms, antonyms, and homophones when reading.				*	*	*	*	*	*	*
Identifies story development, author's purpose, and point of view.						*	*	*	*	*

- Standards will be reinforced as necessary each subsequent year

Written Communication
Reading

Language Arts
QCC Scope and Sequence

The Student:	K	1	2	3	4	5	6	7	8	9_12
Uses context clues to determine meaning of unknown words.							*	*	*	*
Adjusts reading speed according to purpose and rereads for comprehension.							*	*	*	*
Recognizes persuasion techniques in propaganda and advertising.							*	*	*	*

- Standards will be reinforced as necessary each subsequent year

Written Communication
Literature

The Student:	K	1	2	3	4	5	6	7	8	9_12
Experiences traditional and contemporary literature through a variety of media.	*	*	*	*	*	*	*	*	*	*
Responds to literal, inferential, and evaluative questions about literature.	*	*	*	*	*	*	*	*	*	*
Responds appropriately to questions about author's purpose, techniques, character development, and plot structure.					*	*	*	*	*	*
Demonstrates an interest in various types of self-selected literature through daily reading.		*	*	*	*	*	*	*	*	*
Identifies literary forms (e.g., fiction, nonfiction, poetry, and drama).		*	*	*	*	*				
Recognizes various forms of literature (short stories, novels, epics, poems, dramas, folk tales, essays, and myths).							*	*	*	*
Discriminates between realism and fantasy.		*	*	*						
Distinguishes between fact and opinion.					*	*	*	*	*	*

* Standards will be reinforced as necessary each subsequent year

Written Communication
Literature

The Student:	K	1	2	3	4	5	6	7	8	9_12
Recognizes cultural diversity represented in literature.	*	*	*	*	*	*	*	*	*	*
Responds to literal, inferential, and critical questions about literature.							*	*	*	*
Recognizes bias and stereotypes.							*	*	*	*
Recognizes relevance of data.							*	*	*	*
Interprets written instructions and other directive information.							*	*	*	*
Applies reading strategies to specific content and subject matter.							*	*	*	*
Identifies literary elements and techniques such as plot, setting, theme, characters, characterization, conflict, figurative language, and point of view.							*	*	*	*
Recognizes common elements of poetry (rhyme, rhythm, stanza, figurative language, etc.).							*	*	*	*
Experiences traditional and contemporary literature through a variety of media.							*	*	*	*

* Standards will be reinforced as necessary each subsequent year

Written Communication Literature

Language Arts QCC Scope and Sequence

The Student:	K	1	2	3	4	5	6	7	8	9_12
Recognizes writer's purpose in fiction and nonfiction.							*	*	*	*
Recognizes cultures and values represented in literature.							*	*	*	*
Recognizes that literature reflects human experience.							*	*	*	*
Responds creatively to literature, drama, art, and multimedia projects.							*	*	*	*
Identifies and chooses literature according to personal interests.							*	*	*	*

- Standards will be reinforced as necessary each subsequent year

Written Communication
Writing

The Student:	K	1	2	3	4	5	6	7	8	9	12
Dictates information for experience stories.	*										
Uses examples from literature to create individual and group stories.	*	*	*	*	*	*	*	*	*	*	*
Draws pictures and/or uses letters and phonetically spelled words to write about experiences, stories, people, objects, or events.	*										
Uses correct spelling for frequently used sight vocabulary.		*	*	*	*	*	*	*	*	*	*
Uses learned phonetic strategies to spell correctly.		*	*	*	*	*					
Writes a minimum of three sentences about a topic.		*	*								
Writes a short paragraph about a topic.				*							
Writes selections (compositions) of three or more paragraphs about a topic.					*	*	*	*	*	*	*

• Standards will be reinforced as necessary each subsequent year

Written Communication
Writing

The Student:	K	1	2	3	4	5	6	7	8	9_12
Writes about self-selected topics (e.g., personal experiences, book rewrites) using pictures, letter/sound associations, and known words.	*	*								
Writes about self-selected topics.				*	*	*	*	*	*	*
Writes in a variety of genres to produce paragraphs and compositions:										
Personal narratives				*	*	*	*	*	*	*
Imaginative stories				*	*	*	*	*	*	*
Responses to literature				*	*	*	*	*	*	*
Content area pieces				*	*	*	*	*	*	*
Correspondence (including writing letters and addressing envelopes).			*	*	*	*	*	*	*	*
Expository Pieces					*	*	*	*	*	*
Persuasive Pieces						*	*	*	*	*
Applies correct principles of grammar:										
Writes complete sentences			*							*
Uses correct capital letters			*							*
Uses correct punctuation			*							*
Applies correct rules of usage and expression.			*							*
Applies correct principles of grammar, parts of speech, usage, and mechanics:										
Writes complete sentences				*						*
Uses correct capitalization and punctuation				*						*

* Standards will be reinforced as necessary each subsequent year

Written Communication
Writing

The Student:	K	1	2	3	4	5	6	7	8	9_12
Uses correct word structure				*						*
Identifies types of sentences according to purpose: declarative, interrogative, imperative, and exclamatory				*						
Identifies the parts of a sentence in various sentence patterns (simple subject and predicate).				*						
Forms singular, plural, and possessive nouns.				*						
Applies standard conventions of American English in subject-verb agreement				*						*
Demonstrates knowledge of nouns, pronouns, verbs, and adjectives in writing simple sentences				*						
Applies correct principles of grammar, parts of speech, usage, and mechanics. (See also: reference to Grammar and Usage strand.)					*	*	*	*	*	*
Communicates ideas by using the writing process:										
PREWRITING										
Generates ideas	*	*	*	*	*	*	*	*	*	*
DRAFTING										
Focuses on topic	*	*	*	*	*	*	*	*	*	*
Uses prewriting ideas to complete first draft	*	*	*	*	*	*	*	*	*	*

* Standards will be reinforced as necessary each subsequent year

Language Arts QCC Scope and Sequence

Written Communication Writing

The Student:	K	1	2	3	4	5	6	7	8	9_12
REVISING										
Expands use of descriptive words	*	*	*	*	*	*	*	*	*	*
Improves sequence		*	*	*	*	*	*	*	*	*
Adds variety of sentence types		*	*	*	*	*	*	*	*	*
Organizes writing to include a clear beginning, middle, and ending.		*	*	*	*	*	*	*	*	*
EDITING										
Begins each sentence and proper noun with a capital letter	*	*	*	*	*	*	*	*	*	*
Uses correct spelling	*	*	*	*	*	*	*	*	*	*
Uses appropriate punctuation	*	*	*	*	*	*	*	*	*	*
Uses complete sentences	*	*	*	*	*	*	*	*	*	*
PUBLISHING										
Shares writing with others.	*	*	*	*	*	*	*	*	*	*
Increases writing vocabulary.						*	*	*	*	*
Uses descriptive words and phrases.						*	*	*	*	*
Uses various organizational strategies, styles, and purposes.						*				
Experiments with organization, style, purpose, and audience.							*	*	*	*
Uses available technology to assist in writing.	*	*	*	*	*	*	*	*	*	*
Uses left to right pattern of writing.	*									

• Standards will be reinforced as necessary each subsequent year

Written Communication
Writing

The Student:	K	1	2	3	4	5	6	7	8	9_12
Prints name, self-selected words, and letters of the alphabet.	*									
Copies simple shapes, designs, numerals, and letters.	*									
Prints legibly:										
Correctly forms letters and numbers;		*	*							
Correctly spaces words and sentences.		*	*							
Begins to recognize cursive letters.			*							
Writes legibly:										
Correctly forms letters and numbers				*	*	*	*	*	*	*
Correctly spaces words and sentences				*	*	*	*	*	*	*
Writes paragraphs that include a unifying idea, a topic sentence, supporting sentences and details, and clincher sentence.										*

• Standards will be reinforced as necessary each subsequent year

Written Communication
Writing

The Student:	K	1	2	3	4	5	6	7	8	9_12
Uses various types of writing (personal, academic, business, and vocational).							*	*	*	*
Uses dialogue in writing.							*	*	*	*
Composes and revises using a computer.										*

- Standards will be reinforced as necessary each subsequent year

Written Communication
Grammar and Usage

The Student:	K	1	2	3	4	5	6	7	8	9_12
Identifies the types of sentences according to purpose: declarative, interrogative, imperative, and exclamatory.					*	*	*	*	*	
Identifies at least five parts of speech, including nouns, verbs, pronouns, adjectives, and adverbs.					*					
Identifies the eight parts of speech and their uses in a sentence.							*	*	*	
Identifies the parts of a sentence in various sentence patterns:										
subjects (simple and compound)					*					
predicates (simple and compound)					*					
modifiers					*					
Identifies the parts of a sentence in various sentence patterns:										
subject (simple and compound)						*	*	*	*	
predicates (simple and compound)						*	*	*	*	
modifiers (words and prepositional phrases)						*	*	*	*	
complements (predicate adjectives, predicate nominative, direct objects)							*	*	*	
Forms singular, plural, and possessive nouns.					*	*	*	*	*	*

* Standards will be reinforced as necessary each subsequent year

Language Arts

QCC Scope and Sequence

Written Communication

Grammar and Usage

The Student:	K	1	2	3	4	5	6	7	8	9_12
Identifies principal parts and tenses of regular and irregular verbs.					*	*	*	*	*	
Identifies types of pronouns: subject, object, possessive.					*	*	*	*	*	
Writes simple and compound sentences and avoids fragments and run-on sentences.					*	*	*	*	*	*
Applies standard conventions of American English in:										
Subject-verb agreement					*	*	*	*	*	*
Cases of personal pronouns					*	*	*	*	*	*
Principal parts of verbs					*	*	*	*	*	*
Comparisons of adjectives and adverbs					*	*	*	*	*	*
Pronoun/Antecedent							*	*	*	*
Applies standard rules of capitalization.					*	*	*	*	*	*
Applies standard rules of punctuation.					*	*	*	*	*	*
Spells frequently used words correctly and applies common spelling rules.					*	*	*	*	*	*
Identifies types of pronouns such as personal, interrogative, demonstrative.							*	*	*	*

• Standards will be reinforced as necessary each subsequent year

Written Communication
Grammar and Usage

The Student:	K	1	2	3	4	5	6	7	8	9_12
Writes simple and compound sentences and avoids run-ons and nonfunctional fragments.							*	*	*	*
Combines sentences using coordination (i.e., compound sentences).							*	*	*	*

- Standards will be reinforced as necessary each subsequent year

Written Communication
Reference-Study

The Student:	K	1	2	3	4	5	6	7	8	9_12
Explores the uses of the media center, picture books, audiovisual resources, and available technology for reading and writing.	*									
Alphabetizes words to the first letter.	*									
Alphabetizes words to the second letter.			*							
Alphabetizes words to the third letter.				*						
Uses alphabetical order to locate information.					*	*	*	*	*	*
Uses picture dictionaries as information sources.	*									
Uses beginning dictionaries as information sources.			*							
Uses abridged dictionaries to identify appropriate word meanings or correct spellings.				*	*					
Uses dictionaries, thesauri, atlases, almanacs, periodicals, and encyclopedias to locate information.						*	*	*	*	*

- Standards will be reinforced as necessary each subsequent year

Written Communication
Reference-Study

The Student:	K	1	2	3	4	5	6	7	8	9-12
Uses guide words to locate words in dictionaries and topics in encyclopedias.			*							
Uses guide words in dictionaries, encyclopedias, etc., as aids for finding information.				*						
Uses guide words to locate information.					*	*	*	*	*	
Determines appropriate resource to answer specific questions.				*						
Locates information using the appropriate reference resources.						*	*	*	*	*
Recognizes the organization of fiction and nonfiction books in the media center.		*	*	*						
Uses call numbers to locate information in the media center.					*					
Recognizes the author, illustrator, and title as identifying items of information about a book.		*								
Recognizes the purpose of the title page and the table of contents.		*								

- Standards will be reinforced as necessary each subsequent year

Written Communication
Reference-Study

The Student:	K	1	2	3	4	5	6	7	8	9_12
Uses book parts including the title page, table of contents, and glossary as information sources.			*							
Uses book parts including title page, table of contents, index and glossary as information sources.				*	*					
List sources from which information is gathered, including author, title, publisher/producer, place of publication and copyright date.						*	*	*	*	*
Uses easy fiction books, nonfiction books, various audiovisual resources, and software as information sources.		*								
Uses easy fiction books, nonfiction books, audiovisual resources and software, and periodicals as information sources.			*							
Uses various sources (e. g., periodicals, audiovisuals, software, encyclopedias) for information.				*	*					

- Standards will be reinforced as necessary each subsequent year

Written Communication
Reference-Study

The Student:	K	1	2	3	4	5	6	7	8	9_12
Begins the research process by selecting topic, formulation questions, and identifying key words about a chosen topic.				*						
Skims material to locate specific information.				*						
Develops a simple outline from a short selection.					*	*	*	*	*	
Uses cross reference in multiple types of sources.						*	*	*	*	
Uses the media center and available technology as sources of information and pleasure.		*	*	*	*	*	*	*	*	*
Recognizes differences in paraphrasing, summarizing, and plagiarizing.							*	*	*	
Recognizes organizational systems used for collections or reference sources.							*	*	*	

* Standards will be reinforced as necessary each subsequent year

Written Communication
Reference-Study

The Student:	K	1	2	3	4	5	6	7	8	9_12
Uses research process by:										
-Choosing topic					*	*	*	*	*	*
-Formulating questions					*	*	*	*	*	*
-Identifying key words					*	*	*	*	*	*
-Selecting sources					*	*	*	*	*	*
-Skimming					*	*	*	*	*	*
-Paraphrasing					*	*	*	*	*	*
-Taking notes					*	*	*	*	*	*
-Organizing					*	*	*	*	*	*

Develops strategies for taking tests in different formats (multiple choice, sentence completion, essays, etc.).							*	*	*	*	*
Works as a team to solve problems.											*

• Standards will be reinforced as necessary each subsequent year

Introduction to Language Arts Quality Core Curriculum

6-8

As a part of the Quality Core Curriculum (QCC) revision process, language arts teachers, school administrators, college professors, and business leaders from across Georgia reviewed and revised the language arts curriculum in grades K-12. The team was subdivided into three groups, K-5, 6-8, and 9-12. Careful consideration was given to every content standard, and the committees reached consensus about the inclusion and wording of each one.

Three points are noteworthy about the standards in grades 5-8. One, to ensure a thorough foundation of knowledge for high school, content standards have been deliberately repeated and spiraled from one grade level to the next. Two, a seventh strand, grammar and usage, has been added to the six existing strands. Three, technology has been incorporated in all appropriate objectives.

The intent of the committee has been to produce a curriculum document that is readable, concise, measurable, sequential, achievable, and most of all, usable. The document allows teachers to make implementation decisions on a local level for the improvement of education of Georgia's students.

Strand	Content Standard	Topic	Concept	Notes
--------	------------------	-------	---------	-------

Language Arts: Grade 6**Grammar and Usage**

- L.A.6.1** Identifies the types of sentences according to purpose: declarative, interrogative, imperative, exclamatory.
- L.A.6.2** Identifies the eight parts of speech and their uses in sentences.
- L.A.6.3** Identifies the parts of a sentence in simple and compound sentences:
-subjects
-predicates
-complements (predicate adjectives, predicate nominatives, direct objects)
-modifiers (words and phrases).
- L.A.6.4** Forms singular, plural, and possessive nouns.
- L.A.6.5** Uses principal parts to form tenses of regular and irregular verbs.
- L.A.6.6** Identifies types of pronouns such as personal, interrogative, and demonstrative.
- L.A.6.7** Writes simple and compound sentences and avoids run-ons and nonfunctional fragments.
- L.A.6.8** Combines sentences using coordination (i.e., compound sentences).
- L.A.6.9** Applies standards of American English to:
-subject-verb agreement
-cases of personal pronouns
-pronoun/antecedent agreement
-principal parts of verbs
-comparisons of adjectives and adverbs.
- L.A.6.10** Applies standard rules of capitalization.

Strand	Content Standard	Topic	Concept	Notes
--------	------------------	-------	---------	-------

LA.6.11 Spells frequently used words and applies common spelling rules.

LA.6.12 Applies standard rules of punctuation.

Listening

LA.6.13 Expands listening vocabulary.

LA.6.14 Follows oral directions and asks questions for clarification.

LA.6.15 Listens and responds to various language patterns and literary forms including regional examples (dialect).

LA.6.16 Responds to literal, inferential, and critical questions.

LA.6.17 Determines the denotative and connotative meanings of words in oral context.

LA.6.18 Summarizes oral information.

LA.6.19 Records orally presented information (takes notes).

LA.6.20 Listens and responds to literature presented orally.

LA.6.21 Evaluates messages and effects of mass media (newspaper, television, radio, film, and periodicals).

Literature

LA.6.22 Recognizes various forms of literature (short stories, novels, epics, poems, dramas, folk tales, essays, and myths).

BEST COPY AVAILABLE

Strand	Content Standard	Topic	Concept	Notes
--------	------------------	-------	---------	-------

L.A.6.23	Responds to literal, inferential, and critical questions about literature.			
L.A.6.24	Identifies literary elements and techniques such as plot, setting, theme, characters, characterization, conflict, figurative language, and point of view.			
L.A.6.25	Recognizes common elements of poetry (rhyme, rhythm, stanza, and figurative language).			
L.A.6.26	Experiences traditional and contemporary literature through a variety of media.			
L.A.6.27	Recognizes writer's purpose in fiction and nonfiction.			
L.A.6.28	Recognizes cultures and values represented in literature.			
L.A.6.29	Recognizes that literature reflects human experiences.			
L.A.6.30	Responds creatively to literature (drama, art, multi-media projects).			
L.A.6.31	Identifies and chooses literature according to personal interests.			

Reading

L.A.6.32	Reads for a variety of purposes to obtain meaning from different kinds of materials.			
L.A.6.33	Reads for pleasure.			
L.A.6.34	Recognizes differences between fiction and nonfiction.			
L.A.6.35	Distinguishes between fact and opinion.			

BEST COPY AVAILABLE

Strand	Content Standard	Topic	Concept	Notes
L.A.6.36	Expands reading vocabulary.			
L.A.6.37	Interprets literal and nonliteral meanings of words and phrases.			
L.A.6.38	Recognizes syntactic and semantic relationships.			
L.A.6.39	Uses word recognition strategies (e.g., affixes, roots, and compound words) to acquire new vocabulary.			
L.A.6.40	Uses context clues to determine meanings of unknown words.			
L.A.6.41	Adjusts reading speed according to purpose and rereads for comprehension.			
L.A.6.42	Recognizes explicit and implicit main ideas, details, sequence of events, and cause-effect relationships.			
L.A.6.43	Makes predictions and comparisons.			
L.A.6.44	Makes generalizations and draws conclusions.			
L.A.6.45	Recognizes persuasion techniques in propaganda and advertising.			
L.A.6.46	Recognizes bias and stereotypes.			
L.A.6.47	Recognizes relevance of data.			
L.A.6.48	Interprets written instructions and other directive information.			
L.A.6.49	Applies reading strategies to specific content and subject matter.

Speaking

- LA.6.61** Expands speaking vocabulary.
- LA.6.62** Communicates effectively through oral expression.
- LA.6.63** Adjusts manner and style of speaking to suit audience and situation.
- LA.6.64** Paraphrases and discusses information in a variety of settings.
- LA.6.65** Participates in oral presentations.
- LA.6.66** Participates in dramatic activities such as puppetry, pantomime, plays, choral speaking, and storytelling.
- LA.6.67** Develops awareness of nonverbal communication such as gestures, body language, and facial expressions.
- LA.6.68** Uses standards of American English in appropriate settings.

Writing

- LA.6.69** Uses a writing process that involves prewriting, drafting, revising, editing (can involve peer editing), proofreading, and publishing.
- LA.6.70** Writes paragraphs that include unifying ideas and supporting details (may include topic sentence and clincher sentence).
- LA.6.71** Produces paragraphs and compositions for a variety of purposes (exposition, description, narration, and persuasion).

Georgia's Quality Core Curriculum

Mathematics

Grade 6

Introduction to Mathematics Quality Core Curriculum

6-8

The Mathematics Quality Core Curriculum (QCC) presents a vision of mathematics that is designed to meet the diverse needs of students in every Georgia school system. The QCC represents high academic standards across a broad spectrum of mathematical topics. It establishes the basis for a challenging program of study that will increase student achievement in mathematics. The QCC content standards may be expanded and enhanced at the discretion of local school systems, but may not be deleted or replaced.

The vision of the Mathematics QCC is that Georgia's students will be avid *mathematical problem solvers*, will *communicate mathematically* (listen, speak, read, write, and reflect), will *reason mathematically* using basic and higher-order thinking skills concurrently, and will *make connections* within mathematics and with other disciplines. The common strands - Problem Solving, Computation & Estimation, Number & Number Relationships, Number Systems & Number Theory, Geometry, Measurement, Statistics, Probability, Patterns & Functions, and Algebra - are integrated throughout the curriculum to provide cohesion and continuity and to ensure smooth transitions throughout the K-12 curriculum.

The content standards in the Mathematics 6-8 QCC are categorized by these strands. Some content strands relate to all strands, and are listed first at each grade level. Then, for convenience, the strands are listed alphabetically with their corresponding content standards.

The Mathematics QCC is designed to support teachers as they instructionally maximize each student's mathematical experiences. Teachers are urged to provide opportunities for upward movement through the curriculum, so that students are not restricted to their current grade level. Knowledge acquisition requires a transition from concrete, through pictorial, to abstract for all students at all levels and ages. The use of concrete objects (manipulatives) and visual models is vital for students to understand concepts and explore processes.

Incorporating technology into instruction is imperative in order to empower Georgia students to keep pace with the information age and to be competitive in the job market; it will enhance and provide flexibility in the learning process. Scientific calculators and computers are essential tools for learning and doing mathematics at all grade levels. Students should be able to solve practical problems, investigate patterns, explore strategies, and focus on the process of solving problems rather than on tedious computation unrelated to applications.

Communication is a vital link in the QCC. Thinking, speaking, writing, and applying mathematics are invaluable assets. Teaching students these skills can be facilitated through questioning, discussions, reports, projects, journals, oral presentations, experiments, summarizing collected data, and hypothesizing. Collectively, these experiences help students make transitions from informal, intuitive ideas to more abstract and symbolic mathematical language. Reading, writing, and discussing mathematics promote clarity of thought and facilitate deeper understanding of concepts and ideas. Students will improve and gain confidence in their own abilities to explain, defend, and make conjectures.

The middle school curriculum has been reviewed and revised to ensure that students completing the eighth grade will have had the content necessary for success in Algebra I. The content of the high school prealgebra course is now incorporated throughout the middle school curriculum, with major emphasis in the eighth grade.

The Mathematics QCC Revision Team has carefully considered and incorporated the curriculum standards proposed by national and state initiatives, as well as revision evaluation suggestions made by thousands of Georgians. This process served as an invaluable resource in guiding efforts to provide a quality and competitive education for Georgia's children.

Mathematics: Grade 6

All Strands: Problem Solving; Algebra; Computation & Estimation; Geometry; Measurement; Number & Number Relationships; Number Systems & Number Theory; Patterns & Functions; Probability; Statistics

M.6.1

Solves problems, reasons, and estimates throughout mathematics.

-Selects and uses problem-solving strategies such as reading the problem, drawing a picture or diagram, using trial and error, making a table or chart, looking for patterns, making a simpler problem and then generalizing, working backwards, etc.

-Selects and uses appropriate tools (such as mental computation, calculators, manipulative materials, paper and pencil, computer) in solving problems.

-Uses appropriate estimation strategies (such as front-end, breaking numbers apart, compatible numbers, guess and check, clustering, rounding, compensation) to check the reasonableness of results.

-Solves nonroutine problems for which the answer is not obvious.

-Relates concepts and skills to practical applications.

Problem Solving Strategies,
Reasoning,
Estimation Strategies,
Mental Computation

Appropriate Methods and Tools
Applications

M.6.2

Describe orally and in writing, using the appropriate mathematical vocabulary, mathematical concepts and procedures, such as solving a word problem or computing.

Communication,
Reasoning

Vocabulary

M.6.3

Uses scientific calculator and computer skills to solve problems, to discover patterns and sequences, to investigate situations and draw conclusions.

Technology,
Calculator Skills,
Computer Skills,
Problem Solving,
Reasoning

Pattern Sequence

M.6.4

Uses computer software and applications to research, investigate, and analyze data and to represent this information using charts, tables, graphs, or other presentation forms.

Technology,
Computer Skills,
Charts,
Tables,
Graphs

Research,
Investigation,
Data Analysis

Algebra**M.6.5**

Uses a variable to represent an unknown amount in a mathematical expression or equation (number sentence), and evaluates simple algebraic expressions (e.g., Given $a + 4$. If $a = 2$, then $2 + 4 = 6$).

Expressions,
Equations (Number Sentences)

Variable

Strand	Content Standard	Topic	Concept	Notes
--------	------------------	-------	---------	-------

Algebra; Computation & Estimation

M.6.6 Uses order of operations to simplify numeric expressions that involve addition and subtraction with and without parenthesis. Order of Operations, Parentheses

Algebra; Number & Number Relationships

M.6.7 Finds the value of or solves for the variable in a simple algebraic equation such as $a + G = 10$. Equations (Number Sentences) Variable (placeholder)

Algebra; Problem Solving

M.6.8 Writes and solves a simple one-step equation (number sentence) for a given word problem. Problem Solving, Equations

Computation & Estimation; Number & Number Relationships

M.6.9 Uses addition, subtraction, multiplication, and division (interpreting remainders in context of problem) in computation and problem solving with whole numbers, decimals, fractions, and mixed numbers with like and unlike denominators. Whole Numbers, Decimals, Fractions, Mixed Numbers, Remainders Appropriate Methods

Computation & Estimation; Number & Number Theory

M.6.10 Performs computations mentally using strategies such as multiples of ten, compatible numbers, compensation, or breaking apart numbers. Mental Computation Strategies Multiples, Compensation, Compatible Numbers

Computation & Estimation; Number & Number Relationships; Algebra

M.6.11 Computes percent of a number using ratio, proportions, and equations.

Ratio,
Proportion

Geometry

M.6.12 Uses characteristics and properties of lines and line segments to compare and contrast (i.e., geometric shapes, angles) and to establish relationships.

Lines and Line Segments

Parallel,
Perpendicular,
Vertical,
Intersecting,
Horizontal

M.6.13 Identifies the component parts of an angle, its vertex, and sides or rays; and classifies angles as acute, right, obtuse, or straight.

Angles

Angle Components,
Angle Types

M.6.14 Identifies lines of symmetry.

Geometric Figures

Symmetry,
Line of Symmetry

M.6.15 Identifies face, edge, and vertex of a geometric solid.

Geometric Figures

Solids

M.6.16 Identifies congruent and similar geometric figures.

Geometric Figures

Congruence,
Similarity

M.6.17 Identifies effects of basic transformations on geometric shapes.

Transformations

Rotation (Turn),
Reflection (Flip),
Translation (Slide)

M.6.18 Contrasts and classifies simple plane and solid geometric figures by their properties.

Geometric Figures

Solid Figure,
Plane Figure,
Geometric Properties,
Classifying

Georgia's Quality Core Curriculum

Science Grade 6

Introduction to Science Quality Core Curriculum K-12

The revision of the Science section of the K-12 Quality Core Curriculum (QCC) involved the intensive efforts of science teachers, scientists and other science educators. These practitioners closely examined the 1988 QCC and sought to produce a sequential document that establishes high expectations for every student and enhances day-to-day instruction.

The document reflects a combination of the present (1988) Georgia QCC, the National Science Education Standards, Project 2061: Benchmarks for Science Literacy and the Georgia Framework for Learning Mathematics and Science. K-8 is organized by grade clusters K-3, 4-5, and 6-8. The topics in these clusters which contain concepts, content standards, and skills may be moved from one grade level to another within the cluster by the local school systems.

At each grade level, kindergarten through eighth, the Science QCC has three major strands: physical science, life science and earth/space science as well as content standards dealing with science, technology, and society. The strands can be arranged by grade levels or taught as an integrated science program as determined by the local school system. Physical science, biology, chemistry, and physics for high school were revised to build on the concepts presented in the K-8 curriculum.

At each grade level, objectives are included for science inquiry and processes, reference skills, safety, and tools used in Science. These objectives should be integrated into instructional activities addressing these concepts and content standards rather than taught in isolation.

Science develops thinking, problem-solving, and lifelong learning skills. Science process and inquiry skills are essential to the development of skills necessary to live interesting, responsible, and productive lives. Science instruction lends itself to integration with other subject areas and can generate student interest and motivation for all subject areas. Students should be actively engaged in the learning process via hands-on/minds-on science activities and experiences.

Our economic development and national survival are contingent on the education we provide our students. Educational development in the state of Georgia will help us produce future scientists and engineers who can maintain our country's technological competitiveness.

Assessment in Science should provide opportunities for students to demonstrate in a variety of ways what they have learned. Good assessment is a learning experience. As we provide students with effective assessment opportunities, we can monitor how well instruction is meeting the learning needs of students. If assessment is shared with students as instruction begins, planning, teaching,

and learning become more focused. Ongoing professional development and networking experiences for teachers will promote confidence and competence in science instruction.

The developers of the Georgia Science QCC have drawn extensively on statements published by the American Association for the Advancement of Science, the National Research Council, the Georgia Framework for Learning Mathematics and Science, and the National Science Education Standards as to what all students should know and be able to do.

Philosophy of Science

Science education in Georgia must provide students with the concepts and skills necessary to be responsible, active caretakers of their micro and macro environment. The Science curriculum must be designed to be a blend of science concepts and science process skills. Students must be actively involved in hands-on scientific investigation in the exploration of the world in which they live. Students must develop critical thinking skills that enable them to base decisions on valid scientific evidence. Students must be equipped with the problem-solving skills and scientific concepts to address the influence of science and technology on society. Ultimately, the Science curriculum must be designed to provide students with the opportunity to acquire sufficient scientific knowledge and skills to function effectively in, and contribute positively to, society.

The Science programs in Georgia should be consistent with the cognitive, social, emotional, and physical development of the student. These programs should be consistent with the nature and values of science which include its philosophy, methods of investigation and verification, conceptual organization, and accumulated knowledge. They should reflect an involvement with both immediate and future life needs in terms of solving personal and social problems. Finally, science programs should reflect science as part of an integrated whole, not an isolated discipline.

Science Inquiry and Processes

Students will:

- Ask questions about events
- Keep accurate records of observations and investigations
- Use data to support inferences and predictions
- Use data, experience, evidence, and models to construct explanations

- Make sketches and diagrams to explain ideas, procedures and results
- Organize data into tables, charts, and graphs for interpretation
- Plan, design, and conduct scientific investigations to answer questions

To accomplish the above, students will regularly:

- Make qualitative and quantitative observations
- Classify objects and phenomena
- Communicate with others
- Make inferences and predictions
- Use estimation and metric measurement
- Formulate hypotheses
- Identify and control variables
- Design experiments
- Interpret data

Reference Skills

- Uses encyclopedias, books, science reference magazines, and other media to obtain information related to science concepts.
- Uses computer databases, online resources, and other electronic media to obtain information about science concepts.
- Uses indices, tables of contents, and online searches to locate information related to science concepts.

Safety

Identifies and practices accepted safety procedures in manipulating science materials and equipment.

Tools

Uses appropriate tools to collect and analyze data and solve problems.

Basic Process Skills

Observation includes using one or more of the senses to determine attributes, properties, similarities, differences, and changes in natural phenomena and objects. Observations can be made directly with the senses or indirectly through the use of simple or complex instruments.

Classification includes organizing objects or events according to similarities and differences selected by the observer. Classification includes sorting elements into groups on the basis of common characteristics and ordering (sequencing) elements by relationships among the elements.

Communication includes the presentation and explanation of experiences with objects or events by means of oral or written descriptions, pictures, graphs, charts, maps, demonstration, and/or other methods.

Measurement includes the comparison of an unknown quantity (e.g., length, mass, or temperature) with a known quantity such as a pupil-made standard or the metric standards of length, area, volume, mass, temperature, force, time or electrical charge. Measurement includes the ability to estimate or compare an object or event with a frame of reference. Measurement involves the skillful, effective use of instruments.

Prediction includes suggesting what will occur in the future based on observations, measurements, and inferences about the relationships between or among observed variables. Predictions may be used to generalize that under a certain set of circumstances, a certain outcome may be expected, or they may be used to describe outcomes beyond the observed data. The accuracy of a prediction is closely related to the accuracy of the observations.

Inference includes the use of observations and past experiences to reach a conclusion about a probable cause or about future outcomes. Inferring from a set of data may lead to several nonconclusive inferences. Only further investigations and additional data may validate an inference.

Higher Level Process Skills

Identification of variables includes finding the variables of a system and selecting those to be held constant.

Manipulation of variables includes the identification of trends or patterns in sets of data. Patterns in data may be used to establish generalizations, make predictions and formulate hypotheses. Interpreting data involves organizing, analyzing, synthesizing, and evaluating patterns in the data.

Interpretation of data includes the identification of trends or patterns in sets of data. Patterns in data may be used to establish generalizations, make predictions, and formulate hypotheses. Interpreting data involves organizing, analyzing, synthesizing, and evaluating patterns in the data.

Operational definition includes defining objects in the context of a common experience, telling one what to do to or with an object and what to observe as a result of the action.

Formulation of models includes describing or constructing physical, verbal, mental or mathematical explanations of systems and interrelated phenomena that cannot be observed directly. Models may be used in predicting outcomes of planned investigations.

Experimentation includes the design and implementation of procedures to obtain reliable information about interrelationships between objects and events. Investigating includes formulating and solving a problem and experimenting and drawing conclusions.

Construction of hypotheses includes formulating generalizations that include all objects or events of the same class. Questions, inferences, and predictions can lead to the formation of a hypothesis. The hypothesis must be tested if its credibility is to be established.

Drawing conclusions includes interpreting data acquired through experimentation to determine whether a hypothesis is supported.

Strand	Content Standard	Topic	Concept	Notes
--------	------------------	-------	---------	-------

Science (6-12): Grade 6

Physical Science

S.6.1	Uses process skills of observing, classifying, communicating, measuring, predicting, inferring, identifying, and manipulating variables; recording analyzing and operationally defining, formulating models, experimenting, constructing hypotheses and drawing conclusions.	Scientific Inquiry Process	Investigation involves care fully collected, relevant evidence, logical reasoning, and some imagination when developing hypotheses and explanations.	Assessment Recommendations: Teach throughout the year through lab activities.
S.6.2	Understands and applies laboratory safety rules and practices.	Safety Skills	Scientific investigations require safety precautions for the scientist and others.	Assessment Recommendations: Demonstrates in the lab appropriate safety procedures, i.e., NSTA Standards.
S.6.3	Defines and identifies standards of measurement. 3.1 Names the prefixes used in the SI system. 3.2 Identifies SI units and symbols for length, volume, mass, density, time, and temperature. 3.3 Converts measurements among related SI units. 3.4 Uses appropriate tools for determining mass volume, temperature, density, and length.	Standard International (SI) Measurements (Metric System)	Scientists often repeat an experiment several times before accepting a consistent result as a rule. Consequently, a universal system of measurement is necessary.	Assessment Recommendations: Selects and uses in the lab appropriate tools for the measurement of mass, volume, temperature, and density.
S.6.4	Selects and uses multiple types of print and nonprint sources for information on science concepts.	Reference Skills	Scientific investigation requires the use of proper techniques in order to gather information.

Strand	Content Standard	Topic	Concept	Notes
S.6.5	Explains the properties and phases of matter, using as an example the composition and properties of water.	Structure of Matter	Different arrangements of atoms compose all substances. These materials exist in different states - (solid, liquid and gas) and have different properties. Atoms combine to form molecules, the smallest particle of a substance that retains its properties. These molecules can combine to form single elements, other compounds, or mixtures. There are more than 100 known elements. Elements combine in numerous ways to produce compounds that form the living and nonliving substances that we encounter. Elements can be grouped according to similar properties.	Assessment Recommendations: Uses a lab activity to identify objects as a solid, liquid, or gas. Writes common chemical symbols, formulas and equations.
	5.1 Distinguishes between atoms and molecules and among elements, mixtures and compounds.			
S.6.6	5.2 Describes the structure of elements.	Structure of Matter	Atoms in solids are close together and don't move about easily; in liquids, atoms are close together and "stick" to each other, but move about easily; atoms in gas are quite far apart and move about freely.	Assessment Recommendations: Diagrams the molecular arrangement and movement in a solid, liquid and gas.
	5.3 Describes the periodic table of elements and uses it to find information about an element.			
S.6.7	5.4 Uses the periodic table to classify an element as a metal, nonmetal, or metalloid.	Structure of Matter	Many compounds can be classified as acids, bases or salts, based upon observable properties.	Assessment Recommendations: Writes a topic report on common acids, bases, and salts. Identifies common household acids, bases, and salts.
	5.5 Describes atomic number and atomic mass.			
S.6.6	5.6 Distinguishes physical and chemical properties and physical and chemical changes.	Structure of Matter	Analyzes the relationship of matter and energy.	Assessment Recommendations: Defines acid and base.
	5.7 Recognizes and writes common chemical symbols, chemical formulas, and chemical equations.			
S.6.7	6.1 Describes how the molecular motion changes in each phase of matter.	Structure of Matter	Describes the nature of freezing, condensing, boiling, and evaporating.	Assessment Recommendations: Writes a topic report on common acids, bases, and salts. Identifies common household acids, bases, and salts.
	6.2 Discusses the nature of freezing, condensing, boiling, and evaporating.			
S.6.7	7.1 Describes the characteristic properties of acids and bases.	Structure of Matter	Defines acid and base.	Assessment Recommendations: Writes a topic report on common acids, bases, and salts. Identifies common household acids, bases, and salts.
	7.2 Lists the names, formulas, and uses of some common acids and bases.			
S.6.7	7.3 Explain what a salt is and how salts form.	Structure of Matter	Describes the nature of freezing, condensing, boiling, and evaporating.	Assessment Recommendations: Writes a topic report on common acids, bases, and salts. Identifies common household acids, bases, and salts.

Strand	Content Standard	Topic	Concept	Notes
S.6.8	Describes how energy and work are related. 8.1 Distinguishes between kinetic and potential energy. 8.2 Describes different forms of energy (e.g., mechanical, electrical, chemical, radiant, nuclear, etc.). 8.3 Describes how energy and power are related.	Motion, Forces, and Energy	Energy is the ability to cause change. Energy may be in the form of motion (kinetic energy) or may be stored (potential energy). Energy exists in many different forms, and it can be changed from one form to another with no loss of total energy. Work is the transfer of energy through motion. Work is done only when force produces motion in the direction of the force. Power describes the relationship that exists between work and time.	Assessment Recommendations: Designs an experiment to demonstrate potential and kinetic energy.
S.6.9	Defines speed as a rate. 9.1 Performs calculations involving speed, time, and distance to interpret distance-time graphs. 9.2 Compares and contrasts speed, velocity, and acceleration. 9.3 Recognizes different examples of forces. 9.4 States and describes Newton's three laws of motion. 9.5 Gives examples of the effects of gravity. 9.6 Relates gravitational force to mass and distance. 9.7 Distinguishes between mass and weight. 9.8 Evaluates the advantages and disadvantages of passenger restraint devices as related to force and motion.	Motion, Forces, and Energy	An object's motion can be described and represented graphically according to its position, direction of motion and speed. Every object exerts gravitational force on every other object. The force depends on the mass of and the distance between the objects. Passenger restraint devices provide a measure of safety as technological advances have increased the need for protection relative to forces and motion. D)3p\J	Assessment Recommendations: Designs models to illustrate Newton's three laws of motion.
S.6.10	Explains the relationship among force, motion and acceleration. 10.1 Explains why objects thrown or shot follow a curved path. 10.2 Compares motion in a straight line with circular motion. 10.3 Defines weightlessness. 10.4 Analyzes action and reaction forces. 10.5 Explains conservation of momentum.	Motion, Forces, and Energy	An unbalanced force acting on an object changes its speed, path of motion, or both. If a force acts toward a single center, the object's path may curve into an orbit around the center.	Assessment Recommendations: Performs a lab activity that demonstrates the relationship between force, motion and acceleration.
S.6.11	Describes how particles of a fluid exert pressure. 11.1 States Archimedes' principle. 11.2 States Bernoulli's principle and describes a way Bernoulli's principle is applied. 11.3 Explains how a hydraulic device operates.	Motion, Forces, and Energy	Fluids can be liquids or gases and are impacted by the physical characteristics of the environment.	Assessment Recommendations: Designs an experiment that demonstrates Archimedes' and Bernoulli's principles.

Strand	Content Standard	Topic	Concept	Notes
S.6.12	Explains how machines make work easier. 12.1 Describes six types of simple machines. 12.2 Recognizes the simple machines that make up a compound machine. 12.3 Describes the relationship between work, power, and time. 12.4 Explains what the science of bionics involves (STS). 12.5 Contrasts two methods of using electrical signals to trigger motion of a limb or other body processes (STS).	Motion, Forces, and Energy	Machines make work easier by changing the size of the force applied to it, the direction of the force, or both. Simple and compound machines, along with advances in technology, have improved the overall quality of life.	Assessment Recommendations: Constructs working models of simple and compound machines. Designs an experiment that demonstrates potential and kinetic energy.
S.6.13	Explains how satellites are placed in orbit around the earth (STS). 13.1 Gives examples of how satellites are used to improve the overall quality of life (STS).	Motion, Forces, and Energy	Technology has influenced the course of history. The space program is largely responsible for revolutions in medicine, warfare, transportation, information processing and communications that have radically changed how people live.	
S.6.14	Investigates the characteristics, movements, and measurements of heat energy. 14.2 Demonstrates the difference between heat and temperature. 14.2 Shows how heat causes matter to expand and contract. 14.3 Explains how heat is transferred by conduction, convection, and radiation. 14.4 Identifies some causes and effects of thermal pollutions (STS). 14.5 Discusses some possible solutions for thermal pollution problems (STS).	Energy and Its Transformation: Heat	Energy appears in different forms. Heat energy results in disorderly motion of molecules. Heat energy can be transferred through materials by the collision of atoms or across space by radiation. If a material is fluid, currents will be set up that aid the transfer of heat. Heat energy moves in predictable ways, flowing from warmer objects to cooler ones until both objects are at the same temperature. The environment can be affected by the uses of heat energy.	
S.6.15	Describes how waves carry energy. 15.1 Discusses the characteristics and properties of waves. 15.2 Explains how wavelength, frequency, and speed are related. 15.3 Compares transverse and compressional waves. 15.4 Describes how waves are refracted and reflected.	Energy and Its Transformation: Waves	Waves carry energy from place to place. All waves can be described by the same set of basic properties. Waves can superpose on one another, bend around corners, reflect off surfaces, be absorbed by materials they enter, and change direction when entering a new material.

Strand	Content Standard	Topic	Concept	Notes
S.6.16	Contrasts electromagnetic waves and other kinds of waves (e.g., sound, water). 16.1 Describes the electromagnetic spectrum. 16.2 Explains at least one application of each type of electromagnetic wave.	Energy and Its Transformation: Light	Electromagnetic radiation is a form of energy. Light is one form of electromagnetic radiation.	Assessment Recommendations: Draws and labels the electromagnetic spectrum.
S.6.17	States and give an example of the law of reflection. 17.1 Explains how refraction is used to separate light into the colors of the spectrum. 17.2 Describes how diffraction and interference patterns demonstrate wave behavior.	Energy and Its Transformation: Light	Light is the visible part of the electromagnetic spectrum. It has characteristic wave properties.	
S.6.18	Investigates the relationship between light and color. 18.1 Describes the differences among opaque, transparent, and translucent materials. 18.2 Explains how you see color. 18.3 Describes the difference between light color and pigment color.	Energy and Its Transformation: Light	Human eyes respond to only a narrow range of wavelengths of electromagnetic radiation - visible light. Differences of wavelengths within that range are perceived as differences in color.	Assessment Recommendations: Constructs a model that demonstrates the relationship between light and color (examples of materials; prisms, light filters, or diffraction gratings).
S.6.19	Discusses how light interacts with mirrors and lenses to produce images. 19.1 Explains how images are formed in mirrors. 19.2 Identifies uses of plane, concave, and convex mirrors. 19.3 Describes the types of images formed with convex and concave lenses. 19.4 Compares refracting and reflecting telescopes. 19.5 Discusses the technological advances in the use of light (e.g., fiber optics, lasers, cameras, microscopes, etc.)	Energy and Its Transformation: Light	Light interacts with mirrors and lenses to produce images. Light is used in a variety of ways to improve our lives.	Assessment Recommendations: Constructs a telescope periscope or camera using lenses and mirrors.
S.6.20	Lists the characteristics of electricity. 20.1 Describes how static and current electricity differ. 20.2 Describes the relationship between electrical current and circuits. 20.3 Explains how a dry cell is a source of electricity. 20.4 Describes, sketches and lists applications for a series and parallel circuit. 20.5 Distinguishes between conductors and insulators. 20.6 Identifies the function of circuit breakers and fuses. 20.7 Calculates the amount of electrical energy in kilowatt-hours. 20.8 Explains the occurrence of lightning in terms of induction and static discharge (STS). 20.9 Evaluates the positive and negative aspect of lightning induced forest fires (STS). 20.10 Identifies safety measures when dealing with electricity and lightning (STS).	Energy and Its Transformation: Electricity	Electricity is a form of energy that is produced by a variety of sources and can be transformed into almost any other form of energy. Electricity is used to distribute energy quickly and conveniently to distant locations.	Assessment Recommendations: Builds a parallel and series circuit.

Strand	Content Standard	Topic	Concept	Notes
S.6.21	Describes the properties of magnets. 21.1 Defines magnetic field. 21.2 Explain the magnetic effects of a current in a wire. 21.3 Compares and contrasts voltmeters and ammeters. 21.4 Describes the function of an electric motor. 21.5 Describes how a generator produces electric current. 21.6 Distinguishes between alternating and direct current. 21.7 Explains the function of step up and step down transformers. 21.8 Describes the characteristics and applications of super conductors (STS). 21.9 Describes the use of magnetic resonance imaging (MRI) in medicine (STS).	Energy and Its Transformation: Electricity and Magnetism	Electrical flow causes magnetic effects and moving magnets are used to produce electrical energy.	Assessment Recommendations: Uses a model to demonstrate properties of magnets. Constructs a model of a motor generator. Prepares a written paper discussing the uses of magnets.
S.6.22	Describes sound as a form of energy produced by vibrations. 22.1 Lists the characteristics of waves. 22.2 Discusses the relationship between frequency and wavelength. 22.3 Compares and contrasts transverse and compressional waves	Energy and Its Transformation: Sound	Sound is a form of energy that travels as waves through various media.	Assessment Recommendations: Draws a wave illustrating frequency and wavelength.
S.6.23	Describes the transmission of sound through a medium. 23.1 Identifies the relationships between intensity and loudness, and frequency and pitch. 23.2 Illustrates the Doppler effect.	Energy and Its Transformation: Sound	Sound waves move at different speeds in different materials.	Assessment Recommendations: Creates an activity that demonstrates how sound is transmitted.
S.6.24	Distinguishes between music and noise. 24.1 Describes why instruments produce sounds of different quality. 24.2 Explains two types of wave interference.	Energy and Its Transformation: Sound	A sound that is pleasant to one may be noise to another.	Assessment Recommendations: Constructs a musical instrument.
S.6.25	Explains how sound waves are used to create images of body organs. 25.1 Describes the uses of ultrasound technology in medicine (STS).	Energy and Its Transformation: Sound	Technologies having to do with disease detection and prevention have resulted in longer life and increases in the human population.	
S.6.26	Recognizes the major energy sources people use today to meet their energy needs. 26.1 Defines and investigates energy sources such as solar, wind, geothermal heat, nuclear, fossil fuels, and hydroelectric power. 26.2 Identifies ways energy can be conserved. 26.3 Compares and contrasts alternative energy sources. 26.4 Identifies models that demonstrate how wind, sun, water, geothermal energy and waves can be used as alternative energy sources. 26.5 Discusses problems associated with storing and disposal of nuclear waste.	Energy and Its Transformation: Alternative Energy Sources	Nonrenewable energy sources are limited and alternative energy sources must be developed and used wisely.	Assessment Recommendations: Researches the advantages and disadvantages of alternative energy sources.

Georgia's Quality Core Curriculum

Social Studies Grade 6

Introduction to Social Studies Quality Core Curriculum K-12

The primary purpose of Social Studies education in Georgia schools is to help students become productive and responsible citizens. The Social Studies curriculum enables students to develop the ability to make informed decisions that balance concern for individual interests and the public good in a culturally diverse and interdependent world.

Exemplary Social Studies instruction provides opportunities for students to acquire knowledge, reflect upon and use that knowledge, and gain a better understanding of self and others. The Social Studies program includes the study of geography, history, political science, economics, behavioral sciences, and the humanities.

Knowledge (what students need to know about various social science and related disciplines), skills (what students should be able to do with acquired knowledge and skills), and values (mandated by the State Legislature in 1991) are the three major elements that comprise the Social Studies guidelines as established by state and national organizations. Social Studies instruction should be meaningful, integrative across teaching and learning, value-based and challenging. Through such a process students will develop the necessary knowledge, skills and values of a committed, competent citizen who participates in the civic affairs of the community and nation.

Georgia's Quality Core Curriculum (QCC) revision team, composed of PK-16 Social Studies educators from throughout the state, focused on the following concerns:

- refining content standards to clarify content and skills
- correlating content standards to appropriate core values
- building on concepts introduced at earlier stages of instruction
- providing content standards that are clearly measurable
- identifying civic responsibility, information processing, and problem-solving skills
- restructuring content for a more equitable grade-level distribution.

Specifically, in two areas within this curricula pattern the content has been redistributed. At the fourth and fifth grade levels, the original content standards that were in the QCC have been incorporated into a two-year study of United States history. The study of Canada, formerly in fifth grade, has now been incorporated into the sixth grade curriculum.

In grades six and seven, the history/geography pattern was retained; however, certain regional areas were rearranged to reflect greater similarity between place and cultures. In both cases, these patterns are being offered to encourage in-depth study of specific content areas, to expand the use of multi-media resources, and to provide greater opportunities for students to engage in active and hands-on learning experiences.

Introduction to Social Studies Quality Core Curriculum Grades 6-8

In the revised 6-8 Social Studies curriculum, emphasis in the sixth and seventh grades is placed on the cultural and geographic study of selected regions. In the eighth grade, students will study the geography and history of Georgia within the broader context of *United States History*.

Suggested regions for sixth grade study are the Americas, Europe, and Oceania. Suggested regions for seventh grade study are Asia, Africa, and the Middle East. However, each school system has the flexibility to sequence these cultural regions to reflect its unique curriculum, goals, and resources.

Notes

Social Studies: Grade 6-7

Geography and World Cultures

SS.6-7.1	Defines and locates regions of the Americas, Europe, and Oceania climate zones and physical features on maps and globes.	Geographic Environment	Physical Resources	Skills: Climatic zones Physical features
SS.6-7.2	Identifies various ethnic groups found in regions of the Americas, Europe and Oceania and their impact on the development of the selected regions.	People	Ethnic Groups	Skills: Cultural/linguistic maps Globe skills
SS.6-7.3	Identifies and locates regions in the Americas, Europe and Oceania.	Region	Location	Skills: Map projections Grid systems Atlases
SS.6-7.4	Explains how natural resources and physical features influence human activity in the Americas, Europe, and Oceania.	Geographic Environment	Human Interaction with the Environment	Skills: Economic activity maps Meaning of color on maps
SS.6-7.5	Defines scarcity and discusses examples in the Americas, Europe, and Oceania.	Geographic Environment	Economics	Skills: Industrial/agricultural maps Resource distribution maps
SS.6-7.6	Describes how unequal distribution of limited resources leads to specialization and interdependence among peoples and nations.	Geographic Environment	Human Interaction with the Environment	Skills: Trade route maps
SS.6-7.7	Traces the migrations and settlements of various groups and explains their impact on the development of each region.	Culture	History	Skills: Migratory route maps
SS.6-7.8	Explains how people in all economic systems engage in certain basic economic activities: - producing - exchanging - consuming - saving, and - investing.	Economic Systems	Economic Activity	Skills: Economic maps Graphs/charts

Course	Content Standard	Topic	Concept	Notes
SS.6-7.9	Traces the important historical developments of the selected regions of the Americas, Europe, and Oceania.	History	Regions	Skills: Timelines Graphs Diagrams
SS.6-7.10	Traces the important political developments of the Americas, Europe, and Oceania. Identifies and explains the spatial divisions of these regions.	History	Political Developments	Skills: Timelines Graphs Diagrams
SS.6-7.11	Traces the important social and cultural developments of the Americas, Europe, and Oceania.	History	Cultural Diversity	Skills: Timelines Graphs Diagrams
SS.6-7.12	Traces the important economic developments of the Americas, Europe, and Oceania.	History	Economics	Skills: Timelines Graphs Diagrams
SS.6-7.13	Assesses the cultural expressions of art, music, and literature.	Cultural Characteristics	Cultural Diversity	
SS.6-7.14	Explains how the social institutions (religion, government, and economics) influence the attitudes and behavior of people.	Cultural Characteristics	Social Institutions	
SS.6-7.15	Compares and contrasts political and economic systems using population data and other geography sources.	Modern Period	Political Systems Economic Systems	
SS.6-7.16	Describes the ways in which a citizen participates in the various types of government in the countries of the Americas, Europe and Oceania.	Modern Period	Citizen Participation	
SS.6-7.17	Describes how major technological advancements have contributed to the standard of living of the Americas, Europe, and Oceania through the use of primary resources.	Modern Period	Technological Advancement Primary Resources	
SS.6-7.18	Uses the map legend to interpret the special use of symbols representing various kinds of information, such as food, production, languages and population.	Map and Globe Skills	Symbols and Legends	
SS.6-7.19	Translates specific information from maps and globes into bar graphs and reads information from bar graphs.	Map and Globe Skills	Interpretation	

Course	Content Standard	Topic	Concept	Notes
SS.6-7.20	Contrasts physical and political maps of the Americas, Europe, and Oceania.	Map and Globe Skills	Interpretation	
SS.6-7.21	Makes generalizations about human activities in a geographic region using map information.	Map and Globe Skills	Interpretation	
SS.6-7.22	Compares map(s) and text descriptions of an area to draw inferences from them.	Map and Globe Skills	Interpretation	
SS.6-7.23	Measures and compares different travel routes (air, land and water).	Map and Globe Skills	Symbols and Legends	
SS.6-7.24	Identifies and locates regions in Asia, the Middle East and Africa.	Geographic Environment	Location	Skills: Map projections Grid systems Atlases
SS.6-7.25	Locates the countries of Asia, the Middle East and Africa on a world map.	Geographic Environment	Location	Skills: Locates by grid.
SS.6-7.26	Identifies and locates climatic zones and physical features on maps and identifies the physical processes that shape these features.	Geographic Environment	Physical Features	Skills: Meaning of colors on maps
SS.6-7.27	Explains how natural resources and physical features influence human activity in Asia, the Middle East, and Africa and how human actions then modify the physical environment.	Geographic Environment	Human Environment Interaction	Skills: Economic activity maps
SS.6-7.28	Identifies the changes that occur in the meaning, use, distribution, and importance of resources and defines scarcity and its impact.	Geographic Environment	Economics Resources Distribution	Skills: Industrial/agricultural maps Resource distribution maps
SS.6-7.29	Describes how unequal distribution of limited resources leads to specialization and patterns of economic interdependence on Earth's surface.	Geographic Environment	Economics Unequal Distribution Specialization	Skills: Trade route maps
SS.6-7.30	Identifies various ethnic groups found in regions of Asia, the Middle East and Africa and describes impacts on the development of the selected regions by these groups (e.g., linguistic patterns and cultural contributions).	People	Ethnic Groups	Skills: Cultural/linguistic maps Globe skills
SS.6-7.31	Traces the migrations and settlement of various groups and how they impacted Asia, the Middle East, and Africa.	Culture	History	Skills: Migratory route maps 149

Course	Content Standard	Topic	Concept	Notes
SS.6-7.32	Explains how people in all economic systems engage in certain basic economic activities: <ul style="list-style-type: none">- producing- exchanging- consuming- saving, and- investing.	Economic Systems	Economic Activity	Skills: Economic maps Graphs/charts
SS.6-7.33	Traces the important historical developments of the regions of Asia, the Middle East and Africa and how geographic factors have influenced events and conditions in the past.	History	Historical Development	Skills: Timelines Graphs Diagrams
SS.6-7.34	Traces the important political developments of Asia, the Middle East, and Africa and shows how cooperation and conflict contribute to these developments.	History	Political Development	Skills: Timelines Graphs Diagrams
SS.6-7.35	Traces the important social and cultural developments of Asia, the Middle East, and Africa.	History	Social and Cultural Diversity	Skills: Timelines Graphs Diagrams
SS.6-7.36	Traces the important economic developments of Asia, the Middle East, and Africa.	History	Economics	Skills: Timelines Graphs Diagrams
SS.6-7.37	Assesses the cultural expressions of art, music, and literature.	Cultural Characteristics	Cultural Expressions	
SS.6-7.38	Explains how the social institutions (government, religion and economics) influence the attitudes and behavior of people.	Cultural Characteristics	Social Institutions	
SS.6-7.39	Identifies the political and economic structures that have evolved to deal with basic issues in Asia, the Middle East and Africa.	Modern Period	Political Structures	
SS.6-7.40	Describes the ways in which a citizen participates in the various types of government in the countries of Asia, the Middle East and Africa.	Modern Period	Types of Government	
SS.6-7.41	Describes how major technological advancements have contributed to the standard of living of each region and how this affects access to, and use of, resources.	Modern Period	Technological Advancements	

Course	Content Standard		Topic	Concept	Notes
SS.6-7.42	Identifies the three basic questions asked by any society regarding production from natural and human resources: - What will be produced? - How will it be produced? - For whom will it be produced?		Modern Period	Society Production Resources	
SS.6-7.43	Uses the map legend to interpret the special use of symbols representing various kinds of information, such as food, production, languages and population.		Map and Globe Skills	Symbols and Legends	
SS.6-7.44	Develops graphs, charts, diagrams, timelines, and maps to interpret and present geographic information.		Map and Globe Skills	Interpretation	
SS.6-7.45	Contrasts physical and political maps of the same areas.		Map and Globe Skills	Interpretation	
SS.6-7.46	Makes generalizations about human activities in a geographic region using map information.		Map and Globe Skills	Human Activity	
SS.6-7.47	Compares map(s) and text descriptions of an area to draw inferences from them.		Map and Globe Skills	Inferences	
SS.6-7.48	Measures and compares different travel routes (air, land and water).		Map and Globe Skills	Travel Routes

Georgia's Quality Core Curriculum

Health & Physical Education Grade 6

Introduction to Health and Physical Education

Quality Core Curriculum

K-12

Health and Physical Education are lifelong processes which are the shared responsibility of the student, home, school, and community. The Health and Physical Education programs in Georgia Public Schools provide each student with the information and skills necessary to be active and healthy. Students have opportunities to practice and apply skills and knowledge learned. Through these programs, students are provided a foundation to be healthy and motivated to participate in physical activity in a variety of school and community settings.

Strand	Content Standard	Topic	Concept	Notes
--------	------------------	-------	---------	-------

Health: Grade 6**Alcohol, Tobacco & Other Drugs**

H.6.1	Examines school rules, system policies, and local, state, and federal laws regulating purchase, sale, use, and possession of alcohol, tobacco products, and other drugs.	Policy and Law		
H.6.2	Analyzes the impact of the use of alcohol, tobacco products, and other drugs on the individual, family, and community.	Effects		
H.6.3	Recognizes and assesses the effects that alcohol and other drugs could have on individuals operating vehicles and other equipment, including the consequences of riding or being with someone under the influence.	Consequences		
H.6.4	Assesses personal risk factors (e.g., heredity, family and peer drug use, and academic failure) and protective factors (e.g., positive adult models, coping skills, knowledge of resources, and self-sufficiency) for drug use.	Risk Factors		

Disease Prevention

H.6.5	Identifies methods to prevent the spread of communicable diseases (e.g., mononucleosis, tuberculosis, etc.) and risk factors of noncommunicable diseases (e.g., heart disease, and cancer).	Communicable Diseases		
H.6.6	Identifies methods to prevent sexually transmitted diseases and whether or not they are effective. Abstinence is the only sure way to prevent pregnancy and sexually transmitted diseases. (Note: does not require demonstrations of contraceptive devices).	STDs		
H.6.7	Defines acronyms HIV/AIDS and STD and recognizes that HIV/AIDS and STDs are communicable diseases.	HIV/AIDS		
H.6.8	Recognizes that HIV/AIDS is caused by a virus and is currently incurable and fatal.	HIV/AIDS		
H.6.9	Recognizes that abstaining from sexual activity and refraining from intravenous drug use are the most effective methods of preventing HIV/AIDS.	Abstinence		BEST COPY AVAILABLE

Strand	Content Standard	Topic	Concept	Notes
--------	------------------	-------	---------	-------

H.6.10 Recognizes abstinence from sexual activity as the only sure method of preventing sexually transmitted diseases.

H.6.11 Identifies the benefits of setting personal goals for maintaining a healthy body. Goal Setting

Family Living

H.6.12 Identifies factors that promote a positive self-image (e.g., accepting responsibility; respect for self, authority and others; self-discipline, self-control and the right to be assertive). Self Concept

H.6.13 Recognizes how sexual decisions are influenced by group pressures (e.g., community, media, and peer). Persuasion

H.6.14 Identifies ways of resisting persuasive tactics regarding sexual involvement (e.g., saying "no," negotiation, using refusal and decision-making skills). Refusal Skills

H.6.15 Recognizes that having children is best undertaken in marriage. Decision Making

Growth and Development

H.6.16 Identifies the parts and major functions of the nervous system. Nervous System

H.6.17 Relates how personal health practices dealing with nutrition, alcohol, tobacco products, and other drug use affects the functions of the nervous system. Lifestyle

H.6.18 Identifies basic anatomy of the male and female reproductive systems. Reproductive System

Mental Health

H.6.19 Expresses appropriate ways to build and maintain healthy relationships with peers, parents, and others. Interpersonal Relationships

Strand	Content Standard	Topic	Concept	Notes
H.6.20	Explains factors that could escalate and reduce conflict.		Conflict Resolution	
H.6.21	Describes how to deal with negative "peer pressure" by expressing strong feelings peaceably.		Peer Pressure	
H.6.22	Recognizes signs and symptoms associated with suicide and identifies appropriate sources for help.		Suicide	
Nutrition				
H.6.23	Chooses eating patterns that enhance energy, growth, and health.		Caloric Balance	
H.6.24	Demonstrates awareness of personal food choices on future health.		Dietary Choices	
Personal Health				
H.6.25	Develops strategies and skills for maintaining an adequate level of personal grooming and hygiene, emphasizing changes during adolescence.		Hygiene	
H.6.26	Determines dental care necessary to prevent gingivitis (emphasis on how smokeless tobacco use leads to this disease).		Dental Care	
Safety				
H.6.27	Identifies and explains the causes of extreme temperature emergencies (e.g., hypothermia, heat exhaustion, and heat stroke) and the appropriate strategies for prevention and treatment.		First Aid	
H.6.28	Identifies threats to personal safety (e.g., child abuse, sexual and physical abuse, neglect and emotional abuse).		Violence Prevention	
H.6.29	Identifies local support system concerning personal safety (e.g., family, teacher, religious advisor, friend, and counselor).		Resources

Physical Education: Grade 6

Middle School

PE.6.1

Participates in fitness assessment (i.e., Fitness Gram) and developmentally appropriate health-related fitness activities for the purpose of improving skill performance and physical fitness.

Physical Fitness

Health-Related

Skills:
Cardiovascular endurance, muscular strength, muscular endurance, flexibility, and body composition

Assessment Recommendations:
Teacher observation, student journal, including in-school and out-of-school activities

PE.6.2

Uses fitness assessment results to develop personal fitness goals.

Physical Fitness

Health-Related

Skills:
Cardiovascular endurance, muscular strength, muscular endurance, flexibility, and body composition

Assessment Recommendations:
Portfolio, including goal setting, log, rationale for selecting goal, and activity and strategy for improvement. Present project to class

PE.6.3

Records heart rate before, during, and after vigorous physical activity.

Physical Fitness

Health-Related

Skills:
Cardiovascular endurance, muscular strength, muscular endurance, flexibility, and body composition

Assessment Recommendations:
Student journal and log

PE.6.4

Engages in physical activity at the target heart rate for a minimum of 20 minutes.

Physical Fitness

Health-Related

Skills:
Cardiovascular endurance, muscular strength, muscular endurance, flexibility, and body composition

Assessment Recommendations:
Student journal and log

Georgia's Quality Core Curriculum

Fine Arts Grade 6

Introduction to Fine Arts Quality Core Curriculum K-12

The revised Quality Core Curriculum (QCC) for Fine Arts reflects intense efforts on the part of educators in dance, music, theatre, and visual arts to coordinate the scope and sequence in all Fine Arts areas. The revision provides standards that represent four major ways of responding to or creating the arts. A discipline-based approach for dance, music, theatre, and visual arts is emphasized. The Fine Arts QCC strands in all areas are:

- **Artistic Skills and Knowledge: Creating, Producing, Performing**
Developing skills and organizing knowledge for creating, producing, and performing the Fine Arts
- **Historical and Cultural Context**
Examining the Fine Arts as creative expression of humankind's relationship to historical, cultural, and social context
- **Critical Analysis and Aesthetic Understanding**
Responding to the Fine Arts through critical analysis and aesthetic understanding
- **Connections**
Identifying and expanding connections within the Fine Arts and other disciplines

The revised Fine Arts QCC will arrive in Georgia schools as the Year for Arts Education is celebrated across the state. Stressing the importance of the arts in the total education of all Georgia students is the primary focus of the celebration. The Fine Arts QCC revision provided continuity, clarity, consistency, and comprehensive standards for all Georgia students participating in Fine Arts education.

Introduction to Dance

Quality Core Curriculum

K-12

The Quality Core Curriculum (QCC) supports dance taught in a physical education context while recognizing that dance is a fine art. Content objectives that may be appropriate within a physical education curriculum are indicated. The QCC objectives recognize the fullest range of dance as an art form with the highest expectations for students participating in this curriculum. The Georgia Department of Education QCC for Dance is based on an educational framework that embraces the highest academic standards and values as well as the philosophy and standards of the GOALS 2000/ Educate America Act.

Each content standard represents a broad or general objective and may be introduced and developed over several grades and through multiple lessons. The content standard is not inclusive of all potential movements, steps, skills or approaches related to the standard or dance activity. The QCC is designed as a *guide and suggests standards for students in dance* with the expectation that the institution or instructor will develop the specific curriculum and lesson plans within the QCC framework. Therefore, the *specific objective* to be mastered relates to the instructor's qualifications, the unique student body, class size, and overall environment and philosophy of the school.

Content is categorized by topic and is presented in four clusters (K-2, 3-5, 6-8, 9-12) with allowances for progression. Some regard is given but not restricted to *prioritized teaching order*. Elements listed (e.g., push-pull, collapse, rise, etc.) within an objective and across objectives are not in any hierarchical placement. They are listed as examples to be integrated into the lesson plan appropriate to the teacher's expertise and the students' needs and abilities. Similarly, examples of techniques are not representative of status or educational preference.

The content standards represent seven topics or categories of knowledge, derived from a DBAE (Discipline Based Arts Education) framework. These include:

- Training and technique
- Elements of movement
- Criticism
- Composition (includes aesthetics)

- Multi-cultural context
- Dance wellness
- Interdisciplinary studies

Topics for content standards sometimes overlap and intersect; however, the one indicated in the topic column is the major focus.

The terms *Dance Technique Principles* and *Elements of Movement* are used. Elements of Movement includes aspects of *space, shape and force*. The writers of this document recognize and agree that *time* is often referred to as an element of movement, but it is addressed through the interdisciplinary nature of music as it relates to dance. For clarification, the glossary offers definitions of other terms used in the QCC document. This is by no means a complete list of dance terminology. Resources are provided for further reference.

Dance Glossary

Aesthetic criteria. Standards on which to make judgments about the artistic merit of a work of art.

Alignment. Proper body posture for dance.

Artistry. Creative expression of one's thoughts, feelings, and ideas through an artistic performance.

Body shapes. The spatial contour the body makes such as curved, angular, twisted, or straight.

Centering. Using proper body alignment to maintain one's balance.

Choreographic structure. The specific compositional forms in which movement is structured to create a dance, such as themes, variation, canon, aba, rondo, etc.

Choreography. The process of making a dance which involves the understanding of choreographic principles, processes, and structures.

Clarity. Execution of technical dance steps in a clear and concise manner.

Combination: Series of technical dance steps performed by the dancer.

Composition. Using combinations of movement or movement phrases to form a greater body of work.

Dynamics. The expressive content of human movement, sometimes called qualities, in particular, the way in which energy is used.

Energy. An element of dance; the force and quality of movement defined by the degree of impetus and effort.

General space. A defined area of space through which dancers can travel using all the available space. The area of space could include a dance studio, gym, or classroom.

Improvisation. Movement that is created spontaneously; occurring within free structured environments, but always with an element of chance. Provides the dancer with opportunity to bring together elements quickly, and requires focus and concentration. Improvisation can be instant and simultaneous choreography and performance.

Kinesthetic awareness. The ability of the body's sensory organs in the muscles, tendons, and joints to respond to stimuli while dancing or viewing a dance.

Levels. The height of the dance in relation to the floor. Levels in space are referred to as high, middle, and low.

Locomotor movement. Movement that travels from place to place, usually identified by weight transference on the feet. Basic locomotor steps are the walk, run, leap, hop, and jump and the irregular rhythmic combinations of the skip, glide and gallop.

Movement quality. The identifying attributes created by the release, follow-through, and termination of energy, which are key to making movement become dance. Typical terms denoting qualities include sustained, percussive, collapse, and vibratory. It also includes the effort actions created by specific combinations of space, time, and energy, such as float, dab, punch, glide, press, flick, slash, and wring developed by Rudolph Laban.

Movement phrase. Dance sequences that have a sense of completion.

Movement theme. A complete idea in movement that is manipulated and developed within a dance.

Musicality: Ability to respond to a rhythm while moving.

Negative space. The empty or open space created when a shape is made by the body.

Nonlocomotor/axial movement. Any movement that occurs in one location in space using the available space in any direction or movement organized around the axis of the body rather than designed for travel from one location to another. Bending, twisting, stretching, and swinging are examples of axial movement.

Partnering. Leading, following, or mirroring someone.

Pathway. The path traced as movement proceeds through space. A pathway may be either on the floor or through the air and is constructed of straight and/or curved lines.

Personal space. The “space bubble” or the kinesphere that one occupies; it includes all levels, planes, and directions both near and far from the body’s center.

Positive space. The filled space created by the body when a shape is made in space.

Rhythmic acuity. The kinesthetic, auditory recognition of, and response to various complex time elements.

Spatial concept. One’s relationship to the space around them.

Style. A distinctive manner of moving; the characteristic way dance is done, created, or performed that identifies the dance of a particular performer, choreographer, or period (e.g., ballet, modern, jazz, folk, tap).

Time. An element of dance which measures tempo/speed and force/energy.

Technique. Refined physical skills pertaining to a particular style of dance.

Time. The quality of movement dealing with speed, tempo, rhythm, and duration of an action or phrase.

Vibratory. Percussive movement; a series of quivering, fluttering movements when extreme tension is applied to the body.

Warm-up. Movements and/or movement phrases designed to raise the core body temperature, move the body through a preparatory range of movement, and bring the mind into focus for the dance.

FAD.6-8.19	Explores traditions and development of Western theatrical dance.	Multicultural Context		

Introduction to Music Quality Core Curriculum K-12

In revising the Georgia Quality Core Curriculum (QCC) for Music, the music subcommittee of the fine arts committee, maintains the emphasis on content knowledge, aesthetic analysis and appreciation, and creative and technical skills. The original draft of the music curriculum was submitted to schools during the winter of 1997. More than 200 pages of educators' responses to the initial draft were studied carefully by the committee, and many further revisions were made based on those responses. The scope and sequence of the instructional program have been correlated through all music areas. The fine arts committee defined four strands for the arts that provided the overall framework for the revision. This music guide delineates the strands, topics, and content standards which are expected of all participants. Connections with all fine arts and other curricula have been addressed, and uses of technology resources have been identified.

Knowledge and understanding of music are essential components of education. Music is a valid core discipline in its own right; however, music enhances problem-solving skills, improves discipline, and cultivates social development. The revised QCC for Music includes content standards for General Music (K-8), Band (4-12), Choral (4-12), String Orchestra (4-12), Guitar/Class Piano (6-12), Music Appreciation (6-12), and Music Theory and Composition (9-12).

The fundamental purpose of the study of music in the schools is to develop (1) artistic skills and knowledge, such as creating, performing, and producing; (2) critical analysis and aesthetic understanding; (3) interdisciplinary connections; and (4) historical and cultural context.

Students in the early stages of music education learn by doing. Singing, listening, playing instruments, moving, performing, and creating enable them to develop artistic skills and knowledge. This also provides students with an insight into the form and structure of music - developing their creativity. Broad experience with a variety of music assists the student in making informed musical judgments. The experience further enables them to understand the connections and relationships to other disciplines. Students must be exposed to and understand their own historical and cultural heritage as well as that of others.

The committee encourages the use of available technology to reinforce and enhance student exploration and technical development and to assist them in transcribing and composing music. We also recognize the importance of collaboration among the arts and other disciplines in producing performances.

Students who receive General Music instruction once during the middle school should be taught from the content standards of the sixth grade General Music curriculum. The music appreciation curriculum may be selected in place of the General Music curriculum if music is taught in an exploratory program of six or nine weeks. A curriculum in choral, band, and stringed instruments for grades 4-8 has been provided, taking into account the differences in school systems' course offerings. Each school system is to use the part of this curriculum that applies to it and correlate the curriculum with the grade in which these subjects are taught. School systems should use the content standards that are developmentally appropriate for the students in their music programs.

Many music programs include auxiliary performing groups that are outgrowths of the basic programs. Such groups may include jazz ensemble, show choir, boys' and girls' ensembles, and chamber groups. While no specific content standards were designated for these organizations, the curricula for band, chorus, and orchestra were developed around accepted principles of good musicianship. These standards should be used to guide the training of students in the auxiliary music programs as well as the basic programs.

Music Glossary

Articulation. In performance, the characteristics of attack and decay of tones and the manner and extent to which tones in sequence are connected or disconnected.

Body percussion. Sounds produced by use of the body, e.g., clap, snap, pat, tap, stamp, whistle, etc.

Classroom instruments. Instruments typically used in the general music classroom including, e.g., recorder-type instruments, auto harp, mallet instruments, simple percussion instruments, fretted instruments, keyboard instruments, and electronic instruments.

Competency level. Proficiency level corresponding with the musical ability of the student.

Cultural. The customs and/or beliefs of a racial, religious, or social group.

Chording instruments. Instruments which enable the performer to sound chords.

Dynamic levels, dynamics. Degrees of loudness.

Developmentally appropriate. The instructional level at which students may most effectively assimilate new information.

Elements of music. Pitch, rhythm, harmony, dynamics, timbre, texture, form.

Environmental sounds. Sounds that naturally occur or which can be produced from materials found in the environment.

Expressive qualities. Any articulation, dynamic, or tempo marking used to interpret music.

Ethnic music. Musical forms or styles indigenous to a specific culture.

Folk source. Identification of a specific genre.

Form. The overall structural organization of a music composition (e.g., AB, ABA, call and response, rondo, theme and variations, sonata-allegro) and the interrelationships of music events within the overall structure.

Formal structure. See *Form*.

Genre. A type or category of music (e.g., sonata, opera, oratorio, art song, gospel, suite, jazz, madrigal, march, work song, lullaby, barbershop, Dixieland).

Intonation. The degree to which pitch is accurately produced in performance, particularly among the players in an ensemble.

Line notation. Horizontal or vertical use of a line to denote rhythm, beat, pitch, and melodic direction.

Meter. The grouping in which a succession of rhythmic pulses or beats is organized; indicated by a meter signature at the beginning of a work.

Meter signature / time signature. An indicator of the meter of a musical work, usually presented in the form of a fraction, the denominator of which indicates the unit of measurement and the numerator of which indicates the number of units that make up a measure.

Media. Written, visual, audible, and technological resources.

Musical heritage. Knowledge of historical and cultural backgrounds.

Ostinato. Short musical patterns that are repeated persistently through some composition.

Pre-notation symbols. Line notation of rhythm and/or melody.

Style. The distinctive or characteristic manner in which the elements of music are treated. In practice, the term may be applied to, e.g., composers (the style of Copeland), periods (Baroque style), mediums (keyboard style), or genre (operatic style, bluegrass style).

Technical accuracy, technical skills. The ability to perform with appropriate timbre, intonation, and diction and to play or sing the correct pitches and rhythms.

Timbre. The character or quality of a sound that distinguishes one instrument, voice, or other sound source from another.

Tonality. The harmonic relationship of tones with respect to a definite center or point of rest; fundamental to much of Western music from ca. 1600.

Technique. The ability to perform with appropriate timbre, intonation, and diction; to play or sing the correct pitches and rhythms.

Technology. A manner of accomplishing a task using technical processes and equipment, methods, and knowledge.

Texture. The quality of sound produced by using a greater or lesser number of musical instruments, voices, or chordal tones within a given section of a musical composition.

Artistic Skills and Knowledge: Creating, Performing, Producing

FAM(SO).4-8.1	Demonstrates correct playing position and posture for chosen instrument.	Performance Skills	Technique	
FAM(SO).4-8.2	Demonstrates correct pizzicato, bowing, and left hand techniques appropriate to chosen instrument and developmental level.	Performance Skills	Technique	
FAM(SO).4-8.3	Participates effectively as a member of performing ensembles.	Performance Skills	Technique	
FAM(SO).4-8.4	Performs selected music repertoire at the expected competency level.	Performance Skills	Rhythm, Melody, Harmony, Form, Timbre, Expressive Qualities, Notation, and Technique	
FAM(SO).4-8.5	Reads music to the expected competency level of the class.	Performance Skills	Rhythm, Melody, Harmony, Form, Timbre, Expressive Qualities, Notation, and Technique	
FAM(SO).4-8.6	Demonstrates ability to perform individually, in small groups, and as a member of the total ensemble.	Performance Skills	Rhythm, Melody, Harmony, Form, Timbre, Expressive Qualities, Notation, and Technique	
FAM(SO).4-8.7	Tunes instrument accurately with assistance and demonstrates an increasing awareness of good intonation.	Knowledge	Technique	
FAM(SO).4-8.8	Performs with characteristic tone quality at the expected competency level.	Performance	Technique	
FAM(SO).4-8.9	Demonstrates knowledge of vibrato.	Knowledge	Expressive Qualities and Technique	
FAM(SO).4-8.10	Demonstrates knowledge of phrase and melody through performance.	Performance Skills	Rhythm, Melody, Harmony, Form, Timbre, Expressive Qualities, Notation, and Technique

Introduction to Theatre Quality Core Curriculum K-12

Philosophically, the Theatre K-12 Quality Core Curriculum (QCC) is discipline-based and uses a process approach to learning. The Theatre QCC was developed based on the continuum of skills and an expectation of a maturing of skills from K-12 that would lead to an acquisition of theatre knowledge and skills. The QCC was built to accommodate the diversity of programs and offerings across the state; it allows, at each grade level, for each school system or school program to choose from the listed objectives to design class curricula that will address that population's needs. While the Theatre QCC was designed as a nonsequential K-12 program, it was crafted as an inclusive set of content standards that would lead to a complete theatre experience K-12.

The content standards were designed for depth and breadth of learning in theatre. They offer an optimum experience for the student at any grade level. Teachers may develop courses by choosing the number and depth of content standards that they decide is appropriate for their schools and classes.

The Theatre QCC provides local systems and schools a high-level outline of what can be taught in various grade levels and courses in Theatre. It can be used as a discrete theatre curriculum or as a support for interdisciplinary theatre education, particularly in grades K-8. In high school, the QCC provides a general course outline for a thorough theatre background. The QCC does not include recommendations, for assessment was seen to be a more system-specific activity, given the nature of diversity of each system's theatre programs.

Philosophically, the QCC celebrates the theatre arts as a vital part of life's learning. It makes connections within the arts and with other disciplines. Its design supports a continual growth in sophistication and depth of understanding in theatre and helps students understand artistic discipline while growing to love the passion for life that theatre celebrates.

While theatre education is not a required section of the Georgia QCC, it is essential to a well-rounded education. The Theatre QCC will help students and teachers continue to be lifelong learners and lifelong contributors to theatre.

Theatre Glossary

Aesthetic criteria. Criteria developed about the visual, aural, and oral aspects of the witnessed event, derived from cultural and emotional values and cognitive meaning.

Aural. Physical element involving listening.

Drama. A literary composition intended to portray life or character or to tell a story usually involving conflicts and emotions exhibited through action and dialogue, designed for theatrical performance.

Electronic media, Dramatic media. Means of communication characterized by the use of technology, such as film, radio, computers, television, virtual reality.

Ensemble. Dynamic interaction and harmonious blending of the efforts of the many artists involved in the dramatic activity of a theatrical production.

Environment. Physical surroundings that establish place, time, and atmosphere/mood; the physical conditions that reflect and affect the emotions, thoughts, and actions of characters.

Front of house. The box office and lobby.

House. Commonly defined as the area in which the audience is seated.

Improvise. To spontaneously use movement and speech to create a character or object in a particular situation.

“In character.” Theatrical term referring to an actor/actress portraying someone or something else while on the stage.

Kinetic. Physical element involving movements of the body.

Motivation. The actor’s reason for doing or saying something.

Oral. Physical element involving the use of the voice.

Pitch. The highness or lowness of one's voice.

Properties (Props). Any object used by actors to enhance character portrayal.

Sensory recall. To remember a sensation and recreate the physical activity associated with that sensation in a dramatic activity.

Tempo. The speed at which someone talks or the pace of production.

Theater. The place that is the setting for dramatic performances.

Theatre. The imitation/representation of life, performed for other people; the performance of dramatic literature.

Three dimensional character. A character that has a variety of emotions, strengths, and weaknesses.

Tone. The quality or attitude portrayed using one's voice (gruffness, sweetness, etc.)

Underrepresented artist. Those who work in nontraditional art forms.

Visual. Physical element involving sight.

Introduction to Theatre Quality Core Curriculum 6-8

Students are encouraged toward self-actualization in the middle grades. They are given many content areas to explore. Theatre should attempt to build their self-confidence and connect many of the areas of exploration. The QCC specifically connects to the middle grades Social Studies QCC in content specifics and the Language Arts QCC in process emphasis. A major focus begins in sixth grade with presentational theatre; in eighth grade, the focus begins to change to representational theatre, preparing students for the representational focus in their high school classes. The overall focus is process work, which leads to presentational work when the teacher decides it is appropriate. The Theatre 6-8 QCC is designed as an exploratory curriculum. It allows teachers to select specific standards to teach in conjunction with Social Studies or English, or to teach standards in separate Theatre classes.

Introduction to Visual Arts Quality Core Curriculum K-12

Visual arts education is basic to developing fully literate citizens. Instruction in studio, art history, aesthetics, and art criticism enables students to attain higher levels of performance, critical thinking, and aesthetic judgment.

The strands reflected in the curriculum reveal content standards specified by theater, dance, music, and visual arts.

Critical Analysis and Aesthetic Understanding

Responding to the visual arts involves perception, which is a precursor to the creative process of thinking, imagining, and designing. Perception is the visual and sensory awareness of impressions, images, relationships, experiences, and feelings. The process of visually perceiving encompasses an awareness of the elements of art and the principles of design and how they function and interrelate.

Responding to the arts also involves developing the ability to analyze critically and judge aesthetically works created by artists. Describing and evaluating the media, processes, and meanings of works of visual art and making comparative judgments about them is an integral part of the learning process. Aesthetics is a philosophy concerned with determining the nature and value of art; it is a means of interpreting the deepest human expressions. Methods of inquiry that allow for the examination of complex ideas in structured, sequential ways provide the basis for aesthetic education.

Artistic Skills And Knowledge: Creating, Performing and Producing

Developing skills and organizing knowledge for creating and producing visual art involves continuous exposure to and experimentation with a wide range of artistic processes, tools, and materials. This framework promotes the acquisition of new ways of thinking, working, communicating, reasoning, and investigating.

Creating is at the heart of this instruction. Students learn to coordinate their hands and minds in explorations of the visual world. They learn to make choices that enhance communication of their ideas. Natural inquisitiveness is promoted, and students learn the value of perseverance. This is accomplished through a wide range of visual arts experiences including traditional media and processes and those created by new forms of technology.

Art History: Historical and Cultural Context

Examining the arts involves the study of works of art, style, and movements within their appropriate historical and cultural context. Understanding the connection between art styles and lifestyles in various cultures is important in the study of art. Students become aware that great works of art are a means of understanding human ideals and aspirations, and a means of appreciating the heroic, comic, and tragic aspects of human affairs. Experiences and achievements of individuals and societies are reflected through the history of visual art.

Interdisciplinary Connections

Identifying and expanding the connections within the arts and other disciplines balances the curriculum to help develop the whole intellect. Concepts common to other academic areas are integrated and promoted in the content standards. The goal of the art teacher should be to incorporate a holistic approach to education in the arts.

Visual Arts Glossary

Abstract. Generalized art which retains the essence or characteristics of a recognizable subject or object.

Additive sculpture. Modeling a sculpture by adding materials to it until the desired effect is maintained.

Aerial perspective. The illusion of space on the picture plane created by means other than linear perspective such as contrast, warm and cool colors, etc.

Aesthetics. A branch of philosophy that focuses on the nature of beauty, the nature and value of art, and the inquiry processes and human responses associated with those topics.

Airbrush. Atomizer operated by compressed air used for spraying paint.

Analogous. Three colors that are next to each other on a color wheel and which have a common hue.

Analysis. Identifying and examining separate parts as they function independently and together in creative works and studies of the visual arts.

Animation. The illusion of movement caused by successive presentations of inanimate objects in rapid order.

Architecture. The art of designing and planning the construction of buildings, cities, and/or bridges.

Art history. A record of the visual arts, incorporating information, interpretations, and judgments about art objects, artists, and conceptual influences on developments in the visual arts.

Arts disciplines. Studies which include dance, music, theatre, and visual arts.

Assess. To analyze and determine the nature and quality of achievement through means appropriate to the subject.

Asymmetrical balance. An equal distribution of weight (physically or visually) achieved without identical units on both sides. One large shape or form may be balanced by several smaller ones. Also known as informal balance.

Aural. Art that incorporates sound.

Background. The part of the picture plane that seems to be farthest from the viewer.

Balance. A principle of design referring to a feeling of equality in weight, attention, or attraction within a composition.

Batik. A system of dyeing fabric in which selected areas are protected from the dye with wax.

Biomorphic. See organic.

Calligraphy. The art of lettering.

Ceramics. Handbuilt or wheelthrown sculpture or vessels made of clay which can be fired, or fired and glazed.

Collage. A collection of materials arranged for a composition or design on a flat surface.

Color. A visually perceived hue.

Color scheme. Plan for organizing color.

Complementary. Colors opposite each other on a color wheel that contrast with each other.

Composition. The way in which the parts of an artwork are put together or organized.

Content. Message the artist is trying to communicate in a work of art.

Context. A set of interrelated conditions (such as social, economic, political) in the visual arts that influence and give meaning to the development and reception of thoughts, ideas, or concepts and that define specific cultures and eras.

Contour. Interior and exterior edges of objects.

Contour line. A line that follows the edges or edge of a shape or form.

Contrast. Refers to differences in values, colors, textures, and other elements in an artwork used to achieve emphasis and interest.

Cool colors. Colors that suggest a cool, soothing feeling or mood. Cool colors are blues, some greens, and some violets. Cool colors appear to recede spatially in artwork.

Create. To produce works of visual art using materials, techniques, processes, elements, and analysis; the flexible and fluent generation of unique, complex, or elaborate ideas.

Critical process. Description, analysis, interpretation, and evaluation used in discussing artworks.

Criticism. Describing and evaluating the media, processes, and meanings of works of visual art, and making comprehensive judgments.

Critique. To review, analyze, and discuss works of art.

Cross cultural. Art across cultures (intercultural).

Culture. Behaviors, customs, ideas, and skills of a distinct group of people.

Dominance. A principle of design where one element is emphasized.

Edition. A set number of productions of a work of art.

Elements of design. Line, shape, form, color, space, texture, and value.

Emphasis. A principle of design that refers to the use of areas that lead the eye from one part to another and then to the most important part of a composition.

Enameling. The process of firing special powder or enamel pigments on copper or silver in a kiln.

Ethnic art. Art inspired by a specific culture.

Exhibitions. An organized display of works of art.

Explore. A general concept used in this document that may include compare, contrast, identify, create, discuss, use, etc.

Expression. A process of conveying ideas, feelings, and meanings through selective use of the communicative possibilities of the visual arts.

Fiber arts. Arts which include techniques such as stitchery, weaving, tapestry, basketry, papermaking, softsculpture, batik, needle arts, etc.

Folk art. A style portraying the lives of the common people of a certain region. It generally covers decorative crafts and painting or sculpture produced for practical reasons.

Foreground. The space which appears to be closest to the viewer.

Form. 1. Any style or arrangement which may be repetitive; 2. An arrangement which is the accepted structure.

Free-flowing (Free-form). Any curvilinear, asymmetrical shape not bound by hard edges.

Functional art. Art designed for a certain purpose.

Functions (and purposes) of art. Describes the context and reasons, the desired results, for which the artwork was created. In art education, students examine and use subject matter, themes, and symbols, as well as formal characteristics of art works to give meaning to art content.

Geometric form. Mathematical three-dimensional shapes; cube, triangle, square, pyramid, etc.

Geometric shapes. Two-dimensional shapes created by exact mathematical laws; oval, circle, square, triangle, and rectangle.

Glazing. A technique used in painting in which pigment mixed with a transparent medium is layered, allowing underlying colors to show through. Glazing in ceramics is the process of applying glaze to clay work.

Gradation. A gradual smooth change from light to dark, rough to smooth, or one color to another.

Graphic design. A category of art that includes designing for commercial purposes, packages, signs, and advertisements.

Handbuilding. A process used in ceramics that incorporates slabwork, coils, and sculptural elements.

Harmony. The unity of all visual elements of a composition achieved by the repetition of the same characteristics or those which are similar in nature.

Horizon line. The line, either real or implied, in a work of art that marks where the sky and the ground appear to meet.

Hue. The name of a color.

Illustration. A work of art that usually seeks to join visual and discursive information for the purposes of communication.

Intensity. The brightness (purity) or dullness of a color, also known as chroma.

Intermediate colors (Tertiary). A color made by mixing a primary color with a secondary color.

Jewelry. A functional art form that involves assemblage and/or sculptural techniques to create ornamental objects, i.e., metalsmithing, lapidary, enameling, beading.

Kinetic. Art designed to move by natural or man-made forces.

Line. An uninterrupted actual mark or implied direction going from one point to another.

Linear perspective. Showing depth and distance in a picture with converging lines.

Maquettes. A small sculpture made as a preliminary model.

Materials. Resources used in the creation and study of visual art, such as paint, clay, cardboard, canvas, film, videotape, models, watercolors, wood, and plastic.

Media. Broad categories for grouping works of visual art according to the art materials used.

Media arts. Art forms that deal with electronic technologies.

Middle ground. A term used to define a level surface behind the foreground and in front of the background.

Mixed media. The use of different materials in the same work of art.

Model or modeling. To shape or build up with malleable media.

Monochromatic. Uses only one hue and variations obtained from its tints, shades, and tones.

Montage. A composite picture resulting from the placing of objects, materials, prints, or photographs in a preconceived design.

Mosaic. A method of decoration using small pieces of colored glass, stone, or ceramics which are inlaid on a background to form a design or picture.

Motif. A recurring element, subject, or theme in works of art.

Movement. A principle of design that refers to the arrangement of elements in an artwork organized in such a way as to create a sense of motion.

Movements (arts). Refers to an historical or cultural period when certain styles became prevalent.

Multi-cultural. Refers to more than one culture.

Negative space. The space around and through a shape or object.

Neutral colors. Colors formed by mixing complementary colors on the color wheel.

Non-objective. Shapes/forms created with no regard to an identifiable subject or object.

One-point perspective. A system of creating the illusion of space in the picture plane using one vanishing point.

Organic form. Three-dimensional free-flowing shapes found in nature.

Organic shape. Two-dimensional or flat free-flowing shapes found in nature.

Origami. The art of Oriental paper folding.

Papier Maché. A technique used to create three-dimensional forms with a mixture of shredded or torn paper and paste.

Pattern. Repetition of a motif involving line, shape, color, value, or space in a composition.

Perception. Visual and sensory awareness, discrimination, and integration of impressions, conditions, and relationships with regard to objects, images, and feelings.

Perspective. The representation of three-dimensional objects on a flat, two-dimensional surface; one-point, two-point, linear, aerial/atmospheric.

Photogram. A process in which light-sensitive paper is exposed with objects to create positive and negative space.

Photography. The technique of capturing optical images on light sensitive surfaces.

Pin hole camera. A hand made camera using a pin hole opening to expose the film to light.

Pointillism. A method of painting in which the dots of colors blend visually from a distance to create the illusion of forms, shapes, and outlines.

Portfolio. A comprehensive collection of student work.

Positive space. The space in a composition occupied by the subject or objects.

Primary colors. Red, yellow, blue.

Principles of design. Rhythm/movement, balance, unity/harmony, dominance/emphasis, repetition/pattern, proportion/scale, and contrast/variety.

Printmaking. The design and production of prints through a graphic art process. Processes may include intaglio, monoprint, silkscreen, stamp, engraving, lithograph, collograph, etc.

Process. A complex operation involving a number of methods or techniques, such as the addition and subtraction processes in sculpture, the etching and intaglio processes in printmaking, or the casting or construction processes in making jewelry.

Proportion. Scale or relationship of one part of a work of art to the other and to the whole.

- **Figure** (adult 7 1/2 heads high). Three and one-half heads from waist to top of head; four from waist to toes. Arms fall at mid thigh.
- **Portrait.** Eyes are one-half distance from top of head. Nose is one-half distance between eyes and chin. Mouth is one-half distance between nose and chin.

Radial balance. Type of balance in which forces or elements of a design come out from a central point.

Realism. A style of art that portrays people, objects, or places as we actually see them. Realistic art portrays lifelike colors, textures, shadows, proportions, and arrangements.

Repetition. A principle of design where a single element appears again and again. A technique for creating rhythm and unity.

Rhythm. Repetition of visual elements such as lines, shapes, or colors that may suggest movement.

Scale. Proportion.

Sculpture. Three-dimensional art forms created from processes of carving, modeling, and/or assemblage.

Secondary colors. Colors created by mixing two primary colors; orange, green, and violet.

Self-portrait. A rendering of the artist's own likeness.

Shade. A color with black added to it to change color value.

Shading. Gradation of tone or filling in areas through shadows.

Shape. Any two-dimensional area defined by line, color, tones, or edges.

Space. A perceived area or surface.

Spatial. Of, or existing, in space.

Split-complementary colors. A color and the two colors on either side of its complement on the color wheel.

Stained glass. Colored glass cut into pieces, arranged in a design, and joined with strips of lead.

Structures. Means of organizing the components of a work into a cohesive and meaningful whole, such as sensory qualities, organizational principles, expressive features, and functions of art.

Style. An artistic technique or way of expressing, using materials, constructing, or designing that is characteristic of an individual, group, period, or culture.

Subtractive sculpture. Process in which three-dimensional form is created by removing, cutting away, or carving out unwanted materials.

Symbol. Something that stands for, or represents, something else.

Synthesis. Combining of parts into a whole.

Tactile. Appealing to the sense of touch.

Techniques. Specific methods or procedures used in a larger process; for example, graduation of value or hue in painting, or conveying linear perspective through overlapping, shading, or varying size or color.

Technologies. Complex machines used in the study and creation of art, such as lathes, presses, computers, lasers, and video equipment.

Temporal. Worldly; or time; art enduring for a time.

Tertiary. The combination of a primary and a neighboring secondary color on the color wheel. Also known as intermediate colors.

Texture. The tactile quality of a surface. Actual - the physical roughness or smoothness of a surface. Simulated - the illusion of roughness or smoothness of a surface.

Theme. A subject or topic in artwork.

Three-dimensional form. Objects which have height, width, and depth.

Thumbnail sketches. Small drawings used to develop an idea or composition.

Timeline. Chart showing the chronological progression of art history.

Tint. A color with white added to raise or lighten its value.

Tone. Changes in intensity.

Triadic. The colors found on the color wheel which form an equilateral triangle.

Two-dimensional. Flat area having height and width but no actual depth.

Two-point perspective. Perspective viewed when an object is observed from an angle. There are two vanishing points.

Unity. A principle of design referring to the arrangement of a work in which all parts seem interrelated.

Value. The element of art that refers to the lightness or darkness of an object or color.

Value scale. Gradation of dark to light usually made on a scale of 1-10.

Variety. A principle of design concerned with difference or contrast.

Visual art. A broad category that includes the traditional fine arts such as drawing, painting, printmaking, sculpture; communication and design arts such as film, television, graphics, product design; architecture and environmental arts such as urban, interior, and landscape design; folk arts; and works of art such as ceramics, fibers, jewelry, works in wood, paper, and other materials.

Warm colors. Colors which appear to advance spatially in an art work and suggest a warm, hot, or active mood. Warm colors include reds, yellows, and oranges.

Introduction to Visual Arts Quality Core Curriculum Middle School Art

Content standards in the middle grades are designed to expand the students' knowledge of concepts and skills. Visual arts curriculum is designed to integrate with other disciplines at the middle school level and address the needs of learners with different social and cultural backgrounds. The curriculum reflects the adolescent's and preadolescent's need to develop collaborative and teamwork skills, technological competencies, flexible thinking, and appreciation for diversity.

Middle grades content standards are built upon the K-5 curriculum. Often, middle grades art programs are taught as six-, nine-, or 12-week rotations. Standards, therefore, are clustered to provide the middle grade teacher flexibility in presenting standards of different grade levels.

It is recommended that students who have not experienced formal visual arts education prior to the middle school experience use the K-5 content standards as a starting place, focusing on sequential order of content standards: criticism, art production, art history, and aesthetics.

Strand	Content Standard	Topic	Concept	Notes
--------	------------------	-------	---------	-------

Fine Arts: Visual Arts: Grade 6**Artistic Skills and Knowledge: Creating, Performing, Producing**

FAVA.6.1	Plans and creates artworks using the principles of design to organize the elements of art for creating a composition. (See Introduction: Matrix.)	Art Production	Creative Expression Through Art	
FAVA.6.2	Creates artworks to depict a mood, emphasize the effects of light as reflected off surfaces and within the atmosphere, or demonstrate proportion.	Art Production	Creative Expression Through Art	
FAVA.6.3	Uses art materials and techniques. (See Introduction: Matrix.)	Art Production	Art Materials and Tools	
FAVA.6.4	Produces interpretations of the same landscape in both atmospheric (aerial) and linear perspective.	Art Production	Spatial Techniques	
FAVA.6.5	Creates a series of artworks that is concerned with design and composition (Structuralism/ Formalism).	Art Production	Artistic Theory	
FAVA.6.6	Demonstrates proper care and safe use of art materials and tools.	Art Production	Maintenance and Safety	

Connections

FAVA.6.7	Applies concepts and ideas from another discipline and its topics as sources of ideas for own artworks. (See Introduction: Matrix.)	Interdisciplinary	Other Subject Relationships	
-----------------	---	-------------------	-----------------------------	--

Critical Analysis and Aesthetic Understanding

FAVA.6.8	Describes the properties of color (hue, value, and intensity) and the color schemes of monochromatic, analogous, and complementary.	Criticism	Color	
FAVA.6.9	Judges an artwork based on how successfully it expresses aspects of the society in which it was produced.	Aesthetics	Culture	

Strand	Content Standard	Topic	Concept	Notes
FAVA.6.10	Examines selected artworks based on questions related to art theories such as: Does the intent of the artwork seem to be to imitate? (Realism). Is the artwork primarily concerned with design or composition? (Structuralism/Formalism). Is the work trying to express a feeling or emotion? (Expressionism/Emotionalism).	Aesthetic	Artistic Theories	
FAVA.6.11	Compares and contrasts the features and characteristics of linear perspective and atmospheric (aerial) perspective in selected artworks.	Criticism	Spatial Techniques	
FAVA.6.12	Identifies the interrelationships between elements of art and the principles of design in artworks and the environment. (See Introduction: Matrix.)	Criticism	Elements of Art Principles of Design	
FAVA.6.13	Discusses how media used to create artworks (e.g., sculpture, drawing, painting, pottery, fiber arts, photography, video, and computer production) affects artistic expression.	Criticism	Media	
FAVA.6.14	Recognizes how artists use selected subject matter, including symbols or ideas, to communicate a message.	Criticism	Symbols	
FAVA.6.15	Describes the expressive quality (feeling/mood) of artworks.	Criticism	Expressive Qualities	
FAVA.6.16	Distinguishes between the art historian and the art critic citing their specific roles and functions within societies, past and present.	Criticism	Art Critic and Historian	

Historical and Cultural Context

FAVA.6.17	Locates, reads, and summarizes major points from historical accounts of artists and/or artworks indigenous to a specific culture.	Art History	Artists and Culture	
FAVA.6.18	Traces the development of selected art professions from past to present societies, such as painting, architecture, photography, printmaking, and graphic designing.	Art History	Artist's Role in Society	
FAVA.6.19	Uses timelines, graphs, and visuals to trace important historical developments of the Americas, Europe, and Oceania using indigenous artworks.	Art History	Art of the Americas, Europe, and Oceania

Georgia's Quality Core Curriculum

Technology/Career Education Grades 6-8

Introduction to Technology/Career Education

Quality Core Curriculum

6-12

The primary purpose of the revised Technology/Career QCC is to equip students with the academic, technical, and leadership skills that they will need to succeed in life. Through a partnership between education and industry, the Technology/Career curriculum will provide students with a solid foundation for their future careers.

Technology/Career education provides students with knowledge that enables them to continue learning on the postsecondary level and throughout their careers. The revised Technology/Career QCC facilitates development of programs of study that reflect career goals of individual students and incorporate current industry standards, high-level academic knowledge, and postsecondary requirements. The revised QCC also addresses the need to reinforce classroom skill development through participation in co-curricular vocational student organizations and structured work-based learning programs such as youth apprenticeship, internship, and cooperative education.

Because technology is evolving rapidly, the Technology/Career QCC standards are broadly based and permit development of curriculum that can be updated to meet changing industry standards. Each Technology/Career area has a common set of standards that address higher thinking, leadership, team cooperation, and other workplace readiness skills, as well as content standards specific to various occupational programs.

Georgia's Quality Core Curriculum

Agriculture Education Grade 6-8

Introduction to Agriculture Education Quality Core Curriculum

6-12

The Quality Core Curriculum (QCC) standards in Agriculture Education were revised with an emphasis on student needs based on changes in industry, education, and community needs and expectations. The Quality Basic Education Act charges the State Board of Education with establishing competencies that each student is expected to master and ensuring that each student has the opportunity to master them. The QCC standards in Agriculture Education were revised to meet these needs.

Local school systems are responsible for implementing the QCC according to state standards. Expansion and enrichment of this curriculum are needed to improve delivery and service to the students and community. The revision committee highly recommends the use of state-approved curriculum guides and course outlines in Agriculture Education to facilitate curriculum delivery.

PROCESS

The QCC revision process was started by establishing a framework for evaluating the QCC standards established in 1984. The committee set six relevant criteria for measuring proposed changes. Revisions to the QCC should:

- Reflect technological and biological advances in agricultural science, business, and industry
- Promote high academic achievement through application of basic academic skills
- Emphasize workplace competencies
- Reflect changes in the Agriculture Education program included in recent industry- validated curriculum guides
- Reflect Agriculture Education program philosophy, purpose, and goals
- Promote leadership development

A program outline was created as a foundation for review of the QCC standards. Using the program outline and the revision criteria, the committee reviewed and revised specific QCC statements.

CHANGES

Most changes in the QCC statements are in terminology and sequence. Additions to the QCC consist mostly of expansion of statements which give more and clearer emphasis to that area of curriculum. The use of technology was emphasized. Statements were written to promote the continuous incorporation and updating of technology in the curriculum. Statements regarding leadership and personal development, basic skills, and employability were expanded and clarified to promote greater emphasis in these areas. In addition these statements were considered important enough that they have been included in each subject area.

USE OF THE QCC

The QCC in Agriculture Education is organized by school level (high school and middle school) and into six major instructional areas identified by the State Department of Education:

- Agricultural Business Management
- Agricultural Mechanization and Technology
- Agricultural Production and Management
- Agriscience and Biotechnology
- Environmental Horticulture
- Conservation and Renewable Natural Resources

The QCC standards are arranged into a logical teaching and development sequence within these parameters. Each local school system is encouraged to build its curriculum in Agriculture Education through selection of subject and subject areas of instruction based on local community and student needs. Courses may be developed through adoption of the suggested QCC sequence or by using the eclectic approach based on local needs. Once course content has been determined using the QCC standards, a number of resources may be used to facilitate course development. These include state curriculum guides, textbooks, and industry-developed materials.

Georgia's Quality Core Curriculum

Grade 7

Georgia's Quality Core Curriculum

Language Arts Grade 7

Introduction to Language Arts Quality Core Curriculum K-12

The Quality Core Curriculum (QCC) originated in 1984 with a recommendation for review every five years. In 1996, teachers, administrators, parents, and business leaders throughout the state reviewed and analyzed the existing Quality Core Curriculum. The QCC revision process was an effort to update the curriculum, to reflect technological advances, and to create a more effective base for teaching. The Language Arts revision team refined the existing QCC Language Arts objectives to enhance clarity, accessibility, K-12 coordination, and academic excellence.

In order to promote these elements, the Language Arts revision team established a K-8 matrix that includes 9-12 core skills. The matrix is designed to provide a scope and sequence for the revised Language Arts QCC.

The revision team recommends that every Language Arts teacher receive a copy of the revised standards in order to implement the scope and sequence of the Language Arts content standards. Standards can be measured and taught by a variety of instructional strategies which actively engage and meet the needs of all students. The revision team sincerely desires that this QCC be a practical and valuable guide for Language Arts instruction in Georgia.

Oral Communication
Listening/Speaking

The Student:	K	1	2	3	4	5	6	7	8	9_12
Listens and speaks in informal conversations with peers and adults.	*									
Adapts or changes oral language to fit the situation by following the rules of conversation with peers and adults.										
Listens to a variety of literary forms, including stories and poems.	*	*	*	*	*	*	*	*	*	*
Listens and responds to a variety of literary forms.				*	*					
Listens and responds to a variety of literary forms including prose, poetry, and drama.						*	*	*	*	*
Follows one- and two-part oral directions.	*									
Follows two- and three-part oral directions.		*								
Follows three-part oral directions.			*							
Follows multiple oral directions.				*	*	*				
Follows oral directions and asks questions for clarification.							*	*	*	*

* Standards will be reinforced as necessary each subsequent year

Oral Communication
Listening/Speaking

The Student:	K	1	2	3	4	5	6	7	8	9	12
Repeats auditory sequences: letters, words, numbers, and rhythmic patterns.	*										
Recognizes rhyming words.	*										
Recites short poems, rhymes, songs, and stories with repeated patterns.	*										
Participates in choral speaking and creative drama.	*										
Recalls information presented orally.		*									
Recalls and interprets information presented orally.			*								
Uses oral language for different purposes: to inform, to persuade, and to entertain.			*	*	*	*	*	*	*	*	*
Recalls, interprets, and summarizes information presented orally.				*	*	*	*	*	*	*	*
Delivers a planned oral presentation.						*	*	*	*	*	*
Adjusts manner and style of speaking to suit an audience and situation.						*	*	*	*	*	*

• Standards will be reinforced as necessary each subsequent year

Language Arts

QCC Scope and Sequence

Oral Communication

Listening/Speaking

The Student:	K	1	2	3	4	5	6	7	8	9_12
Speaks so others can hear and understand.										*
Defends conclusions rationally.										*
Paraphrases and discusses information.						*	*	*	*	*
Summarizes and/or records orally presented information.						*	*	*	*	*
Interprets the meaning of questions in order to give an appropriate response.	*									
Responds to questions on orally presented materials.			*							
Responds appropriately to various types of questions on orally presented material.				*						
Responds to literal, inferential, and evaluative questions on orally presented material.					*	*	*	*	*	*
Increases vocabulary to reflect a growing range of interests and knowledge.	*	*	*	*	*	*	*	*	*	*

* Standards will be reinforced as necessary each subsequent year

Oral Communication
Listening/Speaking

The Student:	K	1	2	3	4	5	6	7	8	9	12
Communicates effectively when using descriptive language, relating experiences, and retelling stories.	*										
Communicates effectively when using descriptive language, relating experiences, and retelling stories read, heard, or viewed.		*	*	*	*	*	*	*	*	*	*
Uses a variety of language patterns and sentence structures.		*	*								
Uses increasingly complex sentence structures in oral communication.			*	*	*	*					
Determines the literal and figurative meaning of words.					*	*					
Demonstrates an understanding of words and ideas when heard in context.		*									
Determines the meaning of a word based on how it is used in an orally presented sentence.			*	*	*						
Adjust manner and style of speaking to suit an audience and situation.						*	*	*	*	*	*

* Standards will be reinforced as necessary each subsequent year

Oral Communication
Listening/Speaking

The Student:	K	1	2	3	4	5	6	7	8	9_12
Uses grade/age appropriate standard American English when communicating orally.			*	*	*	*				
Paraphrases and discusses information.						*	*	*	*	
Begins to discriminate between spoken words and sentences.	*									
Summarizes and/or records orally presented information.							*	*	*	
Blends sounds orally to make words.	*	*	*	*						
Divides words into syllables.		*	*	*						
Participates in oral presentations.							*	*	*	*
Participates in dramatic activities such as puppetry, pantomime, plays, choral speaking, and expressions.							*	*	*	
Develops awareness of nonverbal communication such as gestures, body language, and facial expressions.										
Uses standard conventions of American English in appropriate settings.							*	*	*	*

• Standards will be reinforced as necessary each subsequent year

Oral Communication
Listening/Speaking

The Student:	K	1	2	3	4	5	6	7	8	9	12
Listens and responds to various language patterns and literary forms including regional examples (dialect).							*	*	*		
Responds to literal, inferential, and critical questions.							*	*	*	*	
Determines the denotative and connotative meanings of words in oral context.							*	*	*	*	
Records orally presented information (note-taking).							*	*	*	*	
Critically responds to various media. Evaluates messages and effect of mass media.							*	*	*	*	

• Standards will be reinforced as necessary each subsequent year

Written Communication
Reading

The Student:	K	1	2	3	4	5	6	7	8	9_12
Recognizes own name in print.	*									
Recognizes words in familiar contexts.	*									
Recognizes common signs and logos.	*									
Holds print materials in correct position.	*									
Demonstrates left-to-right and top-to-bottom progression.	*									
Discriminates visual similarities and differences in words.	*									
Distinguishes between written letters, words, and sentences.	*									
Identifies upper- and lower-case letters of the alphabet out of sequence.	*									
Associates sounds with letters.	*									
Verbalizes consonant sound when shown the consonant letter.	*									
Recognizes rhyming words (e.g., CVC words, word families, etc.).	*									

• Standards will be reinforced as necessary each subsequent year

Written Communication
Reading

The Student:	K	1	2	3	4	5	6	7	8	9	12
Reads selected sight words.	*										
Recalls orally a series of three visually presented items.	*										
Uses words that signal sequence relationships such as first, next, and last.	*										
Classifies by characteristics such as color, size, shape, structure, and function.	*										
Sequences pictures to tell a story.	*										
Interprets pictures to identify main idea, sequence of events, cause/effect, and prediction of logical outcomes.	*										
Demonstrates an understanding that print makes sense by reading and explaining own writings and drawings.	*										
Increases vocabulary to reflect a growing range of interests and knowledge.	*	*	*	*	*	*	*	*	*	*	*

* Standards will be reinforced as necessary each subsequent year

Written Communication
Reading

The Student:	K	1	2	3	4	5	6	7	8	9_12
Distinguishes between letter/word, word/sentence, left/right, and beginning/ending of words and sentences.	*									
Classifies and categorizes words into sets and groups with common characteristics.	*	*	*	*	*	*	*	*	*	
Follows written directions.			*	*	*	*	*	*	*	*
Reads a variety of materials for information and pleasure.			*	*	*	*	*	*	*	*
Reads for a variety of purposes in different kinds of texts.				*	*	*	*	*	*	*
Applies phonetic strategies to read by:										
Using initial consonant substitution in rhyming words and word families.	*									
Using beginning, medial, and ending consonants to orally decode one and two syllable words.	*									
Using short, long, and "r" controlled vowel sounds to orally decode one and two syllable words.	*									
Using consonant blends and diagraphs to orally decode one- and two-syllable words.	*									

• Standards will be reinforced as necessary each subsequent year

Written Communication
Reading

The Student:	K	1	2	3	4	5	6	7	8	9_12
Applies phonetic strategies to read by:										
Using initial consonant substitution in rhyming words and word families.		*	*	*	*	*				
Using beginning, medial, and ending consonants to orally decode words.			*	*	*	*				
Using short, long, and "i" controlled vowel sounds to orally decode words.			*	*	*	*				
Using consonant blends, digraphs, and diphthongs to orally decode words.			*	*	*	*				
Uses word order and sentence structure to read. (Syntax- "Does it sound right?")		*	*	*	*	*	*	*	*	
Demonstrates an understanding of semantic relationships by using pictures, using context clues, word meanings, and prior knowledge in reading. (Semantics - "Does it make sense?")		*								
Demonstrates an understanding of semantic relationships by using context clues, word meanings, and prior knowledge in reading. (Semantics - "Does it make sense?")			*	*	*	*	*	*	*	*
Increases existing sight vocabulary (instant recognition).		*	*	*	*	*	*	*	*	*

• Standards will be reinforced as necessary each subsequent year

Written Communication
Reading

The Student:	K	1	2	3	4	5	6	7	8	9_12
Integrates language structure (syntax), meaning clues (semantics), phonetic strategies, and sight vocabulary when reading orally and silently.	*	*	*	*	*	*	*	*	*	*
Reads with fluency and expression.	*	*	*	*	*	*	*	*	*	*
Recognizes EXPLICIT main ideas, details, sequence of events, cause-effect relationships in fiction and nonfiction.	*	*	*	*	*	*	*	*	*	*
Recognizes IMPLICIT main ideas, details, sequence of events, and cause/effect relationships in fiction and nonfiction.	*	*	*	*	*	*	*	*	*	*
Identifies the main characters.	*	*	*	*	*	*	*	*	*	*
Identifies the characters' actions, motives, emotions, traits, and feelings.	*	*	*	*	*	*	*	*	*	*
Draws conclusions and makes predictions and comparisons.	*	*	*	*	*	*	*	*	*	*
Draws conclusions, makes predictions, compares/contrasts, and makes generalizations.	*	*	*	*	*	*	*	*	*	*

- Standards will be reinforced as necessary each subsequent year

Written Communication
Reading

The Student:	K	1	2	3	4	5	6	7	8	9_12
Reads for understanding and rereads as needed for clarification, self-correction, and further comprehension.		*	*	*	*	*	*	*	*	*
Distinguishes between fact and opinion.					*	*	*	*	*	*
Demonstrates comprehension when reading a variety of literary forms (e.g., fiction, nonfiction, poetry, and drama).		*	*	*	*	*	*	*	*	*
Recognizes and reads compound words, contractions, possessives, and words containing the suffixes "ing," "ed," "s," and "es."		*	*	*	*	*				
Uses knowledge of root words, prefixes, and suffixes in word recognition.		*	*	*	*	*	*	*	*	*
Recognizes simple word opposites.	*	*	*							
Uses knowledge of synonyms, antonyms, and homophones when reading.				*	*	*	*	*	*	*
Identifies story development, author's purpose, and point of view.						*	*	*	*	*

* Standards will be reinforced as necessary each subsequent year

Written Communication
*Reading***Language Arts**
QCC Scope and Sequence

The Student:	K	1	2	3	4	5	6	7	8	9_12
Uses context clues to determine meaning of unknown words.							*	*	*	*
Adjusts reading speed according to purpose and rereads for comprehension.							*	*	*	*
Recognizes persuasion techniques in propaganda and advertising.							*	*	*	*

• Standards will be reinforced as necessary each subsequent year

Language Arts
QCC Scope and Sequence

Written Communication
Literature

The Student:	K	1	2	3	4	5	6	7	8	9_12
Experiences traditional and contemporary literature through a variety of media.	*	*	*	*	*	*	*	*	*	*
Responds to literal, inferential, and evaluative questions about literature.	*	*	*	*	*	*	*	*	*	*
Responds appropriately to questions about author's purpose, techniques, character development, and plot structure.					*	*	*	*	*	*
Demonstrates an interest in various types of self-selected literature through daily reading.		*	*	*	*	*	*	*	*	*
Identifies literary forms (e.g., fiction, nonfiction, poetry, and drama).		*	*	*	*	*				
Recognizes various forms of literature (short stories, novels, epics, poems, dramas, folk tales, essays, and myths).							*	*	*	*
Discriminates between realism and fantasy.		*	*	*						
Distinguishes between fact and opinion.					*	*	*	*	*	*

* Standards will be reinforced as necessary each subsequent year

Written Communication
Literature

The Student:	K	1	2	3	4	5	6	7	8	9_12
Recognizes cultural diversity represented in literature.	*	*	*	*	*	*	*	*	*	*
Responds to literal, inferential, and critical questions about literature.							*	*	*	*
Recognizes bias and stereotypes.							*	*	*	*
Recognizes relevance of data.							*	*	*	*
Interprets written instructions and other directive information.							*	*	*	*
Applies reading strategies to specific content and subject matter.							*	*	*	*
Identifies literary elements and techniques such as plot, setting, theme, characters, characterization, conflict, figurative language, and point of view.							*	*	*	*
Recognizes common elements of poetry (rhyme, rhythm, stanza, figurative language, etc.).							*	*	*	*
Experiences traditional and contemporary literature through a variety of media.							*	*	*	*

• Standards will be reinforced as necessary each subsequent year

Written Communication
Literature

The Student:	K	1	2	3	4	5	6	7	8	9_12
Recognizes writer's purpose in fiction and nonfiction.							*	*	*	*
Recognizes cultures and values represented in literature.							*	*	*	*
Recognizes that literature reflects human experience.							*	*	*	*
Responds creatively to literature, drama, art, and multimedia projects.							*	*	*	*
Identifies and chooses literature according to personal interests.							*	*	*	*

* Standards will be reinforced as necessary each subsequent year

Written Communication
Writing

The Student:	K	1	2	3	4	5	6	7	8	9_12
Dictates information for experience stories.	*									
Uses examples from literature to create individual and group stories.	*	*	*	*	*	*	*	*	*	
Draws pictures and/or uses letters and phonetically spelled words to write about experiences, stories, people, objects, or events.	*									
Uses correct spelling for frequently used sight vocabulary.		*	*	*	*	*	*	*	*	*
Uses learned phonetic strategies to spell correctly.		*	*	*	*	*				
Writes a minimum of three sentences about a topic.		*	*							
Writes a short paragraph about a topic.				*						
Writes selections (compositions) of three or more paragraphs about a topic.					*	*	*	*	*	*

• Standards will be reinforced as necessary each subsequent year

Written Communication
Writing

The Student:	K	1	2	3	4	5	6	7	8	9_12
Writes about self-selected topics (e.g., personal experiences, book rewrites) using pictures, letter/sound associations, and known words.	*	*								
Writes about self-selected topics.				*	*	*	*	*	*	*
Writes in a variety of genres to produce paragraphs and compositions:										
Personal narratives				*	*	*	*	*	*	*
Imaginative stories				*	*	*	*	*	*	*
Responses to literature				*	*	*	*	*	*	*
Content area pieces				*	*	*	*	*	*	*
Correspondence (including writing letters and addressing envelopes).			*	*	*	*	*	*	*	*
Expository Pieces					*	*	*	*	*	*
Persuasive Pieces						*	*	*	*	*
Applies correct principles of grammar:										
Writes complete sentences			*							*
Uses correct capital letters			*							*
Uses correct punctuation			*							*
Applies correct rules of usage and expression.			*							*
Applies correct principles of grammar, parts of speech, usage, and mechanics:										
Writes complete sentences				*						*
Uses correct capitalization and punctuation				*						*

• Standards will be reinforced as necessary each subsequent year

Written Communication
Writing

The Student:	K	1	2	3	4	5	6	7	8	9_12
Uses correct word structure				*						*
Identifies types of sentences according to purpose: declarative, interrogative, imperative, and exclamatory				*						
Identifies the parts of a sentence in various sentence patterns (simple subject and predicate).				*						
Forms singular, plural, and possessive nouns.				*						
Applies standard conventions of American English in subject-verb agreement				*						*
Demonstrates knowledge of nouns, pronouns, verbs, and adjectives in writing simple sentences				*						
Applies correct principles of grammar, parts of speech, usage, and mechanics. (See also: reference to Grammar and Usage strand.)					*	*	*	*	*	*
Communicates ideas by using the writing process:										
PREWRITING										
Generates ideas	*	*	*	*	*	*	*	*	*	*
DRAFTING										
Focuses on topic	*	*	*	*	*	*	*	*	*	*
Uses prewriting ideas to complete first draft	*	*	*	*	*	*	*	*	*	*

• Standards will be reinforced as necessary each subsequent year

Language Arts

Written Communication
Writing

The Student:	K	1	2	3	4	5	6	7	8	9_12
REVISING										
Expands use of descriptive words	*	*	*	*	*	*	*	*	*	*
Improves sequence		*	*	*	*	*	*	*	*	*
Adds variety of sentence types		*	*	*	*	*	*	*	*	*
Organizes writing to include a clear beginning, middle, and ending.		*	*	*	*	*	*	*	*	*
EDITING										
Begins each sentence and proper noun with a capital letter	*	*	*	*	*	*	*	*	*	*
Uses correct spelling	*	*	*	*	*	*	*	*	*	*
Uses appropriate punctuation	*	*	*	*	*	*	*	*	*	*
Uses complete sentences	*	*	*	*	*	*	*	*	*	*
PUBLISHING										
Shares writing with others.	*	*	*	*	*	*	*	*	*	*
Increases writing vocabulary.					*	*	*	*	*	*
Uses descriptive words and phrases.					*	*	*	*	*	*
Uses various organizational strategies, styles, and purposes.					*					
Experiments with organization, style, purpose, and audience.							*	*	*	*
Uses available technology to assist in writing.		*	*	*	*	*	*	*	*	*
Uses left to right pattern of writing.	*									

* Standards will be reinforced as necessary each subsequent year

Written Communication
Writing

The Student:	K	1	2	3	4	5	6	7	8	9	12
Prints name, self-selected words, and letters of the alphabet.	*										
Copies simple shapes, designs, numerals, and letters.	*										
Prints legibly:											
Correctly forms letters and numbers;		*	*								
Correctly spaces words and sentences.		*	*								
Begins to recognize cursive letters.			*								
Writes legibly:											
Correctly forms letters and numbers				*	*	*	*	*	*		
Correctly spaces words and sentences				*	*	*	*	*	*		
Writes paragraphs that include a unifying idea, a topic sentence, supporting sentences and details, and clincher sentence.											*

• Standards will be reinforced as necessary each subsequent year

Written Communication
Writing

The Student:	K	1	2	3	4	5	6	7	8	9_12
Uses various types of writing (personal, academic, business, and vocational).							*	*	*	*
Uses dialogue in writing.							*	*	*	*
Composes and revises using a computer.										*

• Standards will be reinforced as necessary each subsequent year

Written Communication
Grammar and Usage

The Student:	K	1	2	3	4	5	6	7	8	9_12
Identifies the types of sentences according to purpose: declarative, interrogative, imperative, and exclamatory.					*	*	*	*	*	
Identifies at least five parts of speech, including nouns, verbs, pronouns, adjectives, and adverbs.					*	*				
Identifies the eight parts of speech and their uses in a sentence.						*	*	*	*	
Identifies the parts of a sentence in various sentence patterns:										
subjects (simple and compound)					*					
predicates (simple and compound)					*					
modifiers					*					
Identifies the parts of a sentence in various sentence patterns:										
subject (simple and compound)						*	*	*	*	
predicates (simple and compound)						*	*	*	*	
modifiers (words and prepositional phrases)						*	*	*	*	
complements (predicate adjectives, predicate nominative, direct objects)							*	*	*	
Forms singular, plural, and possessive nouns.					*	*	*	*	*	*

• Standards will be reinforced as necessary each subsequent year

Written Communication
Grammar and Usage

The Student:	K	1	2	3	4	5	6	7	8	9	12
Identifies principal parts and tenses of regular and irregular verbs.					*	*	*	*	*		
Identifies types of pronouns: subject, object, possessive.					*	*	*	*	*		
Writes simple and compound sentences and avoids fragments and run-on sentences.					*	*	*	*	*	*	*
Applies standard conventions of American English in:											
Subject-verb agreement					*	*	*	*	*	*	*
Cases of personal pronouns					*	*	*	*	*	*	*
Principal parts of verbs					*	*	*	*	*	*	*
Comparisons of adjectives and adverbs					*	*	*	*	*	*	*
Pronoun/Antecedent							*	*	*	*	*
Applies standard rules of capitalization.					*	*	*	*	*	*	*
Applies standard rules of punctuation.					*	*	*	*	*	*	*
Spells frequently used words correctly and applies common spelling rules.					*	*	*	*	*	*	*
Identifies types of pronouns such as personal, interrogative, demonstrative.							*	*	*	*	*

• Standards will be reinforced as necessary each subsequent year

Written Communication
Grammar and Usage

The Student:	K	1	2	3	4	5	6	7	8	9_12
Writes simple and compound sentences and avoids run-ons and nonfunctional fragments.							*	*	*	*
Combines sentences using coordination (i.e., compound sentences).							*	*	*	*

- Standards will be reinforced as necessary each subsequent year

Written Communication
Reference-Study

The Student:	K	1	2	3	4	5	6	7	8	9	12
Explores the uses of the media center, picture books, audiovisual resources, and available technology for reading and writing.	*										
Alphabetizes words to the first letter.	*										
Alphabetizes words to the second letter.			*								
Alphabetizes words to the third letter.				*							
Uses alphabetical order to locate information.					*	*	*	*	*	*	
Uses picture dictionaries as information sources.	*										
Uses beginning dictionaries as information sources.			*								
Uses abridged dictionaries to identify appropriate word meanings or correct spellings.				*	*						
Uses dictionaries, thesauri, atlases, almanacs, periodicals, and encyclopedias, to locate information.						*	*	*	*	*	

* Standards will be reinforced as necessary each subsequent year

Written Communication
Reference-Study

The Student:	K	1	2	3	4	5	6	7	8	9_12
Uses guide words to locate words in dictionaries and topics in encyclopedias.			*							
Uses guide words in dictionaries, encyclopedias, etc., as aids for finding information.				*						
Uses guide words to locate information.					*	*	*	*	*	
Determines appropriate resource to answer specific questions.					*					
Locates information using the appropriate reference resources.						*	*	*	*	*
Recognizes the organization of fiction and nonfiction books in the media center.		*	*	*						
Uses call numbers to locate information in the media center.					*					
Recognizes the author, illustrator, and title as identifying items of information about a book.		*								
Recognizes the purpose of the title page and the table of contents.		*								

* Standards will be reinforced as necessary each subsequent year

Written Communication
Reference-Study

The Student:	K	1	2	3	4	5	6	7	8	9	12
Uses book parts including the title page, table of contents, and glossary as information sources.			*								
Uses book parts including title page, table of contents, index and glossary as information sources.				*	*						
List sources from which information is gathered, including author, title, publisher/producer, place of publication and copyright date.					*	*	*	*	*	*	*
Uses easy fiction books, nonfiction books, various audiovisual resources, and software as information sources.		*									
Uses easy fiction books, nonfiction books, audiovisual resources and software, and periodicals as information sources.			*								
Uses various sources (e. g., periodicals, audiovisuals, software, encyclopedias) for information.				*	*						

• Standards will be reinforced as necessary each subsequent year

Written Communication
Reference-Study

The Student:	K	1	2	3	4	5	6	7	8	9_12
Begins the research process by selecting topic, formulation questions, and identifying key words about a chosen topic.				*						
Skims material to locate specific information.				*						
Develops a simple outline from a short selection.					*	*	*	*	*	
Uses cross reference in multiple types of sources.						*	*	*	*	
Uses the media center and available technology as sources of information and pleasure.		*	*	*	*	*	*	*	*	*
Recognizes differences in paraphrasing, summarizing, and plagiarizing.							*	*	*	
Recognizes organizational systems used for collections or reference sources.							*	*	*	

• Standards will be reinforced as necessary each subsequent year

Written Communication
Reference-Study

The Student:	K	1	2	3	4	5	6	7	8	9	12
Uses research process by:											
-Choosing topic					*	*	*	*	*	*	*
-Formulating questions					*	*	*	*	*	*	*
-Identifying key words					*	*	*	*	*	*	*
-Selecting sources					*	*	*	*	*	*	*
-Skimming					*	*	*	*	*	*	*
-Paraphrasing					*	*	*	*	*	*	*
-Taking notes					*	*	*	*	*	*	*
-Organizing					*	*	*	*	*	*	*
-Presenting					*	*	*	*	*	*	*
Selects appropriate sources (data base, electronic multi-media, technologies, microforms, interview, general and specific references, community resource files, and periodical index) for a given topic.							*	*	*	*	*
Analyzes information to determine relevance to topic.							*	*	*	*	*
Retrieves information on a single topic from multiple types of sources (periodicals, indices, almanacs, general and specialized materials, electronic multi-media technologies, microforms, and data bases).							*	*	*	*	*

• Standards will be reinforced as necessary each subsequent year

Written Communication
Reference-Study

The Student:	K	1	2	3	4	5	6	7	8	9_12
Selects main ideas and supporting details from two or more sources and creates an outline.							*	*	*	
Documents sources with reference citations (bibliography or footnotes).							*	*	*	*
Uses a study technique:										
PQRST (preview, question, read, study, test)					*	*	*	*	*	
SQ3R (survey, question, read, review, report)					*	*	*	*	*	
PQ4R (preview, question, research, read, review, report)					*	*	*	*	*	
4R (research, read, review, report)					*	*	*	*	*	
Develops strategies for taking tests in different formats (multiple choice, sentence completion, essays, etc.).							*	*	*	
Works as a team to solve problems.										*

* Standards will be reinforced as necessary each subsequent year

Introduction to Language Arts Quality Core Curriculum

6-8

As a part of the Quality Core Curriculum (QCC) revision process, language arts teachers, school administrators, college professors, and business leaders from across Georgia reviewed and revised the language arts curriculum in grades K-12. The team was subdivided into three groups, K-5, 6-8, and 9-12. Careful consideration was given to every content standard, and the committees reached consensus about the inclusion and wording of each one.

Three points are noteworthy about the standards in grades 5-8. One, to ensure a thorough foundation of knowledge for high school, content standards have been deliberately repeated and spiraled from one grade level to the next. Two, a seventh strand, grammar and usage, has been added to the six existing strands. Three, technology has been incorporated in all appropriate objectives.

The intent of the committee has been to produce a curriculum document that is readable, concise, measurable, sequential, achievable, and most of all, usable. The document allows teachers to make implementation decisions on a local level for the improvement of education of Georgia's students.

Strand	Content Standard	Topic	Concept	Notes
--------	------------------	-------	---------	-------

Language Arts: Grade 7**Grammar and Usage**

LA.7.1	Writes sentences according to purpose: declarative, interrogative, imperative and exclamatory.			
LA.7.2	Recognizes the function of the eight parts of speech in sentences.			
LA.7.3	Identifies the parts of a sentence in simple and compound sentences: -subject -predicates -complements (predicate adjectives, predicate nominative, direct objects, indirect object) -modifiers (words and phrases)			
LA.7.4	Forms singular, plural, and possessive nouns.			
LA.7.5	Uses principal parts to form tenses of regular and irregular verbs.			
LA.7.6	Identifies types of pronouns such as personal, interrogative, demonstrative, and indefinite.			
LA.7.7	Writes simple and compound sentences and avoids run-on sentences and nonfunctional fragments.			
LA.7.8	Combines sentences using coordination (i.e., compound sentences).			
LA.7.9	Applies standard rules of capitalization.			
LA.7.10	Applies standard rules of punctuation.			
LA.7.11	Spells frequently used words and applies common spelling rules.			

Strand	Content Standard	Topic	Concept	Notes
--------	------------------	-------	---------	-------

LA.7.12

Applies standards of American English to:
-subject-verb agreement
-cases of personal pronouns
-pronoun/antecedent agreement
-principal parts of verbs
-comparisons of adjectives and adverbs.

Listening**LA.7.13**

Expands listening vocabulary.

LA.7.14

Follows oral directions and asks questions for clarification.

LA.7.15

Listens and responds to various forms of literature such as prose, poetry, and drama.

LA.7.16

Demonstrates an awareness of and appreciation for the richness and diversity of language.

LA.7.17

Determines the denotative and connotative meanings of words.

LA.7.18

Records, summarizes, organizes, interprets, compares, and contrasts information presented orally.

LA.7.19

Evaluates messages and effects of mass media (newspaper, television, radio, film, and periodicals).

LA.7.20

Interprets literal, inferential, and critical questions.

Literature**LA.7.21**

Recognizes various literary forms (short stories, novels, epics, poems, dramas, essays, and myths).

LA.7.22

Interprets literal, inferential, and critical questions about literature.

BEST COPY AVAILABLE

Strand	Content Standard	Topic	Concept	Notes
LA.7.23	Interprets literary elements and techniques such as plot, setting, theme, characters, characterization, conflict, figurative language, and point of view.			
LA.7.24	Interprets elements of poetry such as rhyme, rhythm, stanza, personification, simile, metaphor, and alliteration.			
LA.7.25	Experiences traditional and contemporary literature through a variety of media.			
LA.7.26	Explains differences between fiction and nonfiction.			
LA.7.27	Describes cultures and values represented in literature.			
LA.7.28	Describes the influences of human experiences on literary works.			
LA.7.29	Responds creatively to literature (e.g., drama, art, and multi-media projects).			
LA.7.30	Identifies and chooses literature according to personal interests.			
Reading				
LA.7.31	Reads a variety of materials for information and pleasure.			
LA.7.32	Expands reading vocabulary.			
LA.7.33	Applies word recognition strategies (e.g., affixes, roots, compound words) to acquire new vocabulary.			
LA.7.34	Uses context clues to determine meanings of unknown words.			
LA.7.35	Interprets literal and nonliteral meanings of words and phrases.			

Strand	Content Standard	Topic	Concept	Notes
--------	------------------	-------	---------	-------

L.A.7.36	Recognizes semantic and syntactic relationships.			
L.A.7.37	Adjusts reading speed according to purpose and rereads for comprehension.			
L.A.7.38	Interprets written instructions.			
L.A.7.39	Recognizes explicit and implicit main ideas, details, sequence of events, and cause-effect relationships.			
L.A.7.40	Makes comparisons, predictions, and generalizations and draws conclusions.			
L.A.7.41	Recognizes relevance of data.			
L.A.7.42	Recognizes persuasion techniques, propaganda, bias, and stereotyping.			
L.A.7.43	Applies reading strategies to specific content and subject matter.			
L.A.7.44	Explains difference between fact and opinion.			
L.A.7.45	Explains difference between fiction and nonfiction.			

Reference and Study Skills

L.A.7.46	Paraphrases and summarizes information without plagiarizing.			
L.A.7.47	Locates and uses information in card catalogs periodical indices, microforms, and multi-media electronic technologies.			
L.A.7.48	Gathers information by interviewing.			

BEST COPY AVAILABLE

Strand	Content Standard	Topic	Concept	Notes
L.A.7.49	Uses a research process that includes selecting a topic, formulating questions, identifying key words, choosing sources, skimming, paraphrasing, note-taking, summarizing, and presenting.			
L.A.7.50	Selects relevant information about a subject from various sources.			
L.A.7.51	Selects main ideas and supporting details from multiple sources and creates an outline.			
L.A.7.52	Documents sources with reference citations.			
L.A.7.53	Organizes retrieved information using strategies such as note-taking, graphic organizers, SQ3R (Survey, Question, Read, Review, Report), and outlining.			
L.A.7.54	Develops strategies for taking tests in different formats (e.g., multiple choice, sentence completion, or essay).			
L.A.7.55	Uses the media center as a source of information and pleasure.			
Speaking				
L.A.7.56	Expands speaking vocabulary.			
L.A.7.57	Communicates effectively through oral expression.			
L.A.7.58	Adjusts manner and style of speaking to suit audience and situation.			
L.A.7.59	Demonstrates a sense of audience in preparing and delivering oral presentations.			
L.A.7.60	Makes presentations from prepared materials.			
			BEST COPY AVAILABLE	385

384

Strand	Content Standard	Topic	Concept	Notes
--------	------------------	-------	---------	-------

LA.7.61

Participates in dramatic activities such as puppetry, pantomime, plays, choral speaking, and storytelling.

LA.7.62

Recognizes importance of nonverbal cues such as body language, facial expressions, and gestures and uses them effectively.

LA.7.63

Uses standards of American English in appropriate settings.

Writing

LA.7.64

Uses a writing process that includes prewriting, drafting, revising, editing (can include peer editing), proofreading, and publishing.

LA.7.65

Writes paragraphs that include a unifying idea and supporting details (may include topic sentence and clincher sentence).

LA.7.66

Uses transitions within and between paragraphs.

LA.7.67

Produces paragraphs and compositions for a variety of purposes (exposition, description, narration, and persuasion).

LA.7.68

Expands writing vocabulary.

LA.7.69

Writes with organization, style, and sense of audience.

LA.7.70

Produces various types of writing (personal, business, academic, and vocational).

LA.7.71

Uses descriptive words and phrases.

LA.7.72

Uses dialogue in writing.

Georgia's Quality Core Curriculum

Mathematics Grade 7

Introduction to Mathematics Quality Core Curriculum

6-8

The Mathematics Quality Core Curriculum (QCC) presents a vision of mathematics that is designed to meet the diverse needs of students in every Georgia school system. The QCC represents high academic standards across a broad spectrum of mathematical topics. It establishes the basis for a challenging program of study that will increase student achievement in mathematics. The QCC content standards may be expanded and enhanced at the discretion of local school systems, but may not be deleted or replaced.

The vision of the Mathematics QCC is that Georgia's students will be *avid mathematical problem solvers*, will *communicate mathematically* (listen, speak, read, write, and reflect), will *reason mathematically* using basic and higher-order thinking skills concurrently, and will *make connections* within mathematics and with other disciplines. The common strands - Problem Solving, Computation & Estimation, Number & Number Relationships, Number Systems & Number Theory, Geometry, Measurement, Statistics, Probability, Patterns & Functions, and Algebra - are integrated throughout the curriculum to provide cohesion and continuity and to ensure smooth transitions throughout the K-12 curriculum.

The content standards in the Mathematics 6-8 QCC are categorized by these strands. Some content strands relate to all strands, and are listed first at each grade level. Then, for convenience, the strands are listed alphabetically with their corresponding content standards.

The Mathematics QCC is designed to support teachers as they instructionally maximize each student's mathematical experiences. Teachers are urged to provide opportunities for upward movement through the curriculum, so that students are not restricted to their current grade level. Knowledge acquisition requires a transition from concrete, through pictorial, to abstract for all students at all levels and ages. The use of concrete objects (manipulatives) and visual models is vital for students to understand concepts and explore processes.

Incorporating technology into instruction is imperative in order to empower Georgia students to keep pace with the information age and to be competitive in the job market; it will enhance and provide flexibility in the learning process. Scientific calculators and computers are essential tools for learning and doing mathematics at all grade levels. Students should be able to solve practical problems, investigate patterns, explore strategies, and focus on the process of solving problems rather than on tedious computation unrelated to applications.

Communication is a vital link in the QCC. Thinking, speaking, writing, and applying mathematics are invaluable assets. Teaching students these skills can be facilitated through questioning, discussions, reports, projects, journals, oral presentations, experiments, summarizing collected data, and hypothesizing. Collectively, these experiences help students make transitions from informal, intuitive ideas to more abstract and symbolic mathematical language. Reading, writing, and discussing mathematics promote clarity of thought and facilitate deeper understanding of concepts and ideas. Students will improve and gain confidence in their own abilities to explain, defend, and make conjectures.

The middle school curriculum has been reviewed and revised to ensure that students completing the eighth grade will have had the content necessary for success in Algebra I. The content of the high school prealgebra course is now incorporated throughout the middle school curriculum, with major emphasis in the eighth grade.

The Mathematics QCC Revision Team has carefully considered and incorporated the curriculum standards proposed by national and state initiatives, as well as revision evaluation suggestions made by thousands of Georgians. This process served as an invaluable resource in guiding efforts to provide a quality and competitive education for Georgia's children.

Strand	Content Standard	Topic	Concept	Notes
--------	------------------	-------	---------	-------

Mathematics: Grade 7

All Strands: Problem Solving; Algebra; Computation & Estimation; Geometry; Measurement; Number & Number Relationships; Number Systems & Number Theory; Patterns & Functions; Probability; Statistics

M.7.1

Solves problems, reasons, and estimates throughout mathematics.

- Selects and uses problem-solving strategies such as reading the problem, drawing a picture or diagram, using trial and error, making a table or chart, looking for patterns, making a simpler problem and then generalizing, working backwards, etc.
- Selects and uses appropriate tools (such as mental computation, calculators, manipulative materials, paper and pencil, computer) in solving problems.
- Uses appropriate estimation strategies (such as front-end, breaking numbers apart, compatible numbers, guess and check, clustering, rounding, compensation) to check the reasonableness of results.
- Solves nonroutine problems for which the answer is not obvious.
- Relates concepts and skills to practical applications.

Problem Solving Strategies,
Reasoning,
Estimation Strategies,
Mental Computation

Appropriate Methods and Tools
Applications

M.7.2

Describes orally and in writing, using the appropriate mathematical vocabulary, mathematical concepts and procedures, such as solving a word problem or computing.

Communication,
Reasoning

Vocabulary

M.7.3

Uses scientific calculator and computer skills to solve problems, to discover patterns and sequences, to investigate situations and draw conclusions.

Technology,
Calculator Skills,
Computer Skills,
Problem Solving,
Reasoning

Pattern,
Sequence

M.7.4

Uses computer software and applications to research, investigate, and analyze data and to represent this information using charts, tables, graphs, or other presentation forms.

Technology,
Computer Skills,
Charts,
Tables,
Graphs

Research,
Investigation,
Data Analysis

Algebra

M.7.5

Identifies the use of a variable as a placeholder in an algebraic expression or equation.

Expressions,
Equations,
Inequalities

Variable

Strand	Content Standard	Topic	Concept	Notes
--------	------------------	-------	---------	-------

M.7.6 Evaluates algebraic expressions (e.g., Given $3a + 4$. If $a = 2$, then $3(2) + 4 = 10$).

Variable

M.7.7 Writes and solves one-step algebraic equations and inequalities using addition, subtraction, multiplication, and division (e.g., $a + 11 = 15$; $b - 2 = 21$; $m/2 = 15$; $5x = 40$).

Variable

M.7.8 Graphs inequalities on a number line.

Inequalities,
Graphing

Variable Number Line

Algebra; Computation & Estimation

M.7.9 Uses order of operations to simplify numerical expressions that involve addition, subtraction, multiplication, and division, with and without parenthesis.

Order of Operations

M.7.10 Solves for the missing term in a proportion.

Variable

Algebra; Number & Number Relationships

M.7.11 Translates English phrases and sentences into mathematical expressions, equations, and inequalities.

Variable,
Symbol,
Equality,
Inequality

Algebra; Patterns & Functions

M.7.12 Determines how changes in one variable can affect another variable (e.g., Given $b = 2a$. If $a = 2$, then $b = 4$. If $a = 3$, then $b = 6$).

Dependent,
Independent

Algebra; Problem Solving

M.7.13 Writes and solves an equation for a given word problem.

Problem Solving,
Equations

Strand	Content Standard	Topic	Concept	Notes
--------	------------------	-------	---------	-------

Computation & Estimation

M.7.14	Uses addition, subtraction, multiplication, and division (interpreting remainders in context of problem) in computation and problem solving with whole numbers, fractions, and decimals.	Whole Numbers, Fractions, Decimals, Computation, Problem Solving	Appropriate Use of Methods and Tools	
M.7.15	Computes with integers using models, manipulatives, and/or rules.	Integers	Basic Operations	
M.7.16	Performs computations mentally using strategies such as multiples of tens, powers of ten, compensation, breaking apart numbers, or compatible numbers.	Mental Computation Strategies	Multiples, Powers, Compensation, Compatible Numbers	

Geometry

M.7.17	Classifies angles as acute, right, obtuse, or straight; and names angles using points, numbers, and letters.	Angles	Acute, Right, Obtuse, Straight	
M.7.18	Classifies quadrilaterals and triangles based on their properties.	Quadrilaterals, Triangles	Classifying	
M.7.19	Contrasts and classifies plane and solid geometric figures (polygons, cones, cylinders, prisms, pyramids).	Geometric Figures	Solid Figure, Plane Figure, Classifying	
M.7.20	Compares and contrasts geometric figures with respect to congruency and similarity (scaling, dilations).	Geometric Figures	Similarity, Congruence	
M.7.21	Analyzes effects of basic transformations on geometric shapes.	Transformations	Rotation, Reflection, Translation	

Strand	Content Standard	Topic	Concept	Notes
--------	------------------	-------	---------	-------

Geometry: Algebra

M.7.22	Identifies and graphs an ordered pair of integers on a four-quadrant coordinate plane.	Graphing, Integers	Ordered Pair, Coordinate Plane	
--------	--	-----------------------	-----------------------------------	--

Geometry: Measurement

M.7.23	Finds volume and surface area of prisms and cylinders.	Prisms, Cylinders	Volume, Surface Area	
M.7.24	Finds the perimeter (or circumference) and area of polygons and circles, and the volume and surface area of geometric solids, using formulas. (Uses student development of formulas when possible.)	Circles, Polygons, Geometric Solids, Formulas	Area, Perimeter, Volume, Surface Area, Circumference	

Measurement

M.7.25	Selects and uses appropriate customary and metric units of measure for length (including perimeter and circumference), area, volume, capacity, weight/mass, time, temperature, and angle measure.	Customary Units, Metric Units	Length, Perimeter, Circumference, Area, Volume/Capacity, Weight/Mass, Time, Temperature, Angle Measure	
M.7.26	Measures angles using a protractor.	Angle Measurement	Degree, Protractor	
M.7.27	Converts from one metric unit to another metric unit and from one customary unit to another customary unit (length, capacity, weight/mass, time, and money).	Customary Units, Metric Units, Conversion within System	Length, Capacity, Weight/Mass, Time, Money

Georgia's Quality Core Curriculum

Science Grade 7

Introduction to Science Quality Core Curriculum K-12

The revision of the Science section of the K-12 Quality Core Curriculum (QCC) involved the intensive efforts of science teachers, scientists and other science educators. These practitioners closely examined the 1988 QCC and sought to produce a sequential document that establishes high expectations for every student and enhances day-to-day instruction.

The document reflects a combination of the present (1988) Georgia QCC, the National Science Education Standards, Project 2061: Benchmarks for Science Literacy and the Georgia Framework for Learning Mathematics and Science. K-8 is organized by grade clusters K-3, 4-5, and 6-8. The topics in these clusters which contain concepts, content standards, and skills may be moved from one grade level to another within the cluster by the local school systems.

At each grade level, kindergarten through eighth, the Science QCC has three major strands: physical science, life science and earth/space science as well as content standards dealing with science, technology, and society. The strands can be arranged by grade levels or taught as an integrated science program as determined by the local school system. Physical science, biology, chemistry, and physics for high school were revised to build on the concepts presented in the K-8 curriculum.

At each grade level, objectives are included for science inquiry and processes, reference skills, safety, and tools used in Science. These objectives should be integrated into instructional activities addressing these concepts and content standards rather than taught in isolation.

Science develops thinking, problem-solving, and lifelong learning skills. Science process and inquiry skills are essential to the development of skills necessary to live interesting, responsible, and productive lives. Science instruction lends itself to integration with other subject areas and can generate student interest and motivation for all subject areas. Students should be actively engaged in the learning process via hands-on/minds-on science activities and experiences.

Our economic development and national survival are contingent on the education we provide our students. Educational development in the state of Georgia will help us produce future scientists and engineers who can maintain our country's technological competitiveness.

Assessment in Science should provide opportunities for students to demonstrate in a variety of ways what they have learned. Good assessment is a learning experience. As we provide students with effective assessment opportunities, we can monitor how well instruction is meeting the learning needs of students. If assessment is shared with students as instruction begins, planning, teaching,

and learning become more focused. Ongoing professional development and networking experiences for teachers will promote confidence and competence in science instruction.

The developers of the Georgia Science QCC have drawn extensively on statements published by the American Association for the Advancement of Science, the National Research Council, the Georgia Framework for Learning Mathematics and Science, and the National Science Education Standards as to what all students should know and be able to do.

Philosophy of Science

Science education in Georgia must provide students with the concepts and skills necessary to be responsible, active caretakers of their micro and macro environment. The Science curriculum must be designed to be a blend of science concepts and science process skills. Students must be actively involved in hands-on scientific investigation in the exploration of the world in which they live. Students must develop critical thinking skills that enable them to base decisions on valid scientific evidence. Students must be equipped with the problem-solving skills and scientific concepts to address the influence of science and technology on society. Ultimately, the Science curriculum must be designed to provide students with the opportunity to acquire sufficient scientific knowledge and skills to function effectively in, and contribute positively to, society.

The Science programs in Georgia should be consistent with the cognitive, social, emotional, and physical development of the student. These programs should be consistent with the nature and values of science which include its philosophy, methods of investigation and verification, conceptual organization, and accumulated knowledge. They should reflect an involvement with both immediate and future life needs in terms of solving personal and social problems. Finally, science programs should reflect science as part of an integrated whole, not an isolated discipline.

Science Inquiry and Processes

Students will:

- Ask questions about events
- Keep accurate records of observations and investigations
- Use data to support inferences and predictions
- Use data, experience, evidence, and models to construct explanations

- Make sketches and diagrams to explain ideas, procedures and results
- Organize data into tables, charts, and graphs for interpretation
- Plan, design, and conduct scientific investigations to answer questions

To accomplish the above, students will regularly:

- Make qualitative and quantitative observations
- Classify objects and phenomena
- Communicate with others
- Make inferences and predictions
- Use estimation and metric measurement
- Formulate hypotheses
- Identify and control variables
- Design experiments
- Interpret data

Reference Skills

- Uses encyclopedias, books, science reference magazines, and other media to obtain information related to science concepts.
- Uses computer databases, online resources, and other electronic media to obtain information about science concepts.
- Uses indices, tables of contents, and online searches to locate information related to science concepts.

Safety

Identifies and practices accepted safety procedures in manipulating science materials and equipment.

Tools

Uses appropriate tools to collect and analyze data and solve problems.

Basic Process Skills

Observation includes using one or more of the senses to determine attributes, properties, similarities, differences, and changes in natural phenomena and objects. Observations can be made directly with the senses or indirectly through the use of simple or complex instruments.

Classification includes organizing objects or events according to similarities and differences selected by the observer. Classification includes sorting elements into groups on the basis of common characteristics and ordering (sequencing) elements by relationships among the elements.

Communication includes the presentation and explanation of experiences with objects or events by means of oral or written descriptions, pictures, graphs, charts, maps, demonstration, and/or other methods.

Measurement includes the comparison of an unknown quantity (e.g., length, mass, or temperature) with a known quantity such as a pupil-made standard or the metric standards of length, area, volume, mass, temperature, force, time or electrical charge. Measurement includes the ability to estimate or compare an object or event with a frame of reference. Measurement involves the skillful, effective use of instruments.

Prediction includes suggesting what will occur in the future based on observations, measurements, and inferences about the relationships between or among observed variables. Predictions may be used to generalize that under a certain set of circumstances, a certain outcome may be expected, or they may be used to describe outcomes beyond the observed data. The accuracy of a prediction is closely related to the accuracy of the observations.

Inference includes the use of observations and past experiences to reach a conclusion about a probable cause or about future outcomes. Inferring from a set of data may lead to several nonconclusive inferences. Only further investigations and additional data may validate an inference.

Higher Level Process Skills

Identification of variables includes finding the variables of a system and selecting those to be held constant.

Manipulation of variables includes the identification of trends or patterns in sets of data. Patterns in data may be used to establish generalizations, make predictions and formulate hypotheses. Interpreting data involves organizing, analyzing, synthesizing, and evaluating patterns in the data.

Interpretation of data includes the identification of trends or patterns in sets of data. Patterns in data may be used to establish generalizations, make predictions, and formulate hypotheses. Interpreting data involves organizing, analyzing, synthesizing, and evaluating patterns in the data.

Operational definition includes defining objects in the context of a common experience, telling one what to do to or with an object and what to observe as a result of the action.

Formulation of models includes describing or constructing physical, verbal, mental or mathematical explanations of systems and interrelated phenomena that cannot be observed directly. Models may be used in predicting outcomes of planned investigations.

Experimentation includes the design and implementation of procedures to obtain reliable information about interrelationships between objects and events. Investigating includes formulating and solving a problem and experimenting and drawing conclusions.

Construction of hypotheses includes formulating generalizations that include all objects or events of the same class. Questions, inferences, and predictions can lead to the formation of a hypothesis. The hypothesis must be tested if its credibility is to be established.

Drawing conclusions includes interpreting data acquired through experimentation to determine whether a hypothesis is supported.

Strand Content Standard

Topic

Concept

Notes

Science (6-12): Grade 7

Life Science

S.7.1

Uses process skills of observing, classifying, communicating, measuring, predicting, inferring, identifying, and manipulating variables. Also uses recording, analyzing, and operationally defining, formulating models, experimenting, constructing hypotheses and drawing conclusions.

Scientific Inquiry Process

Investigation involves carefully collected, relevant evidence, logical reasoning, and some imagination when developing hypotheses and explanations.

S.7.2

Understands and applies laboratory safety rules and practices.

Safety Skills

Scientific investigations require safety precautions for the scientist and others.

Assessment Recommendations:
Demonstrates in the lab appropriate safety procedures, i.e., NSTA Standards.

S.7.3

Defines and identifies standards of measurement.

3.1 Names the prefixes used in the SI system.

3.2 Identifies SI units and symbols for length, volume, mass, density, time, and temperature.

3.3 Converts measurements among related SI units.

3.4 Uses appropriate tools for determining mass volume, temperature, density, and length.

Standard International (SI) Measurements (Metric System)

Scientists in different parts of the world often repeat an experiment many times before accepting a consistent result as a rule. Consequently, a universal system of measurement is necessary.

Assessment Recommendations:
Selects and uses in the lab appropriate tools for the measurement of mass, volume, temperature, and density.

S.7.4

Selects and uses multiple types of print and nonprint sources for information on science concepts.

Reference Skills

Scientific investigation requires the use of proper techniques in order to gather information.

S.7.5

Identifies the role elements, atoms, and molecules play in cell development and functions.

Living Things/Cells

There is a relationship among atoms, elements, and molecules within cells.

S.7.6

Identifies the cell as a basic unit of life.

6.1 Describes the structure and functions of major components and organelles to include nucleus, nuclear membranes, cytoplasm, cell membrane, chromosomes, vacuoles, golgi bodies, lysosomes, endoplasmic reticulum (rough and smooth) and mitochondria.

6.2 Compares and contrasts the major structures and functions of typical plant and animal cells.

6.3 Discusses and illustrates the organization of cells into tissues, organs, and systems.

6.4 Describes and discusses the movement of materials into and out of the cell for the maintenance of homeostasis.

6.5 Describes the process of mitosis and meiosis.

6.6 Outlines the events that occur in mitosis and meiosis.

Living Things/Cells

All organisms are composed of cells - the fundamental unit of life. Cells carry on the many functions needed to sustain life.

Assessment Recommendations:
Makes posters that illustrate each content standard. Examines and identifies plant and animal cells under a microscope.
Makes a model of a cell and its organelles.
Using pictures, diagrams, and models, distinguishes between animal and plant

Strand	Content Standard	Topic	Concept	Notes
S.7.7	Identifies organs and their functions in these systems: circulatory, respiratory, reproductive, skeletal, digestive, nervous, endocrine lymphatic, and skin. 7.1 Explains and describes the features and functions of the various organ systems. 7.2 Describes and investigates body functions and make inferences regarding these functions, e.g., heartbeat, sensory perception, lung volume, and reaction time. 7.3 Discusses and illustrates the organization of cells into tissues, organs, and systems. 7.4 Classifies groups of cells as tissues, organs, or systems using observation and/or description.	Living Things/Human Body	The human body is composed of cells that form different body tissues, organs, and systems. Various tissues and organs serve the needs of cells.	Assessment Recommendations: Identifies and labels organs of each human body system. Identifies and labels the parts of each human body system. Identifies and labels major bones and muscles of a human skeleton.
S.7.8	Defines infectious diseases and how they affect the immune system. 8.1 Describes the body's lines of defense against infectious diseases.	Living Things/Human Body	Viruses, bacteria, fungi and parasites may infect the human body and interfere with normal body functions.	Assessment Recommendations: Develops models to illustrate the body's lines of defense against infectious diseases. Researches the importance of the human immune system.
S.7.9	Examines how health care technology has improved the quality of life, (e.g., computerized tomography (C.T.), artificial organs, bionics, Magnetic Resonance Imaging (MRI), and ultrasound). (STS) 9.1 Examines how improvements in health care practices have decreased infectious diseases (i.e. sanitation, milk pasteurization, aseptic surgical techniques, etc. (STS).	Living Things/Human Body	Advancements in healthcare technology and practices have provided us with technological devices and medical discoveries that continue to improve the overall quality of life.	Assessment Recommendations: Writes reports on health care technological advances.
S.7.10	Describes the structure of a chromosome, DNA replication, and how genes interact to determine the traits of an organism.	Living Things/Genetics	Chromosomes contain genes that determine the traits of an organism.	Assessment Recommendations: Makes DNA puzzle models to illustrate how DNA strands interact.
S.7.11	Explains how principles of heredity apply to inherited traits 11.1 Identifies dominant and recessive traits (genotype and phenotype). 11.2 Predicts the results of genetic crosses using a Punnett Square. 11.3 Describes how human traits are determined, (e.g., blood types, inherited diseases, sex-linked traits, and nondisjunction). 11.4 Describes common genetic disorders and how they can be inherited.	Living Things/ Genetics	Principles of heredity explain how traits are passed from one generation to the next. In some kinds of organisms, all the genes come from a single parent. In organisms that have sexes, half of the genes come from each parent.	Assessment Recommendations: Uses Punnett Squares to demonstrate genetic crosses (monohybrid and dihybrid crosses). Determines blood types, sex-linked traits, and inherited diseases.
S.7.12	Describes various advances within the fields of agriculture, animal husbandry and medicine due to Applied Genetics (STS).	Living Things/ Genetics	Applied Genetics has contributed much to the advancement of agriculture, animal husbandry and medicine. New varieties of cultivated plants and domestic animals have resulted from selective breeding for particular traits.	Assessment Recommendations: Researches and reports on genetic contributions within the fields of agriculture, animal husbandry and medicine.

BEST COPY AVAILABLE

424

425

Strand	Content Standard	Topic	Concept	Notes
S.7.13	Explains the method scientists use to classify living things for the purpose of communication and study. 13.1 Explains how living organisms can be classified according to similarities in structure, behavior, food needs and chemical make up into kingdoms, phyla, classes, orders, families, genera, and species.	Living Things/ Classification	Scientists classify living things into kingdoms, phyla, classes, orders, families, genera, and species according to certain similarities.	Assessment Recommendations: Makes posters showing the classification levels and how they interrelate. Uses lab activities to develop dichotomous keys to classify objects according to similarities.
S.7.14	Describes the major characteristics of the five kingdoms (Monerans, Protists, Fungi, Plants, and Animals). 146.1 Classifies common organisms into kingdoms based on similarities of characteristics.	Living Things/ Classification	Living organisms are classified into major kingdoms based on the organism's particular characteristics.	Assessment Recommendations: Sorts and classifies organisms into kingdoms given key characteristics eg., using flash cards.
S.7.15	Identifies the characteristics and structure of Monerans, Protists and Fungi. 15.1 Lists harmful and beneficial effects of the organisms in these three kingdoms.	Living Things/Monerans, Protists, and Fungi	Monerans are unicellular prokaryotic organisms that have significant harmful and helpful effects on many other organisms and ecological systems. The Kingdom Protista is a diverse group of organisms that have characteristics of both plants and animals and that have tremendous importance to the ecological system of the world. Fungi are plant-like heterotrophs lacking chloroplasts. They are major decomposers in ecosystems and have various functions.	Assessment Recommendations: Reports on harmful and beneficial effects of these organisms. Classifies specimens as Monerans, Protists, or Fungi.
S.7.16	Identifies the characteristics and structure of nonvascular plants, (e.g., mosses, liverworts, and hornworts). 16.1 Identifies the characteristics and structure of vascular plants, e.g., ferns and seed plants (gymnosperm vs. angiosperms).	Living Things/ Plants	The Plant kingdom can be divided into two distinct groups-vascular and nonvascular-based on characteristics and structure.	Assessment Recommendations: Makes posters that compare and contrast vascular and nonvascular plants. Identifies vascular and nonvascular plants using live specimens and prepared slides. Compares and contrasts vascular plants using observation and/or description.

426

BEST COPY AVAILABLE

427

Strand	Content Standard	Topic	Concept	Notes
S.7.17	Describes and compares various life processes of plants: asexual and sexual reproduction, photosynthesis, cellular respiration, growth and response to environmental stimuli.	Living Things/ Plants	Plants, like all organisms, must be able to obtain and use resources, grow, reproduce and maintain a relatively stable internal environment while living in a constantly changing external environment.	Assessment Recommendations: Designs investigations related to the life processes of plants (e.g., rate of photosynthesis, tropisms, rate of plant growth, and geotropisms).
S.7.18	Describes the characteristics of invertebrate animals, e.g., poriferans, coelenterates, segmented worms, mollusks, echinoderms, and arthropods. 18.1 Sorts and classifies invertebrates into groups according to life conditions, methods of obtaining food, methods of reproduction, and behavior. 18.2 Describes the characteristics of vertebrates within the Chordata phylum to include jawless fishes, cartilaginous fishes, bony fishes amphibians, reptiles, birds, and mammals. 18.3 Sorts members of the Chordata phylum into classes by observation of characteristics, (e.g., life conditions, methods of obtaining food, methods of reproduction, and behavior).	Living Things/Animals	The Animal kingdom is divided into two distinct groups - vertebrates and nonvertebrates - based on characteristics and structure.	Assessment Recommendations: Makes posters that compare and contrast vertebrates and invertebrates. Identifies key structures of vertebrates through dissection.
S.7.19	Explains the food web/food chain cycles in nature that affect living things.	Ecology/Interdependence of Life	All species ultimately depend on one another; interactions between types of organisms include producer/consumer, predator/prey, parasite/host, and relationships that can be mutually beneficial or competitive.	Assessment Recommendations: Makes posters showing food chain/food web of various ecosystems.
S.7.20	Describes the characteristics of major biomes. 20.1 Describes the location of major biomes. 20.2 Describes the climate and other abiotic factors of major biomes. 20.3 Describes the organisms found within biomes.	Ecology/Interdependence of Life	The world can be divided into distinct biomes which have particular living and nonliving components.	Assessment Recommendations: Uses world maps to locate major biomes on the Earth.
S.7.21	Describes the ability of organisms to change as necessity for species survival. 21.1 Defines and gives examples of adaptation for survival of the species.	Ecology/Interdependence of Life	Organisms with certain traits are more likely than others to survive and have offspring. Changing environmental conditions can affect the survival of entire species.	Assessment Recommendations: Researches and reports how adaptations are important for the survival of the species.

Georgia's Quality Core Curriculum

Social Studies Grade 7

Introduction to Social Studies Quality Core Curriculum K-12

The primary purpose of Social Studies education in Georgia schools is to help students become productive and responsible citizens. The Social Studies curriculum enables students to develop the ability to make informed decisions that balance concern for individual interests and the public good in a culturally diverse and interdependent world.

Exemplary Social Studies instruction provides opportunities for students to acquire knowledge, reflect upon and use that knowledge, and gain a better understanding of self and others. The Social Studies program includes the study of geography, history, political science, economics, behavioral sciences, and the humanities.

Knowledge (what students need to know about various social science and related disciplines), skills (what students should be able to do with acquired knowledge and skills), and values (mandated by the State Legislature in 1991) are the three major elements that comprise the Social Studies guidelines as established by state and national organizations. Social Studies instruction should be meaningful, integrative across teaching and learning, value-based and challenging. Through such a process students will develop the necessary knowledge, skills and values of a committed, competent citizen who participates in the civic affairs of the community and nation.

Georgia's Quality Core Curriculum (QCC) revision team, composed of PK-16 Social Studies educators from throughout the state, focused on the following concerns:

- refining content standards to clarify content and skills
- correlating content standards to appropriate core values
- building on concepts introduced at earlier stages of instruction
- providing content standards that are clearly measurable
- identifying civic responsibility, information processing, and problem-solving skills
- restructuring content for a more equitable grade-level distribution.

Specifically, in two areas within this curricula pattern the content has been redistributed. At the fourth and fifth grade levels, the original content standards that were in the QCC have been incorporated into a two-year study of United States history. The study of Canada, formerly in fifth grade, has now been incorporated into the sixth grade curriculum.

In grades six and seven, the history/geography pattern was retained; however, certain regional areas were rearranged to reflect greater similarity between place and cultures. In both cases, these patterns are being offered to encourage in-depth study of specific content areas, to expand the use of multi-media resources, and to provide greater opportunities for students to engage in active and hands-on learning experiences.

Introduction to Social Studies Quality Core Curriculum Grades 6-8

In the revised 6-8 Social Studies curriculum, emphasis in the sixth and seventh grades is placed on the cultural and geographic study of selected regions. In the eighth grade, students will study the geography and history of Georgia within the broader context of *United States History*.

Suggested regions for sixth grade study are the Americas, Europe, and Oceania. Suggested regions for seventh grade study are Asia, Africa, and the Middle East. However, each school system has the flexibility to sequence these cultural regions to reflect its unique curriculum, goals, and resources.

Course Content Standard

Topic Concept

Notes

Social Studies: Grade 6-7

Geography and World Cultures

SS.6-7.1	Defines and locates regions of the Americas, Europe, and Oceania climate zones and physical features on maps and globes.	Geographic Environment	Physical Resources	Skills: Climatic zones Physical features
SS.6-7.2	Identifies various ethnic groups found in regions of the Americas, Europe and Oceania and their impact on the development of the selected regions.	People	Ethnic Groups	Skills: Cultural/linguistic maps Globe skills
SS.6-7.3	Identifies and locates regions in the Americas, Europe and Oceania.	Region	Location	Skills: Map projections Grid systems Atlases
SS.6-7.4	Explains how natural resources and physical features influence human activity in the Americas, Europe, and Oceania.	Geographic Environment	Human Interaction with the Environment	Skills: Economic activity maps Meaning of color on maps
SS.6-7.5	Defines scarcity and discusses examples in the Americas, Europe, and Oceania.	Geographic Environment	Economics	Skills: Industrial/agricultural maps Resource distribution maps
SS.6-7.6	Describes how unequal distribution of limited resources leads to specialization and interdependence among peoples and nations.	Geographic Environment	Human Interaction with the Environment	Skills: Trade route maps
SS.6-7.7	Traces the migrations and settlements of various groups and explains their impact on the development of each region.	Culture	History	Skills: Migratory route maps
SS.6-7.8	Explains how people in all economic systems engage in certain basic economic activities: - producing - exchanging - consuming - saving, and - investing.	Economic Systems	Economic Activity	Skills: Economic maps Graphs/charts

439

438

Course	Content Standard	Topic	Concept	Notes
SS.6-7.9	Traces the important historical developments of the selected regions of the Americas, Europe, and Oceania.	History	Regions	Skills: Timelines Graphs Diagrams
SS.6-7.10	Traces the important political developments of the Americas, Europe, and Oceania. Identifies and explains the spatial divisions of these regions.	History	Political Developments	Skills: Timelines Graphs Diagrams
SS.6-7.11	Traces the important social and cultural developments of the Americas, Europe, and Oceania.	History	Cultural Diversity	Skills: Timelines Graphs Diagrams
SS.6-7.12	Traces the important economic developments of the Americas, Europe, and Oceania.	History	Economics	Skills: Timelines Graphs Diagrams
SS.6-7.13	Assesses the cultural expressions of art, music, and literature.	Cultural Characteristics	Cultural Diversity	
SS.6-7.14	Explains how the social institutions (religion, government, and economics) influence the attitudes and behavior of people.	Cultural Characteristics	Social Institutions	
SS.6-7.15	Compares and contrasts political and economic systems using population data and other geography sources.	Modern Period	Political Systems Economic Systems	
SS.6-7.16	Describes the ways in which a citizen participates in the various types of government in the countries of the Americas, Europe and Oceania.	Modern Period	Citizen Participation	
SS.6-7.17	Describes how major technological advancements have contributed to the standard of living of the Americas, Europe, and Oceania through the use of primary resources.	Modern Period	Technological Advancement Primary Resources	
SS.6-7.18	Uses the map legend to interpret the special use of symbols representing various kinds of information, such as food, production, languages and population.	Map and Globe Skills	Symbols and Legends	
SS.6-7.19	Translates specific information from maps and globes into bar graphs and reads information from bar graphs.	Map and Globe Skills	Interpretation	

Course	Content Standard	Topic	Concept	Notes
SS.6-7.20	Contrasts physical and political maps of the Americas, Europe, and Oceania.	Map and Globe Skills	Interpretation	
SS.6-7.21	Makes generalizations about human activities in a geographic region using map information.	Map and Globe Skills	Interpretation	
SS.6-7.22	Compares map(s) and text descriptions of an area to draw inferences from them.	Map and Globe Skills	Interpretation	
SS.6-7.23	Measures and compares different travel routes (air, land and water).	Map and Globe Skills	Symbols and Legends	
SS.6-7.24	Identifies and locates regions in Asia, the Middle East and Africa.	Geographic Environment	Location	Skills: Map projections Grid systems Atlases
SS.6-7.25	Locates the countries of Asia, the Middle East and Africa on a world map.	Geographic Environment	Location	Skills: Locates by grid.
SS.6-7.26	Identifies and locates climatic zones and physical features on maps and identifies the physical processes that shape these features.	Geographic Environment	Physical Features	Skills: Meaning of colors on maps
SS.6-7.27	Explains how natural resources and physical features influence human activity in Asia, the Middle East, and Africa and how human actions then modify the physical environment.	Geographic Environment	Human Environment Interaction	Skills: Economic activity maps
SS.6-7.28	Identifies the changes that occur in the meaning, use, distribution, and importance of resources and defines scarcity and its impact.	Geographic Environment	Economics Resources Distribution	Skills: Industrial/agricultural maps Resource distribution maps
SS.6-7.29	Describes how unequal distribution of limited resources leads to specialization and patterns of economic interdependence on Earth's surface.	Geographic Environment	Economics Unequal Distribution Specialization	Skills: Trade route maps
SS.6-7.30	Identifies various ethnic groups found in regions of Asia, the Middle East and Africa and describes impacts on the development of the selected regions by these groups (e.g., linguistic patterns and cultural contributions).	People	Ethnic Groups	Skills: Cultural/linguistic maps Globe skills
SS.6-7.31	Traces the migrations and settlement of various groups and how they impacted Asia, the Middle East, and Africa.	Culture	History	Skills: Migratory route maps

Course	Content Standard	Topic	Concept	Notes
SS.6-7.32	Explains how people in all economic systems engage in certain basic economic activities: <ul style="list-style-type: none">- producing- exchanging- consuming- saving, and- investing.	Economic Systems	Economic Activity	Skills: Economic maps Graphs/charts
SS.6-7.33	Traces the important historical developments of the regions of Asia, the Middle East and Africa and how geographic factors have influenced events and conditions in the past.	History	Historical Development	Skills: Timelines Graphs Diagrams
SS.6-7.34	Traces the important political developments of Asia, the Middle East, and Africa and shows how cooperation and conflict contribute to these developments.	History	Political Development	Skills: Timelines Graphs Diagrams
SS.6-7.35	Traces the important social and cultural developments of Asia, the Middle East, and Africa.	History	Social and Cultural Diversity	Skills: Timelines Graphs Diagrams
SS.6-7.36	Traces the important economic developments of Asia, the Middle East, and Africa.	History	Economics	Skills: Timelines Graphs Diagrams
SS.6-7.37	Assesses the cultural expressions of art, music, and literature.	Cultural Characteristics	Cultural Expressions	
SS.6-7.38	Explains how the social institutions (government, religion and economics) influence the attitudes and behavior of people.	Cultural Characteristics	Social Institutions	
SS.6-7.39	Identifies the political and economic structures that have evolved to deal with basic issues in Asia, the Middle East and Africa.	Modern Period	Political Structures	
SS.6-7.40	Describes the ways in which a citizen participates in the various types of government in the countries of Asia, the Middle East and Africa.	Modern Period	Types of Government	
SS.6-7.41	Describes how major technological advancements have contributed to the standard of living of each region and how this affects access to, and use of, resources.	Modern Period	Technological Advancements	

Course	Content Standard	Topic	Concept	Notes
SS.6-7.42	Identifies the three basic questions asked by any society regarding production from natural and human resources: - What will be produced? - How will it be produced? - For whom will it be produced?	Modern Period	Society Production Resources	
SS.6-7.43	Uses the map legend to interpret the special use of symbols representing various kinds of information, such as food, production, languages and population.	Map and Globe Skills	Symbols and Legends	
SS.6-7.44	Develops graphs, charts, diagrams, timelines, and maps to interpret and present geographic information.	Map and Globe Skills	Interpretation	
SS.6-7.45	Contrasts physical and political maps of the same areas.	Map and Globe Skills	Interpretation	
SS.6-7.46	Makes generalizations about human activities in a geographic region using map information.	Map and Globe Skills	Human Activity	
SS.6-7.47	Compares map(s) and text descriptions of an area to draw inferences from them.	Map and Globe Skills	Inferences	
SS.6-7.48	Measures and compares different travel routes (air, land and water).	Map and Globe Skills	Travel Routes

Georgia's Quality Core Curriculum

Health & Physical Education Grade 7

Introduction to Health and Physical Education

Quality Core Curriculum

K-12

Health and Physical Education are lifelong processes which are the shared responsibility of the student, home, school, and community. The Health and Physical Education programs in Georgia Public Schools provide each student with the information and skills necessary to be active and healthy. Students have opportunities to practice and apply skills and knowledge learned. Through these programs, students are provided a foundation to be healthy and motivated to participate in physical activity in a variety of school and community settings.

Strand	Content Standard	Topic	Concept	Notes
--------	------------------	-------	---------	-------

Health: Grade 7**Alcohol, Tobacco & Other Drugs**

H.7.1	Analyzes the effects of alcohol, tobacco products, and other drugs on the immune, nervous, and reproductive systems.	Effects		
H.7.2	Evaluates the harmful consequences of anabolic steroid use.	Consequences		
H.7.3	Analyzes alcohol, tobacco products, and other drug advertisements and promotional products and develops counterarguments.	Persuasion		
H.7.4	Names information, treatment, and rehabilitation resources available in the community.	Resources		

Disease Prevention

H.7.5	Recognizes that STDs, including HIV/AIDS, are communicable diseases.	HIV/AIDS		
H.7.6	Recognizes that HIV/AIDS is caused by a virus and is currently incurable and fatal.	HIV/AIDS		
H.7.7	Identifies HIV/AIDS as a sexually transmitted disease and explains the ways HIV is transmitted.	HIV/AIDS		
H.7.8	Describes the effects of the AIDS virus on the immune system.	HIV/AIDS		
H.7.9	Recognizes abstaining from sexual activity and refraining from intravenous drug use as the most effective methods of preventing HIV/AIDS.	Abstinence		
H.7.10	Recognizes abstinence from sexual activity as the most effective method of preventing pregnancy and sexually transmitted diseases.	Abstinence		

BEST COPY AVAILABLE

Strand	Content Standard	Topic	Concept	Notes
H.7.11	Identifies methods of preventing pregnancy and sexually transmitted diseases and discusses whether or not they are effective.	Pregnancy/STD Prevention		
H.7.12	Identifies the benefits of setting personal goals for maintaining a healthy body.	Goal Setting		
Family Living				
H.7.13	Identifies factors that promote a positive self-image (e.g., accepting responsibility; respect for self, authority and others; self-discipline, self-control, and the right to be assertive).	Self Concept		
H.7.14	Recognizes how sexual decisions are influenced by group pressure (e.g., community, media, peer).	Persuasion		
H.7.15	Identifies ways of resisting persuasive tactics regarding sexual involvement (e.g., saying "no," negotiation, and using refusal and decision-making skills).	Refusal Skills		
H.7.16	Identifies characteristics of genuine friendship that enhance the good of the individual.	Relationships		
H.7.17	Identifies roles and responsibilities of children in the family.	Roles		
H.7.18	Identifies parental roles and responsibilities.	Roles		
H.7.19	Analyzes changes in the prospective parents' lifestyles and responsibilities before and after the birth of their baby.	Parental Responsibilities		
H.7.20	Recognizes that having children is best undertaken in marriage.	Decision Making		
Growth and Development				
H.7.21	Lists the parts of the male and female reproductive systems and describes their functions.	Reproductive System		

Strand	Content Standard	Topic	Concept	Notes
--------	------------------	-------	---------	-------

Mental Health

H.7.22	Discusses strategies to manage stress and feelings caused by disappointment, separation, and loss.	Stress Management		
H.7.23	Discusses prejudices, its roots, and its effects.	Prejudice		
H.7.24	Describes necessary elements of conflict resolution (e.g., nature of conflict, feelings, active listening, "I" messages, and restating), and shows effective communication skills, in general.	Conflict Resolution		

Nutrition

H.7.25	Investigates the nutritional value of various fast foods.	Fast Foods		
H.7.26	Compares the effects of various cooking and food preparation methods on the nutritive value of foods.	Food Preparation		
H.7.27	Identifies various local, state, and national health resources that promote acceptable nutritional practices (e.g., American Heart Association, American Cancer Society, National Dairy Council, Local Cooperative Extension, National Institutes of Health, American Dietetic Association, etc.).	Resources		

Personal Health

H.7.28	Develops strategies and skills for maintaining an adequate level of personal grooming and hygiene, emphasizing changes during adolescence.	Hygiene		
--------	--	---------	--	--

Safety

H.7.29	Examines factors contributing to accidents (e.g., carelessness, fatigue, emotions, and drugs).	Accident Prevention		
--------	--	---------------------	--	--

Georgia's Quality Core Curriculum

Fine Arts Grade 7

Introduction to Fine Arts Quality Core Curriculum K-12

The revised Quality Core Curriculum (QCC) for Fine Arts reflects intense efforts on the part of educators in dance, music, theatre, and visual arts to coordinate the scope and sequence in all Fine Arts areas. The revision provides standards that represent four major ways of responding to or creating the arts. A discipline-based approach for dance, music, theatre, and visual arts is emphasized. The Fine Arts QCC strands in all areas are:

- **Artistic Skills and Knowledge: Creating, Producing, Performing**
Developing skills and organizing knowledge for creating, producing, and performing the Fine Arts
- **Historical and Cultural Context**
Examining the Fine Arts as creative expression of humankind's relationship to historical, cultural, and social context
- **Critical Analysis and Aesthetic Understanding**
Responding to the Fine Arts through critical analysis and aesthetic understanding
- **Connections**
Identifying and expanding connections within the Fine Arts and other disciplines

The revised Fine Arts QCC will arrive in Georgia schools as the Year for Arts Education is celebrated across the state. Stressing the importance of the arts in the total education of all Georgia students is the primary focus of the celebration. The Fine Arts QCC revision provided continuity, clarity, consistency, and comprehensive standards for all Georgia students participating in Fine Arts education.

Introduction to Dance

Quality Core Curriculum

K-12

The Quality Core Curriculum (QCC) supports dance taught in a physical education context while recognizing that dance is a fine art. Content objectives that may be appropriate within a physical education curriculum are indicated. The QCC objectives recognize the fullest range of dance as an art form with the highest expectations for students participating in this curriculum. The Georgia Department of Education QCC for Dance is based on an educational framework that embraces the highest academic standards and values as well as the philosophy and standards of the GOALS 2000/ Educate America Act.

Each content standard represents a broad or general objective and may be introduced and developed over several grades and through multiple lessons. The content standard is not inclusive of all potential movements, steps, skills or approaches related to the standard or dance activity. The QCC is designed as a *guide and suggests standards for students in dance* with the expectation that the institution or instructor will develop the specific curriculum and lesson plans within the QCC framework. Therefore, the *specific objective* to be mastered relates to the instructor's qualifications, the unique student body, class size, and overall environment and philosophy of the school.

Content is categorized by topic and is presented in four clusters (K-2, 3-5, 6-8, 9-12) with allowances for progression. Some regard is given but not restricted to *prioritized teaching order*. Elements listed (e.g., push-pull, collapse, rise, etc.) within an objective and across objectives are not in any hierarchical placement. They are listed as examples to be integrated into the lesson plan appropriate to the teacher's expertise and the students' needs and abilities. Similarly, examples of techniques are not representative of status or educational preference.

The content standards represent seven topics or categories of knowledge, derived from a DBAE (Discipline Based Arts Education) framework. These include:

- Training and technique
- Elements of movement
- Criticism
- Composition (includes aesthetics)

- Multi-cultural context
- Dance wellness
- Interdisciplinary studies

Topics for content standards sometimes overlap and intersect; however, the one indicated in the topic column is the major focus.

The terms *Dance Technique Principles* and *Elements of Movement* are used. Elements of Movement includes aspects of *space, shape* and *force*. The writers of this document recognize and agree that *time* is often referred to as an element of movement, but it is addressed through the interdisciplinary nature of music as it relates to dance. For clarification, the glossary offers definitions of other terms used in the QCC document. This is by no means a complete list of dance terminology. Resources are provided for further reference.

Dance Glossary

Aesthetic criteria. Standards on which to make judgments about the artistic merit of a work of art.

Alignment. Proper body posture for dance.

Artistry. Creative expression of one's thoughts, feelings, and ideas through an artistic performance.

Body shapes. The spatial contour the body makes such as curved, angular, twisted, or straight.

Centering. Using proper body alignment to maintain one's balance.

Choreographic structure. The specific compositional forms in which movement is structured to create a dance, such as themes, variation, canon, aba, rondo, etc.

Choreography. The process of making a dance which involves the understanding of choreographic principles, processes, and structures.

Clarity. Execution of technical dance steps in a clear and concise manner.

Combination: Series of technical dance steps performed by the dancer.

Composition. Using combinations of movement or movement phrases to form a greater body of work.

Dynamics. The expressive content of human movement, sometimes called qualities, in particular, the way in which energy is used.

Energy. An element of dance; the force and quality of movement defined by the degree of impetus and effort.

General space. A defined area of space through which dancers can travel using all the available space. The area of space could include a dance studio, gym, or classroom.

Improvisation. Movement that is created spontaneously; occurring within free structured environments, but always with an element of chance. Provides the dancer with opportunity to bring together elements quickly, and requires focus and concentration. Improvisation can be instant and simultaneous choreography and performance.

Kinesthetic awareness. The ability of the body's sensory organs in the muscles, tendons, and joints to respond to stimuli while dancing or viewing a dance.

Levels. The height of the dance in relation to the floor. Levels in space are referred to as high, middle, and low.

Locomotor movement. Movement that travels from place to place, usually identified by weight transference on the feet. Basic locomotor steps are the walk, run, leap, hop, and jump and the irregular rhythmic combinations of the skip, glide and gallop.

Movement quality. The identifying attributes created by the release, follow-through, and termination of energy, which are key to making movement become dance. Typical terms denoting qualities include sustained, percussive, collapse, and vibratory. It also includes the effort actions created by specific combinations of space, time, and energy, such as float, dab, punch, glide, press, flick, slash, and wring developed by Rudolph Laban.

Movement phrase. Dance sequences that have a sense of completion.

Movement theme. A complete idea in movement that is manipulated and developed within a dance.

Musicality: Ability to respond to a rhythm while moving.

Negative space. The empty or open space created when a shape is made by the body.

Nonlocomotor/axial movement. Any movement that occurs in one location in space using the available space in any direction or movement organized around the axis of the body rather than designed for travel from one location to another. Bending, twisting, stretching, and swinging are examples of axial movement.

Partnering. Leading, following, or mirroring someone.

477

Pathway. The path traced as movement proceeds through space. A pathway may be either on the floor or through the air and is constructed of straight and/or curved lines.

Personal space. The “space bubble” or the kinesphere that one occupies; it includes all levels, planes, and directions both near and far from the body’s center.

Positive space. The filled space created by the body when a shape is made in space.

Rhythmic acuity. The kinesthetic, auditory recognition of, and response to various complex time elements.

Spatial concept. One’s relationship to the space around them.

Style. A distinctive manner of moving; the characteristic way dance is done, created, or performed that identifies the dance of a particular performer, choreographer, or period (e.g., ballet, modern, jazz, folk, tap).

Time. An element of dance which measures tempo/speed and force/energy.

Technique. Refined physical skills pertaining to a particular style of dance.

Time. The quality of movement dealing with speed, tempo, rhythm, and duration of an action or phrase.

Vibratory. Percussive movement; a series of quivering, fluttering movements when extreme tension is applied to the body.

Warm-up. Movements and/or movement phrases designed to raise the core body temperature, move the body through a preparatory range of movement, and bring the mind into focus for the dance.

Strand	Content Standard	Topic	Concept	Notes
--------	------------------	-------	---------	-------

Fine Arts: Dance: Grade 6-8**Artistic Skills and Knowledge: Creating, Performing, Producing**

FAD.6-8.1	Participates in warm-up sequences based on specific dance techniques (e.g., Graham, Cecchetti, Luigi).		Training and Technique	
FAD.6-8.2	Identifies health issues important to dance training.		Dance Wellness	
FAD.6-8.3	Recognizes and uses dance as a means of physical fitness and wellness.		Dance Wellness	
FAD.6-8.4	Explores principles of anatomy and injury prevention integral to dance training.		Dance Wellness	
FAD.6-8.5	Discusses health issues and nutrition important to dance training.		Dance Wellness	
FAD.6-8.6	Demonstrates a synthesis of dance technique principles.		Training and Technique	
FAD.6-8.7	Combines elements of movement in long phrases demonstrating change of level, beginning, middle, end, spatial patterns, and dynamics.		Training and Technique	
FAD.6-8.8	Demonstrates expanded range and application of dance terminology.		Training and Technique	
FAD.6-8.9	Demonstrates a general knowledge of technical skills from different styles of dance.		Training and Technique	
FAD.6-8.10	Exhibits positive work habits and self-discipline in the study of dance.		Training and Technique	
FAD.6-8.11	Demonstrates individuality of expression in performance.		Training and Technique

Introduction to Music Quality Core Curriculum K-12

In revising the Georgia Quality Core Curriculum (QCC) for Music, the music subcommittee of the fine arts committee, maintains the emphasis on content knowledge, aesthetic analysis and appreciation, and creative and technical skills. The original draft of the music curriculum was submitted to schools during the winter of 1997. More than 200 pages of educators' responses to the initial draft were studied carefully by the committee, and many further revisions were made based on those responses. The scope and sequence of the instructional program have been correlated through all music areas. The fine arts committee defined four strands for the arts that provided the overall framework for the revision. This music guide delineates the strands, topics, and content standards which are expected of all participants. Connections with all fine arts and other curricula have been addressed, and uses of technology resources have been identified.

Knowledge and understanding of music are essential components of education. Music is a valid core discipline in its own right; however, music enhances problem-solving skills, improves discipline, and cultivates social development. The revised QCC for Music includes content standards for General Music (K-8), Band (4-12), Choral (4-12), String Orchestra (4-12), Guitar/Class Piano (6-12), Music Appreciation (6-12), and Music Theory and Composition (9-12).

The fundamental purpose of the study of music in the schools is to develop (1) artistic skills and knowledge, such as creating, performing, and producing; (2) critical analysis and aesthetic understanding; (3) interdisciplinary connections; and (4) historical and cultural context.

Students in the early stages of music education learn by doing. Singing, listening, playing instruments, moving, performing, and creating enable them to develop artistic skills and knowledge. This also provides students with an insight into the form and structure of music - developing their creativity. Broad experience with a variety of music assists the student in making informed musical judgments. The experience further enables them to understand the connections and relationships to other disciplines. Students must be exposed to and understand their own historical and cultural heritage as well as that of others.

The committee encourages the use of available technology to reinforce and enhance student exploration and technical development and to assist them in transcribing and composing music. We also recognize the importance of collaboration among the arts and other disciplines in producing performances.

Students who receive General Music instruction once during the middle school should be taught from the content standards of the sixth grade General Music curriculum. The music appreciation curriculum may be selected in place of the General Music curriculum if music is taught in an exploratory program of six or nine weeks. A curriculum in choral, band, and stringed instruments for grades 4-8 has been provided, taking into account the differences in school systems' course offerings. Each school system is to use the part of this curriculum that applies to it and correlate the curriculum with the grade in which these subjects are taught. School systems should use the content standards that are developmentally appropriate for the students in their music programs.

Many music programs include auxiliary performing groups that are outgrowths of the basic programs. Such groups may include jazz ensemble, show choir, boys' and girls' ensembles, and chamber groups. While no specific content standards were designated for these organizations, the curricula for band, chorus, and orchestra were developed around accepted principles of good musicianship. These standards should be used to guide the training of students in the auxiliary music programs as well as the basic programs.

Music Glossary

Articulation. In performance, the characteristics of attack and decay of tones and the manner and extent to which tones in sequence are connected or disconnected.

Body percussion. Sounds produced by use of the body, e.g., clap, snap, pat, tap, stamp, whistle, etc.

Classroom instruments. Instruments typically used in the general music classroom including, e.g., recorder-type instruments, auto harp, mallet instruments, simple percussion instruments, fretted instruments, keyboard instruments, and electronic instruments.

Competency level. Proficiency level corresponding with the musical ability of the student.

Cultural. The customs and/or beliefs of a racial, religious, or social group.

Chording instruments. Instruments which enable the performer to sound chords.

Dynamic levels, dynamics. Degrees of loudness.

Developmentally appropriate. The instructional level at which students may most effectively assimilate new information.

Elements of music. Pitch, rhythm, harmony, dynamics, timbre, texture, form.

Environmental sounds. Sounds that naturally occur or which can be produced from materials found in the environment.

Expressive qualities. Any articulation, dynamic, or tempo marking used to interpret music.

Ethnic music. Musical forms or styles indigenous to a specific culture.

Folk source. Identification of a specific genre.

Form. The overall structural organization of a music composition (e.g., AB, ABA, call and response, rondo, theme and variations, sonata-allegro) and the interrelationships of music events within the overall structure.

Formal structure. See *Form*.

Genre. A type or category of music (e.g., sonata, opera, oratorio, art song, gospel, suite, jazz, madrigal, march, work song, lullaby, barbershop, Dixieland).

Intonation. The degree to which pitch is accurately produced in performance, particularly among the players in an ensemble.

Line notation. Horizontal or vertical use of a line to denote rhythm, beat, pitch, and melodic direction.

Meter. The grouping in which a succession of rhythmic pulses or beats is organized; indicated by a meter signature at the beginning of a work.

Meter signature / time signature. An indicator of the meter of a musical work, usually presented in the form of a fraction, the denominator of which indicates the unit of measurement and the numerator of which indicates the number of units that make up a measure.

Media. Written, visual, audible, and technological resources.

Musical heritage. Knowledge of historical and cultural backgrounds.

Ostinato. Short musical patterns that are repeated persistently through some composition.

Pre-notation symbols. Line notation of rhythm and/or melody.

Style. The distinctive or characteristic manner in which the elements of music are treated. In practice, the term may be applied to, e.g., composers (the style of Copeland), periods (Baroque style), mediums (keyboard style), or genre (operatic style, bluegrass style).

Technical accuracy, technical skills. The ability to perform with appropriate timbre, intonation, and diction and to play or sing the correct pitches and rhythms.

Timbre. The character or quality of a sound that distinguishes one instrument, voice, or other sound source from another.

Tonality. The harmonic relationship of tones with respect to a definite center or point of rest; fundamental to much of Western music from ca. 1600.

Technique. The ability to perform with appropriate timbre, intonation, and diction; to play or sing the correct pitches and rhythms.

Technology. A manner of accomplishing a task using technical processes and equipment, methods, and knowledge.

Texture. The quality of sound produced by using a greater or lesser number of musical instruments, voices, or chordal tones within a given section of a musical composition.

FAM(GM).7.12

Constructs major and minor scales and chords in keys up to three sharps and flats.

Knowledge

Harmony

Connections**FAM(GM).7.13**

Integrates many elements of the study of music with other art forms, curricular areas, and related use of technology.

Expressive Qualities, Melody, Rhythm, Harmony, and Timbre

Critical Analysis and Aesthetic Understanding**FAM(GM).7.14**

Describes the expressive effect of music in terms of its elements: melody, rhythm, harmony, timbre, and tonality.

Knowledge

Expressive Qualities, Melody, Rhythm, Harmony, and Timbre

FAM(GM).7.15

Critiques music performed in class and suggests ways of improving the performance.

Knowledge

Expressive Qualities, Melody, Rhythm, Harmony, and Timbre

FAM(GM).7.16

Contrasts performances of the same composition.

Listening skills

Expressive Qualities, Melody, Rhythm, Harmony, and Timbre

Historical and Cultural Context**FAM(GM).7.17**

Listens critically to music in a variety of instrumental and vocal styles and origins and describes with attention to time, place, composer, and performance.

Listening skills

Expressive Qualities and Musical Heritage

FAM(GM).7.18

Uses print and nonprint media to locate information about music and musicians.

Knowledge

Musical Heritage

FAM(GM).7.19

Identifies composers, performers, small ensembles, and large performing groups representing a variety of styles of music.

Appreciation

Musical Heritage

FAM(GM).7.20

Relates the role of music to the cultural expression of ethnic groups represented in society.

Appreciation

Musical Heritage

FAM(GM).7.21

Describes career opportunities in the field of music.

Introduction to Theatre Quality Core Curriculum K-12

Philosophically, the Theatre K-12 Quality Core Curriculum (QCC) is discipline-based and uses a process approach to learning. The Theatre QCC was developed based on the continuum of skills and an expectation of a maturing of skills from K-12 that would lead to an acquisition of theatre knowledge and skills. The QCC was built to accommodate the diversity of programs and offerings across the state; it allows, at each grade level, for each school system or school program to choose from the listed objectives to design class curricula that will address that population's needs. While the Theatre QCC was designed as a nonsequential K-12 program, it was crafted as an inclusive set of content standards that would lead to a complete theatre experience K-12.

The content standards were designed for depth and breadth of learning in theatre. They offer an optimum experience for the student at any grade level. Teachers may develop courses by choosing the number and depth of content standards that they decide is appropriate for their schools and classes.

The Theatre QCC provides local systems and schools a high-level outline of what can be taught in various grade levels and courses in Theatre. It can be used as a discrete theatre curriculum or as a support for interdisciplinary theatre education, particularly in grades K-8. In high school, the QCC provides a general course outline for a thorough theatre background. The QCC does not include recommendations, for assessment was seen to be a more system-specific activity, given the nature of diversity of each system's theatre programs.

Philosophically, the QCC celebrates the theatre arts as a vital part of life's learning. It makes connections within the arts and with other disciplines. Its design supports a continual growth in sophistication and depth of understanding in theatre and helps students understand artistic discipline while growing to love the passion for life that theatre celebrates.

While theatre education is not a required section of the Georgia QCC, it is essential to a well-rounded education. The Theatre QCC will help students and teachers continue to be lifelong learners and lifelong contributors to theatre.

Theatre Glossary

Aesthetic criteria. Criteria developed about the visual, aural, and oral aspects of the witnessed event, derived from cultural and emotional values and cognitive meaning.

Aural. Physical element involving listening.

Drama. A literary composition intended to portray life or character or to tell a story usually involving conflicts and emotions exhibited through action and dialogue, designed for theatrical performance.

Electronic media, Dramatic media. Means of communication characterized by the use of technology, such as film, radio, computers, television, virtual reality.

Ensemble. Dynamic interaction and harmonious blending of the efforts of the many artists involved in the dramatic activity of a theatrical production.

Environment. Physical surroundings that establish place, time, and atmosphere/mood; the physical conditions that reflect and affect the emotions, thoughts, and actions of characters.

Front of house. The box office and lobby.

House. Commonly defined as the area in which the audience is seated.

Improvise. To spontaneously use movement and speech to create a character or object in a particular situation.

"In character." Theatrical term referring to an actor/actress portraying someone or something else while on the stage.

Kinetic. Physical element involving movements of the body.

Motivation. The actor's reason for doing or saying something.

Oral. Physical element involving the use of the voice.

Pitch. The highness or lowness of one's voice.

Properties (Props). Any object used by actors to enhance character portrayal.

Sensory recall. To remember a sensation and recreate the physical activity associated with that sensation in a dramatic activity.

Tempo. The speed at which someone talks or the pace of production.

Theater. The place that is the setting for dramatic performances.

Theatre. The imitation/representation of life, performed for other people; the performance of dramatic literature.

Three dimensional character. A character that has a variety of emotions, strengths, and weaknesses.

Tone. The quality or attitude portrayed using one's voice (gruffness, sweetness, etc.)

Underrepresented artist. Those who work in nontraditional art forms.

Visual. Physical element involving sight.

Introduction to Theatre Quality Core Curriculum

6-8

Students are encouraged toward self-actualization in the middle grades. They are given many content areas to explore. Theatre should attempt to build their self-confidence and connect many of the areas of exploration. The QCC specifically connects to the middle grades Social Studies QCC in content specifics and the Language Arts QCC in process emphasis. A major focus begins in sixth grade with presentational theatre; in eighth grade, the focus begins to change to representational theatre, preparing students for the representational focus in their high school classes. The overall focus is process work, which leads to presentational work when the teacher decides it is appropriate. The Theatre 6-8 QCC is designed as an exploratory curriculum. It allows teachers to select specific standards to teach in conjunction with Social Studies or English, or to teach standards in separate Theatre classes.

Introduction to Visual Arts Quality Core Curriculum K-12

Visual arts education is basic to developing fully literate citizens. Instruction in studio, art history, aesthetics, and art criticism enables students to attain higher levels of performance, critical thinking, and aesthetic judgment.

The strands reflected in the curriculum reveal content standards specified by theater, dance, music, and visual arts.

Critical Analysis and Aesthetic Understanding

Responding to the visual arts involves perception, which is a precursor to the creative process of thinking, imagining, and designing. Perception is the visual and sensory awareness of impressions, images, relationships, experiences, and feelings. The process of visually perceiving encompasses an awareness of the elements of art and the principles of design and how they function and interrelate.

Responding to the arts also involves developing the ability to analyze critically and judge aesthetically works created by artists. Describing and evaluating the media, processes, and meanings of works of visual art and making comparative judgments about them is an integral part of the learning process. Aesthetics is a philosophy concerned with determining the nature and value of art; it is a means of interpreting the deepest human expressions. Methods of inquiry that allow for the examination of complex ideas in structured, sequential ways provide the basis for aesthetic education.

Artistic Skills And Knowledge: Creating, Performing and Producing

Developing skills and organizing knowledge for creating and producing visual art involves continuous exposure to and experimentation with a wide range of artistic processes, tools, and materials. This framework promotes the acquisition of new ways of thinking, working, communicating, reasoning, and investigating.

Creating is at the heart of this instruction. Students learn to coordinate their hands and minds in explorations of the visual world. They learn to make choices that enhance communication of their ideas. Natural inquisitiveness is promoted, and students learn the value of perseverance. This is accomplished through a wide range of visual arts experiences including traditional media and processes and those created by new forms of technology.

Art History: Historical and Cultural Context

Examining the arts involves the study of works of art, style, and movements within their appropriate historical and cultural context. Understanding the connection between art styles and lifestyles in various cultures is important in the study of art. Students become aware that great works of art are a means of understanding human ideals and aspirations, and a means of appreciating the heroic, comic, and tragic aspects of human affairs. Experiences and achievements of individuals and societies are reflected through the history of visual art.

Interdisciplinary Connections

Identifying and expanding the connections within the arts and other disciplines balances the curriculum to help develop the whole intellect. Concepts common to other academic areas are integrated and promoted in the content standards. The goal of the art teacher should be to incorporate a holistic approach to education in the arts.

Visual Arts Glossary

Abstract. Generalized art which retains the essence or characteristics of a recognizable subject or object.

Additive sculpture. Modeling a sculpture by adding materials to it until the desired effect is maintained.

Aerial perspective. The illusion of space on the picture plane created by means other than linear perspective such as contrast, warm and cool colors, etc.

Aesthetics. A branch of philosophy that focuses on the nature of beauty, the nature and value of art, and the inquiry processes and human responses associated with those topics.

Airbrush. Atomizer operated by compressed air used for spraying paint.

Analogous. Three colors that are next to each other on a color wheel and which have a common hue.

Analysis. Identifying and examining separate parts as they function independently and together in creative works and studies of the visual arts.

Animation. The illusion of movement caused by successive presentations of inanimate objects in rapid order.

Architecture. The art of designing and planning the construction of buildings, cities, and/or bridges.

Art history. A record of the visual arts, incorporating information, interpretations, and judgments about art objects, artists, and conceptual influences on developments in the visual arts.

Arts disciplines. Studies which include dance, music, theatre, and visual arts.

Assess. To analyze and determine the nature and quality of achievement through means appropriate to the subject.

Asymmetrical balance. An equal distribution of weight (physically or visually) achieved without identical units on both sides. One large shape or form may be balanced by several smaller ones. Also known as informal balance.

Aural. Art that incorporates sound.

Background. The part of the picture plane that seems to be farthest from the viewer.

Balance. A principle of design referring to a feeling of equality in weight, attention, or attraction within a composition.

Batik. A system of dyeing fabric in which selected areas are protected from the dye with wax.

Biomorphic. See organic.

Calligraphy. The art of lettering.

Ceramics. Handbuilt or wheelthrown sculpture or vessels made of clay which can be fired, or fired and glazed.

Collage. A collection of materials arranged for a composition or design on a flat surface.

Color. A visually perceived hue.

Color scheme. Plan for organizing color.

Complementary. Colors opposite each other on a color wheel that contrast with each other.

Composition. The way in which the parts of an artwork are put together or organized.

Content. Message the artist is trying to communicate in a work of art.

Context. A set of interrelated conditions (such as social, economic, political) in the visual arts that influence and give meaning to the development and reception of thoughts, ideas, or concepts and that define specific cultures and eras.

Contour. Interior and exterior edges of objects.

Contour line. A line that follows the edges or edge of a shape or form.

Contrast. Refers to differences in values, colors, textures, and other elements in an artwork used to achieve emphasis and interest.

Cool colors. Colors that suggest a cool, soothing feeling or mood. Cool colors are blues, some greens, and some violets. Cool colors appear to recede spatially in artwork.

Create. To produce works of visual art using materials, techniques, processes, elements, and analysis; the flexible and fluent generation of unique, complex, or elaborate ideas.

Critical process. Description, analysis, interpretation, and evaluation used in discussing artworks.

Criticism. Describing and evaluating the media, processes, and meanings of works of visual art, and making comprehensive judgments.

Critique. To review, analyze, and discuss works of art.

Cross cultural. Art across cultures (intercultural).

Culture. Behaviors, customs, ideas, and skills of a distinct group of people.

Dominance. A principle of design where one element is emphasized.

Edition. A set number of productions of a work of art.

Elements of design. Line, shape, form, color, space, texture, and value.

Emphasis. A principle of design that refers to the use of areas that lead the eye from one part to another and then to the most important part of a composition.

Enameling. The process of firing special powder or enamel pigments on copper or silver in a kiln.

Ethnic art. Art inspired by a specific culture.

Exhibitions. An organized display of works of art.

Explore. A general concept used in this document that may include compare, contrast, identify, create, discuss, use, etc.

Expression. A process of conveying ideas, feelings, and meanings through selective use of the communicative possibilities of the visual arts.

Fiber arts. Arts which include techniques such as stitchery, weaving, tapestry, basketry, papermaking, softsculpture, batik, needle arts, etc.

Folk art. A style portraying the lives of the common people of a certain region. It generally covers decorative crafts and painting or sculpture produced for practical reasons.

Foreground. The space which appears to be closest to the viewer.

Form. 1. Any style or arrangement which may be repetitive; 2. An arrangement which is the accepted structure.

Free-flowing (Free-form). Any curvilinear, asymmetrical shape not bound by hard edges.

Functional art. Art designed for a certain purpose.

Functions (and purposes) of art. Describes the context and reasons, the desired results, for which the artwork was created. In art education, students examine and use subject matter, themes, and symbols, as well as formal characteristics of art works to give meaning to art content.

Geometric form. Mathematical three-dimensional shapes; cube, triangle, square, pyramid, etc.

Geometric shapes. Two-dimensional shapes created by exact mathematical laws; oval, circle, square, triangle, and rectangle.

Glazing. A technique used in painting in which pigment mixed with a transparent medium is layered, allowing underlying colors to show through. Glazing in ceramics is the process of applying glaze to clay work.

Gradation. A gradual smooth change from light to dark, rough to smooth, or one color to another.

Graphic design. A category of art that includes designing for commercial purposes, packages, signs, and advertisements.

Handbuilding. A process used in ceramics that incorporates slabwork, coils, and sculptural elements.

Harmony. The unity of all visual elements of a composition achieved by the repetition of the same characteristics or those which are similar in nature.

Horizon line. The line, either real or implied, in a work of art that marks where the sky and the ground appear to meet.

Hue. The name of a color.

Illustration. A work of art that usually seeks to join visual and discursive information for the purposes of communication.

Intensity. The brightness (purity) or dullness of a color, also known as chroma.

Intermediate colors (Tertiary). A color made by mixing a primary color with a secondary color.

Jewelry. A functional art form that involves assemblage and/or sculptural techniques to create ornamental objects, i.e., metalsmithing, lapidary, enameling, beading.

Kinetic. Art designed to move by natural or man-made forces.

Line. An uninterrupted actual mark or implied direction going from one point to another.

Linear perspective. Showing depth and distance in a picture with converging lines.

Maquettes. A small sculpture made as a preliminary model.

Materials. Resources used in the creation and study of visual art, such as paint, clay, cardboard, canvas, film, videotape, models, watercolors, wood, and plastic.

Media. Broad categories for grouping works of visual art according to the art materials used.

Media arts. Art forms that deal with electronic technologies.

Middle ground. A term used to define a level surface behind the foreground and in front of the background.

Mixed media. The use of different materials in the same work of art.

Model or modeling. To shape or build up with malleable media.

Monochromatic. Uses only one hue and variations obtained from its tints, shades, and tones.

Montage. A composite picture resulting from the placing of objects, materials, prints, or photographs in a preconceived design.

Mosaic. A method of decoration using small pieces of colored glass, stone, or ceramics which are inlaid on a background to form a design or picture.

Motif. A recurring element, subject, or theme in works of art.

Movement. A principle of design that refers to the arrangement of elements in an artwork organized in such a way as to create a sense of motion.

Movements (arts). Refers to an historical or cultural period when certain styles became prevalent.

Multi-cultural. Refers to more than one culture.

Negative space. The space around and through a shape or object.

Neutral colors. Colors formed by mixing complementary colors on the color wheel.

Non-objective. Shapes/forms created with no regard to an identifiable subject or object.

One-point perspective. A system of creating the illusion of space in the picture plane using one vanishing point.

Organic form. Three-dimensional free-flowing shapes found in nature.

Organic shape. Two-dimensional or flat free-flowing shapes found in nature.

Origami. The art of Oriental paper folding.

Papier Maché. A technique used to create three-dimensional forms with a mixture of shredded or torn paper and paste.

Pattern. Repetition of a motif involving line, shape, color, value, or space in a composition.

Perception. Visual and sensory awareness, discrimination, and integration of impressions, conditions, and relationships with regard to objects, images, and feelings.

Perspective. The representation of three-dimensional objects on a flat, two-dimensional surface; one-point, two-point, linear, aerial/atmospheric.

Photogram. A process in which light-sensitive paper is exposed with objects to create positive and negative space.

Photography. The technique of capturing optical images on light sensitive surfaces.

Pin hole camera. A hand made camera using a pin hole opening to expose the film to light.

Pointillism. A method of painting in which the dots of colors blend visually from a distance to create the illusion of forms, shapes, and outlines.

Portfolio. A comprehensive collection of student work.

Positive space. The space in a composition occupied by the subject or objects.

Primary colors. Red, yellow, blue.

Principles of design. Rhythm/movement, balance, unity/harmony, dominance/emphasis, repetition/pattern, proportion/scale, and contrast/variety.

Printmaking. The design and production of prints through a graphic art process. Processes may include intaglio, monoprint, silkscreen, stamp, engraving, lithograph, collograph, etc.

Process. A complex operation involving a number of methods or techniques, such as the addition and subtraction processes in sculpture, the etching and intaglio processes in printmaking, or the casting or construction processes in making jewelry.

Proportion. Scale or relationship of one part of a work of art to the other and to the whole.

- **Figure** (adult 7 1/2 heads high). Three and one-half heads from waist to top of head; four from waist to toes. Arms fall at mid thigh.
- **Portrait.** Eyes are one-half distance from top of head. Nose is one-half distance between eyes and chin. Mouth is one-half distance between nose and chin.

Radial balance. Type of balance in which forces or elements of a design come out from a central point.

Realism. A style of art that portrays people, objects, or places as we actually see them. Realistic art portrays lifelike colors, textures, shadows, proportions, and arrangements.

Repetition. A principle of design where a single element appears again and again. A technique for creating rhythm and unity.

Rhythm. Repetition of visual elements such as lines, shapes, or colors that may suggest movement.

Scale. Proportion.

Sculpture. Three-dimensional art forms created from processes of carving, modeling, and/or assemblage.

Secondary colors. Colors created by mixing two primary colors; orange, green, and violet.

Self-portrait. A rendering of the artist's own likeness.

Shade. A color with black added to it to change color value.

Shading. Gradation of tone or filling in areas through shadows.

Shape. Any two-dimensional area defined by line, color, tones, or edges.

Space. A perceived area or surface.

Spatial. Of, or existing, in space.

Split-complementary colors. A color and the two colors on either side of its complement on the color wheel.

Stained glass. Colored glass cut into pieces, arranged in a design, and joined with strips of lead.

Structures. Means of organizing the components of a work into a cohesive and meaningful whole, such as sensory qualities, organizational principles, expressive features, and functions of art.

Style. An artistic technique or way of expressing, using materials, constructing, or designing that is characteristic of an individual, group, period, or culture.

Subtractive sculpture. Process in which three-dimensional form is created by removing, cutting away, or carving out unwanted materials.

Symbol. Something that stands for, or represents, something else.

Synthesis. Combining of parts into a whole.

Tactile. Appealing to the sense of touch.

Techniques. Specific methods or procedures used in a larger process; for example, gradation of value or hue in painting, or conveying linear perspective through overlapping, shading, or varying size or color.

Technologies. Complex machines used in the study and creation of art, such as lathes, presses, computers, lasers, and video equipment.

Temporal. Worldly; or time; art enduring for a time.

Tertiary. The combination of a primary and a neighboring secondary color on the color wheel. Also known as intermediate colors.

Texture. The tactile quality of a surface. Actual - the physical roughness or smoothness of a surface. Simulated - the illusion of roughness or smoothness of a surface.

Theme. A subject or topic in artwork.

Three-dimensional form. Objects which have height, width, and depth.

Thumbnail sketches. Small drawings used to develop an idea or composition.

Timeline. Chart showing the chronological progression of art history.

Tint. A color with white added to raise or lighten its value.

Tone. Changes in intensity.

Triadic. The colors found on the color wheel which form an equilateral triangle.

Two-dimensional. Flat area having height and width but no actual depth.

Two-point perspective. Perspective viewed when an object is observed from an angle. There are two vanishing points.

Unity. A principle of design referring to the arrangement of a work in which all parts seem interrelated.

Value. The element of art that refers to the lightness or darkness of an object or color.

Value scale. Gradation of dark to light usually made on a scale of 1-10.

Variety. A principle of design concerned with difference or contrast.

Visual art. A broad category that includes the traditional fine arts such as drawing, painting, printmaking, sculpture; communication and design arts such as film, television, graphics, product design; architecture and environmental arts such as urban, interior, and landscape design; folk arts; and works of art such as ceramics, fibers, jewelry, works in wood, paper, and other materials.

Warm colors. Colors which appear to advance spatially in an art work and suggest a warm, hot, or active mood. Warm colors include reds, yellows, and oranges.

Introduction to Visual Arts Quality Core Curriculum Middle School Art

Content standards in the middle grades are designed to expand the students' knowledge of concepts and skills. Visual arts curriculum is designed to integrate with other disciplines at the middle school level and address the needs of learners with different social and cultural backgrounds. The curriculum reflects the adolescent's and preadolescent's need to develop collaborative and teamwork skills, technological competencies, flexible thinking, and appreciation for diversity.

Middle grades content standards are built upon the K-5 curriculum. Often, middle grades art programs are taught as six-, nine-, or 12-week rotations. Standards, therefore, are clustered to provide the middle grade teacher flexibility in presenting standards of different grade levels.

It is recommended that students who have not experienced formal visual arts education prior to the middle school experience use the K-5 content standards as a starting place, focusing on sequential order of content standards: criticism, art production, art history, and aesthetics.

Georgia's Quality Core Curriculum

Technology/Career Education Grades 6-8

Introduction to Technology/Career Education Quality Core Curriculum

6-12

The primary purpose of the revised Technology/Career QCC is to equip students with the academic, technical, and leadership skills that they will need to succeed in life. Through a partnership between education and industry, the Technology/Career curriculum will provide students with a solid foundation for their future careers.

Technology/Career education provides students with knowledge that enables them to continue learning on the postsecondary level and throughout their careers. The revised Technology/Career QCC facilitates development of programs of study that reflect career goals of individual students and incorporate current industry standards, high-level academic knowledge, and postsecondary requirements. The revised QCC also addresses the need to reinforce classroom skill development through participation in co-curricular vocational student organizations and structured work-based learning programs such as youth apprenticeship, internship, and cooperative education.

Because technology is evolving rapidly, the Technology/Career QCC standards are broadly based and permit development of curriculum that can be updated to meet changing industry standards. Each Technology/Career area has a common set of standards that address higher thinking, leadership, team cooperation, and other workplace readiness skills, as well as content standards specific to various occupational programs.

Georgia's Quality Core Curriculum

Agriculture Education Grades 6-8

Introduction to Agriculture Education Quality Core Curriculum

6-12

The Quality Core Curriculum (QCC) standards in Agriculture Education were revised with an emphasis on student needs based on changes in industry, education, and community needs and expectations. The Quality Basic Education Act charges the State Board of Education with establishing competencies that each student is expected to master and ensuring that each student has the opportunity to master them. The QCC standards in Agriculture Education were revised to meet these needs.

Local school systems are responsible for implementing the QCC according to state standards. Expansion and enrichment of this curriculum are needed to improve delivery and service to the students and community. The revision committee highly recommends the use of state-approved curriculum guides and course outlines in Agriculture Education to facilitate curriculum delivery.

PROCESS

The QCC revision process was started by establishing a framework for evaluating the QCC standards established in 1984. The committee set six relevant criteria for measuring proposed changes. Revisions to the QCC should:

- Reflect technological and biological advances in agricultural science, business, and industry
- Promote high academic achievement through application of basic academic skills
- Emphasize workplace competencies
- Reflect changes in the Agriculture Education program included in recent industry- validated curriculum guides
- Reflect Agriculture Education program philosophy, purpose, and goals
- Promote leadership development

A program outline was created as a foundation for review of the QCC standards. Using the program outline and the revision criteria, the committee reviewed and revised specific QCC statements.

CHANGES

Most changes in the QCC statements are in terminology and sequence. Additions to the QCC consist mostly of expansion of statements which give more and clearer emphasis to that area of curriculum. The use of technology was emphasized. Statements were written to promote the continuous incorporation and updating of technology in the curriculum. Statements regarding leadership and personal development, basic skills, and employability were expanded and clarified to promote greater emphasis in these areas. In addition these statements were considered important enough that they have been included in each subject area.

USE OF THE QCC

The QCC in Agriculture Education is organized by school level (high school and middle school) and into six major instructional areas identified by the State Department of Education:

- Agricultural Business Management
- Agricultural Mechanization and Technology
- Agricultural Production and Management
- Agriscience and Biotechnology
- Environmental Horticulture
- Conservation and Renewable Natural Resources

The QCC standards are arranged into a logical teaching and development sequence within these parameters. Each local school system is encouraged to build its curriculum in Agriculture Education through selection of subject and subject areas of instruction based on local community and student needs. Courses may be developed through adoption of the suggested QCC sequence or by using the eclectic approach based on local needs. Once course content has been determined using the QCC standards, a number of resources may be used to facilitate course development. These include state curriculum guides, textbooks, and industry-developed materials.

Georgia's Quality Core Curriculum

Grade 8

Georgia's Quality Core Curriculum

Language Arts Grade 8

Introduction to Language Arts Quality Core Curriculum K-12

The Quality Core Curriculum (QCC) originated in 1984 with a recommendation for review every five years. In 1996, teachers, administrators, parents, and business leaders throughout the state reviewed and analyzed the existing Quality Core Curriculum. The QCC revision process was an effort to update the curriculum, to reflect technological advances, and to create a more effective base for teaching. The Language Arts revision team refined the existing QCC Language Arts objectives to enhance clarity, accessibility, K-12 coordination, and academic excellence.

In order to promote these elements, the Language Arts revision team established a K-8 matrix that includes 9-12 core skills. The matrix is designed to provide a scope and sequence for the revised Language Arts QCC.

The revision team recommends that every Language Arts teacher receive a copy of the revised standards in order to implement the scope and sequence of the Language Arts content standards. Standards can be measured and taught by a variety of instructional strategies which actively engage and meet the needs of all students. The revision team sincerely desires that this QCC be a practical and valuable guide for Language Arts instruction in Georgia.

Language Arts

QCC Scope and Sequence

Oral Communication

Listening/Speaking

The Student:	K	1	2	3	4	5	6	7	8	9	12
Listens and speaks in informal conversations with peers and adults.	*										
Adapts or changes oral language to fit the situation by following the rules of conversation with peers and adults.		*	*	*	*	*	*	*	*	*	*
Listens to a variety of literary forms, including stories and poems.	*	*	*								
Listens and responds to a variety of literary forms.				*	*						
Listens and responds to a variety of literary forms including prose, poetry, and drama.						*	*	*	*	*	*
Follows one- and two-part oral directions.	*										
Follows two- and three-part oral directions.		*									
Follows three-part oral directions.			*								
Follows multiple oral directions.				*	*	*					
Follows oral directions and asks questions for clarification.							*	*	*	*	*

• Standards will be reinforced as necessary each subsequent year

Oral Communication
Listening/Speaking

The Student:	K	1	2	3	4	5	6	7	8	9_12
Repeats auditory sequences: letters, words, numbers, and rhythmic patterns.	*									
Recognizes rhyming words.	*									
Recites short poems, rhymes, songs, and stories with repeated patterns.	*									
Participates in choral speaking and creative drama.	*									
Recalls information presented orally.		*								
Recalls and interprets information presented orally.			*							
Uses oral language for different purposes: to inform, to persuade, and to entertain.			*	*	*	*	*	*	*	*
Recalls, interprets, and summarizes information presented orally.				*	*	*	*	*	*	*
Delivers a planned oral presentation.						*	*	*	*	*
Adjusts manner and style of speaking to suit an audience and situation.						*	*	*	*	*

• Standards will be reinforced as necessary each subsequent year

Oral Communication
Listening/Speaking

The Student:	K	1	2	3	4	5	6	7	8	9_12
Speaks so others can hear and understand.										*
Defends conclusions rationally.										*
Paraphrases and discusses information.						*	*	*	*	*
Summarizes and/or records orally presented information.						*	*	*	*	*
Interprets the meaning of questions in order to give an appropriate response.	*									
Responds to questions on orally presented materials.			*							
Responds appropriately to various types of questions on orally presented material.				*						
Responds to literal, inferential, and evaluative questions on orally presented material.					*	*	*	*	*	*
Increases vocabulary to reflect a growing range of interests and knowledge.	*	*	*	*	*	*	*	*	*	*

* Standards will be reinforced as necessary each subsequent year

Language Arts

QCC Scope and Sequence

Oral Communication

Listening/Speaking

The Student:	K	1	2	3	4	5	6	7	8	9_12
Communicates effectively when using descriptive language, relating experiences, and retelling stories.	*									
Communicates effectively when using descriptive language, relating experiences, and retelling stories read, heard, or viewed.		*	*	*	*	*	*	*	*	*
Uses a variety of language patterns and sentence structures.		*	*							
Uses increasingly complex sentence structures in oral communication.			*	*	*	*				
Determines the literal and figurative meaning of words.					*	*				
Demonstrates an understanding of words and ideas when heard in context.		*								
Determines the meaning of a word based on how it is used in an orally presented sentence.			*	*	*					
Adjust manner and style of speaking to suit an audience and situation.						*	*	*	*	*

- Standards will be reinforced as necessary each subsequent year

Oral Communication
Listening/Speaking

The Student:	K	1	2	3	4	5	6	7	8	9_12
Uses grade/age appropriate standard American English when communicating orally.			*	*	*	*				
Paraphrases and discusses information.						*	*	*	*	
Begins to discriminate between spoken words and sentences.	*									
Summarizes and/or records orally presented information.							*	*	*	
Blends sounds orally to make words.	*	*	*	*						
Divides words into syllables.		*	*	*						
Participates in oral presentations.							*	*	*	*
Participates in dramatic activities such as puppetry, pantomime, plays, choral speaking, and expressions.							*	*	*	
Develops awareness of nonverbal communication such as gestures, body language, and facial expressions.										
Uses standard conventions of American English in appropriate settings.							*	*	*	*

* Standards will be reinforced as necessary each subsequent year

Oral Communication
Listening/Speaking

The Student:	K	1	2	3	4	5	6	7	8	9	12
Listens and responds to various language patterns and literary forms including regional examples (dialect).							*	*	*		
Responds to literal, inferential, and critical questions.							*	*	*	*	*
Determines the denotative and connotative meanings of words in oral context.							*	*	*	*	*
Records orally presented information (note-taking).							*	*	*	*	*
Critically responds to various media. Evaluates messages and effect of mass media.							*	*	*	*	*

• Standards will be reinforced as necessary each subsequent year

Written Communication
Reading

The Student:	K	1	2	3	4	5	6	7	8	9_12
Recognizes own name in print.	*									
Recognizes words in familiar contexts.	*									
Recognizes common signs and logos.	*									
Holds print materials in correct position.	*									
Demonstrates left-to-right and top-to-bottom progression.	*									
Discriminates visual similarities and differences in words.	*									
Distinguishes between written letters, words, and sentences.	*									
Identifies upper- and lower-case letters of the alphabet out of sequence.	*									
Associates sounds with letters.	*									
Verbalizes consonant sound when shown the consonant letter.	*									
Recognizes rhyming words (e.g., CVC words, word families, etc.).	*									

• Standards will be reinforced as necessary each subsequent year

Written Communication
Reading

The Student:	K	1	2	3	4	5	6	7	8	9_12
Reads selected sight words.	*									
Recalls orally a series of three visually presented items.	*									
Uses words that signal sequence relationships such as first, next, and last.	*									
Classifies by characteristics such as color, size, shape, structure, and function.	*									
Sequences pictures to tell a story.	*									
Interprets pictures to identify main idea, sequence of events, cause/effect, and prediction of logical outcomes.	*									
Demonstrates an understanding that print makes sense by reading and explaining own writings and drawings.	*									
Increases vocabulary to reflect a growing range of interests and knowledge.	*	*	*	*	*	*	*	*	*	*

• Standards will be reinforced as necessary each subsequent year

Language Arts
QCC Scope and Sequence

Written Communication
Reading

The Student:	K	1	2	3	4	5	6	7	8	9_12
Distinguishes between letter/word, word/sentence, left/right, and beginning/ending of words and sentences.	*									
Classifies and categorizes words into sets and groups with common characteristics.	*	*	*	*	*	*	*	*	*	
Follows written directions.			*	*	*	*	*	*	*	*
Reads a variety of materials for information and pleasure.			*	*	*	*	*	*	*	*
Reads for a variety of purposes in different kinds of texts.				*	*	*	*	*	*	*
Applies phonetic strategies to read by: Using initial consonant substitution in rhyming words and word families. Using beginning, medial, and ending consonants to orally decode one and two syllable words. Using short, long, and "r" controlled vowel sounds to orally decode one and two syllable words.	*									
Using consonant blends and diagraphs to orally decode one- and two-syllable words.	*									

• Standards will be reinforced as necessary each subsequent year

Written Communication
Reading

The Student:	K	1	2	3	4	5	6	7	8	9_12
Applies phonetic strategies to read by: Using initial consonant substitution in rhyming words and word families.										
Using beginning, medial, and ending consonants to orally decode words.			*	*	*	*	*	*	*	*
Using short, long, and "r" controlled vowel sounds to orally decode words.			*	*	*	*	*	*	*	*
Using consonant blends, digraphs, and diphthongs to orally decode words.			*	*	*	*	*	*	*	*
Uses word order and sentence structure to read. (Syntax- "Does it sound right?")		*	*	*	*	*	*	*	*	*
Demonstrates an understanding of semantic relationships by using pictures, using context clues, word meanings, and prior knowledge in reading. (Semantics - "Does it make sense?")		*								
Demonstrates an understanding of semantic relationships by using context clues, word meanings, and prior knowledge in reading. (Semantics - "Does it make sense?")			*	*	*	*	*	*	*	*
Increases existing sight vocabulary (instant recognition).		*	*	*	*	*	*	*	*	*

* Standards will be reinforced as necessary each subsequent year

Written Communication
Reading

The Student:	K	1	2	3	4	5	6	7	8	9_12
Integrates language structure (syntax), meaning clues (semantics), phonetic strategies, and sight vocabulary when reading orally and silently.		*	*	*	*	*	*	*	*	
Reads with fluency and expression.		*	*	*	*	*	*	*	*	*
Recognizes EXPLICIT main ideas, details, sequence of events, cause-effect relationships in fiction and nonfiction.		*	*	*	*	*	*	*	*	*
Recognizes IMPLICIT main ideas, details, sequence of events, and cause/effect relationships in fiction and nonfiction.		*	*	*	*	*	*	*	*	*
Identifies the main characters.		*	*	*	*	*	*	*	*	*
Identifies the characters' actions, motives, emotions, traits, and feelings.		*	*	*	*	*	*	*	*	*
Draws conclusions and makes predictions and comparisons.		*	*	*	*	*	*	*	*	*
Draws conclusions, makes predictions, compares/contrasts, and makes generalizations.		*	*	*	*	*	*	*	*	*

• Standards will be reinforced as necessary each subsequent year

Written Communication
Reading

The Student:	K	1	2	3	4	5	6	7	8	9_12
Reads for understanding and rereads as needed for clarification, self-correction, and further comprehension.		*	*	*	*	*	*	*	*	*
Distinguishes between fact and opinion.					*	*	*	*	*	*
Demonstrates comprehension when reading a variety of literary forms (e.g., fiction, nonfiction, poetry, and drama).		*	*	*	*	*	*	*	*	*
Recognizes and reads compound words, contractions, possessives, and words containing the suffixes "ing," "ed," "s," and "es."		*	*	*	*	*				
Uses knowledge of root words, prefixes, and suffixes in word recognition.		*	*	*	*	*	*	*	*	*
Recognizes simple word opposites.	*	*	*							
Uses knowledge of synonyms, antonyms, and homophones when reading.				*	*	*	*	*	*	*
Identifies story development, author's purpose, and point of view.						*	*	*	*	*

* Standards will be reinforced as necessary each subsequent year

Written Communication
Reading

The Student:	K	1	2	3	4	5	6	7	8	9_12
Uses context clues to determine meaning of unknown words.							*	*	*	*
Adjusts reading speed according to purpose and rereads for comprehension.							*	*	*	*
Recognizes persuasion techniques in propaganda and advertising.							*	*	*	*

• Standards will be reinforced as necessary each subsequent year

Language Arts
QCC Scope and Sequence

Written Communication
Literature

The Student:	K	1	2	3	4	5	6	7	8	9_12
Experiences traditional and contemporary literature through a variety of media.	*	*	*	*	*	*	*	*	*	*
Responds to literal, inferential, and evaluative questions about literature.	*	*	*	*	*	*	*	*	*	*
Responds appropriately to questions about author's purpose, techniques, character development, and plot structure.					*	*	*	*	*	*
Demonstrates an interest in various types of self-selected literature through daily reading.		*	*	*	*	*	*	*	*	*
Identifies literary forms (e.g., fiction, nonfiction, poetry, and drama).		*	*	*	*	*				
Recognizes various forms of literature (short stories, novels, epics, poems, dramas, folk tales, essays, and myths).							*	*	*	*
Discriminates between realism and fantasy.		*	*	*						
Distinguishes between fact and opinion.					*	*	*	*	*	*

* Standards will be reinforced as necessary each subsequent year

Written Communication
Literature

The Student:	K	1	2	3	4	5	6	7	8	9_12
Recognizes cultural diversity represented in literature.	*	*	*	*	*	*	*	*	*	*
Responds to literal, inferential, and critical questions about literature.							*	*	*	*
Recognizes bias and stereotypes.							*	*	*	*
Recognizes relevance of data.							*	*	*	*
Interprets written instructions and other directive information.							*	*	*	*
Applies reading strategies to specific content and subject matter.							*	*	*	*
Identifies literary elements and techniques such as plot, setting, theme, characters, characterization, conflict, figurative language, and point of view.							*	*	*	*
Recognizes common elements of poetry (rhyme, rhythm, stanza, figurative language, etc.).							*	*	*	*
Experiences traditional and contemporary literature through a variety of media.							*	*	*	*

• Standards will be reinforced as necessary each subsequent year

Written Communication
Literature

The Student:	K	1	2	3	4	5	6	7	8	9_12
Recognizes writer's purpose in fiction and nonfiction.							*	*	*	*
Recognizes cultures and values represented in literature.							*	*	*	*
Recognizes that literature reflects human experience.							*	*	*	*
Responds creatively to literature, drama, art, and multimedia projects.							*	*	*	*
Identifies and chooses literature according to personal interests.							*	*	*	*

• Standards will be reinforced as necessary each subsequent year

Written Communication
Writing

The Student:	K	1	2	3	4	5	6	7	8	9_12
Dictates information for experience stories.	*									
Uses examples from literature to create individual and group stories.	*	*	*	*	*	*	*	*	*	*
Draws pictures and/or uses letters and phonetically spelled words to write about experiences, stories, people, objects, or events.	*									
Uses correct spelling for frequently used sight vocabulary.		*	*	*	*	*	*	*	*	*
Uses learned phonetic strategies to spell correctly.		*	*	*	*	*				
Writes a minimum of three sentences about a topic.		*	*							
Writes a short paragraph about a topic.				*						
Writes selections (compositions) of three or more paragraphs about a topic.					*	*	*	*	*	*

* Standards will be reinforced as necessary each subsequent year

Written Communication
Writing

The Student:	K	1	2	3	4	5	6	7	8	9_12
Writes about self-selected topics (e.g., personal experiences, book rewrites) using pictures, letter/sound associations, and known words.	*		*							
Writes about self-selected topics.				*	*	*	*	*	*	*
Writes in a variety of genres to produce paragraphs and compositions:										
Personal narratives				*	*	*	*	*	*	*
Imaginative stories				*	*	*	*	*	*	*
Responses to literature				*	*	*	*	*	*	*
Content area pieces				*	*	*	*	*	*	*
Correspondence (including writing letters and addressing envelopes).			*	*	*	*	*	*	*	*
Expository Pieces					*	*	*	*	*	*
Persuasive Pieces					*	*	*	*	*	*
Applies correct principles of grammar:										
Writes complete sentences			*							*
Uses correct capital letters			*							*
Uses correct punctuation			*							*
Applies correct rules of usage and expression.			*							*
Applies correct principles of grammar, parts of speech, usage, and mechanics:										
Writes complete sentences				*						*
Uses correct capitalization and punctuation				*						*

* Standards will be reinforced as necessary each subsequent year

Language Arts
QCC Scope and Sequence

Written Communication
Writing

The Student:	K	1	2	3	4	5	6	7	8	9_12
Uses correct word structure				*						*
Identifies types of sentences according to purpose: declarative, interrogative, imperative, and exclamatory				*						
Identifies the parts of a sentence in various sentence patterns (simple subject and predicate).				*						
Forms singular, plural, and possessive nouns.				*						
Applies standard conventions of American English in subject-verb agreement				*						*
Demonstrates knowledge of nouns, pronouns, verbs, and adjectives in writing simple sentences				*						
Applies correct principles of grammar, parts of speech, usage, and mechanics. (See also: reference to Grammar and Usage strand.)					*	*	*	*	*	*
Communicates ideas by using the writing process:										
PREWRITING										
Generates ideas	*	*	*	*	*	*	*	*	*	*
DRAFTING										
Focuses on topic										
Uses prewriting ideas to complete first draft	*	*	*	*	*	*	*	*	*	*

* Standards will be reinforced as necessary each subsequent year

Language Arts
QCC Scope and Sequence

Written Communication
Writing

The Student:	K	1	2	3	4	5	6	7	8	9_12
REVISING										
Expands use of descriptive words	*	*	*	*	*	*	*	*	*	*
Improves sequence		*	*	*	*	*	*	*	*	*
Adds variety of sentence types		*	*	*	*	*	*	*	*	*
Organizes writing to include a clear beginning, middle, and ending.		*	*	*	*	*	*	*	*	*
EDITING										
Begins each sentence and proper noun with a capital letter	*	*	*	*	*	*	*	*	*	*
Uses correct spelling	*	*	*	*	*	*	*	*	*	*
Uses appropriate punctuation	*	*	*	*	*	*	*	*	*	*
Uses complete sentences	*	*	*	*	*	*	*	*	*	*
PUBLISHING										
Shares writing with others.	*	*	*	*	*	*	*	*	*	*
Increases writing vocabulary.						*	*	*	*	*
Uses descriptive words and phrases.						*	*	*	*	*
Uses various organizational strategies, styles, and purposes.						*				
Experiments with organization, style, purpose, and audience.							*	*	*	*
Uses available technology to assist in writing.	*	*	*	*	*	*	*	*	*	*
Uses left to right pattern of writing.	*									

* Standards will be reinforced as necessary each subsequent year

Written Communication
Writing

The Student:	K	1	2	3	4	5	6	7	8	9_12
Prints name, self-selected words, and letters of the alphabet.	*									
Copies simple shapes, designs, numerals, and letters.	*									
Prints legibly:										
Correctly forms letters and numbers;		*	*							
Correctly spaces words and sentences.		*	*							
Begins to recognize cursive letters.			*							
Writes legibly:										
Correctly forms letters and numbers				*	*	*	*	*	*	*
Correctly spaces words and sentences				*	*	*	*	*	*	*
Writes paragraphs that include a unifying idea, a topic sentence, supporting sentences and details, and clincher sentence.										*

* Standards will be reinforced as necessary each subsequent year

Language Arts
QCC Scope and Sequence

Written Communication
Writing

The Student:	K	1	2	3	4	5	6	7	8	9_12
Uses various types of writing (personal, academic, business, and vocational).							*	*	*	*
Uses dialogue in writing.							*	*	*	*
Composes and revises using a computer.										*

* Standards will be reinforced as necessary each subsequent year

Written Communication
Grammar and Usage

The Student:	K	1	2	3	4	5	6	7	8	9_12
Identifies the types of sentences according to purpose: declarative, interrogative, imperative, and exclamatory.					*	*	*	*	*	
Identifies at least five parts of speech, including nouns, verbs, pronouns, adjectives, and adverbs.					*					
Identifies the eight parts of speech and their uses in a sentence.							*	*	*	
Identifies the parts of a sentence in various sentence patterns:										
subjects (simple and compound)					*					
predicates (simple and compound)					*					
modifiers					*					
Identifies the parts of a sentence in various sentence patterns:										
subject (simple and compound)						*	*	*	*	
predicates (simple and compound)						*	*	*	*	
modifiers (words and prepositional phrases)						*	*	*	*	
complements (predicate adjectives, predicate nominative, direct objects)							*	*	*	
Forms singular, plural, and possessive nouns.					*	*	*	*	*	*

* Standards will be reinforced as necessary each subsequent year

Language Arts

QCC Scope and Sequence

Written Communication

Grammar and Usage

The Student:	K	1	2	3	4	5	6	7	8	9_12
Identifies principal parts and tenses of regular and irregular verbs.					*	*	*	*	*	
Identifies types of pronouns: subject, object, possessive.					*	*	*	*	*	
Writes simple and compound sentences and avoids fragments and run-on sentences.					*	*	*	*	*	*
Applies standard conventions of American English in:										
Subject-verb agreement					*	*	*	*	*	*
Cases of personal pronouns					*	*	*	*	*	*
Principal parts of verbs					*	*	*	*	*	*
Comparisons of adjectives and adverbs					*	*	*	*	*	*
Pronoun/Antecedent							*	*	*	*
Applies standard rules of capitalization.					*	*	*	*	*	*
Applies standard rules of punctuation.					*	*	*	*	*	*
Spells frequently used words correctly and applies common spelling rules.					*	*	*	*	*	*
Identifies types of pronouns such as personal, interrogative, demonstrative.							*	*	*	*

Standards will be reinforced as necessary each subsequent year

Written Communication
Grammar and Usage

The Student:	K	1	2	3	4	5	6	7	8	9_12
Writes simple and compound sentences and avoids run-ons and nonfunctional fragments.							*	*	*	*
Combines sentences using coordination (i.e., compound sentences).							*	*	*	*

Standards will be reinforced as necessary each subsequent year

Written Communication
Reference-Study

The Student:	K	1	2	3	4	5	6	7	8	9	12
Explores the uses of the media center, picture books, audiovisual resources, and available technology for reading and writing.	*										
Alphabetizes words to the first letter.	*										
Alphabetizes words to the second letter.		*									
Alphabetizes words to the third letter.			*								
Uses alphabetical order to locate information.					*	*	*	*	*		
Uses picture dictionaries as information sources.	*										
Uses beginning dictionaries as information sources.		*									
Uses abridged dictionaries to identify appropriate word meanings or correct spellings.				*	*						
Uses dictionaries, thesauri, atlases, almanacs, periodicals, and encyclopedias, to locate information.						*	*	*	*	*	

• Standards will be reinforced as necessary each subsequent year

Language Arts QCC Scope and Sequence

Written Communication Reference-Study

The Student:	K	1	2	3	4	5	6	7	8	9_12
Uses guide words to locate words in dictionaries and topics in encyclopedias.			*							
Uses guide words in dictionaries, encyclopedias, etc., as aids for finding information.				*						
Uses guide words to locate information.				*	*	*	*	*	*	
Determines appropriate resource to answer specific questions.				*						
Locates information using the appropriate reference resources.						*	*	*	*	*
Recognizes the organization of fiction and nonfiction books in the media center.		*	*	*						
Uses call numbers to locate information in the media center.				*						
Recognizes the author, illustrator, and title as identifying items of information about a book.		*								
Recognizes the purpose of the title page and the table of contents.		*								

* Standards will be reinforced as necessary each subsequent year

Written Communication
Reference-Study

The Student:	K	1	2	3	4	5	6	7	8	9_12
Uses book parts including the title page, table of contents, and glossary as information sources.			*							
Uses book parts including title page, table of contents, index and glossary as information sources.				*	*					
List sources from which information is gathered, including author, title, publisher/producer, place of publication and copyright date.					*	*	*	*	*	*
Uses easy fiction books, nonfiction books, various audiovisual resources, and software as information sources.		*								
Uses easy fiction books, nonfiction books, audiovisual resources and software, and periodicals as information sources.			*							
Uses various sources (e. g., periodicals, audiovisuals, software, encyclopedias) for information.				*	*					

• Standards will be reinforced as necessary each subsequent year

Written Communication
Reference-Study

The Student:	K	1	2	3	4	5	6	7	8	9_12
Begins the research process by selecting topic, formulation questions, and identifying key words about a chosen topic.				*						
Skims material to locate specific information.				*						
Develops a simple outline from a short selection.					*	*	*	*	*	
Uses cross reference in multiple types of sources.						*	*	*	*	
Uses the media center and available technology as sources of information and pleasure.	*	*	*	*	*	*	*	*	*	*
Recognizes differences in paraphrasing, summarizing, and plagiarizing.							*	*	*	
Recognizes organizational systems used for collections or reference sources.							*	*	*	

• Standards will be reinforced as necessary each subsequent year

Written Communication
Reference-Study

The Student:	K	1	2	3	4	5	6	7	8	9_12
Uses research process by:										
-Choosing topic					*	*	*	*	*	*
-Formulating questions					*	*	*	*	*	*
-Identifying key words					*	*	*	*	*	*
-Selecting sources					*	*	*	*	*	*
-Skimming					*	*	*	*	*	*
-Paraphrasing					*	*	*	*	*	*
-Taking notes					*	*	*	*	*	*
-Organizing					*	*	*	*	*	*
-Presenting					*	*	*	*	*	*
Selects appropriate sources (data base, electronic multi-media, technologies, microforms, interview, general and specific references, community resource files, and periodical index) for a given topic.							*	*	*	*
Analyzes information to determine relevance to topic.							*	*	*	*
Retrieves information on a single topic from multiple types of sources (periodicals, indices, almanacs, general and specialized materials, electronic multi-media technologies, microforms, and data bases).							*	*	*	*

• Standards will be reinforced as necessary each subsequent year

Written Communication
Reference-Study

The Student:	K	1	2	3	4	5	6	7	8	9_12
Selects main ideas and supporting details from two or more sources and creates an outline.							*	*	*	
Documents sources with reference citations (bibliography or footnotes).							*	*	*	*
Uses a study technique:										
PQRST (preview, question, read, study, test)					*	*	*	*	*	
SQ3R (survey, question, read, review, report)					*	*	*	*	*	
PQ4R (preview, question, research, read, review, report)					*	*	*	*	*	
4R (research, read, review, report)					*	*	*	*	*	
Develops strategies for taking tests in different formats (multiple choice, sentence completion, essays, etc.).							*	*	*	
Works as a team to solve problems.										*

• Standards will be reinforced as necessary each subsequent year

Introduction to Language Arts Quality Core Curriculum

6-8

As a part of the Quality Core Curriculum (QCC) revision process, language arts teachers, school administrators, college professors, and business leaders from across Georgia reviewed and revised the language arts curriculum in grades K-12. The team was subdivided into three groups, K-5, 6-8, and 9-12. Careful consideration was given to every content standard, and the committees reached consensus about the inclusion and wording of each one.

Three points are noteworthy about the standards in grades 5-8. One, to ensure a thorough foundation of knowledge for high school, content standards have been deliberately repeated and spiraled from one grade level to the next. Two, a seventh strand, grammar and usage, has been added to the six existing strands. Three, technology has been incorporated in all appropriate objectives.

The intent of the committee has been to produce a curriculum document that is readable, concise, measurable, sequential, achievable, and most of all, usable. The document allows teachers to make implementation decisions on a local level for the improvement of education of Georgia's students.

Strand	Content Standard	Topic	Concept	Notes
--------	------------------	-------	---------	-------

Language Arts: Grade 8**Grammar and Usage**

- LA.8.1** Writes sentences according to purpose: declarative, interrogative, imperative, and exclamatory.
- LA.8.2** Recognizes the functions of the eight parts of speech.
- LA.8.3** Analyzes the parts of a sentence in simple, compound, complex, compound-complex sentences:
-subjects
-predicates
-complements (predicate adjectives, predicate nominative, direct objects, indirect objects)
-modifiers (words, phrases, clauses)
-appositives
- LA.8.4** Forms singular, plural, and possessive nouns.
- LA.8.5** Uses principal parts of regular and irregular verbs to form the indicative mood in active and passive voice, progressive form, and emphatic form.
- LA.8.6** Uses types of pronouns such as personal, interrogative, demonstrative, indefinite, and relative.
- LA.8.7** Writes simple, compound, complex, and compound-complex sentences. Avoids run-on sentences and nonfunctional fragments.
- LA.8.8** Combines sentences using coordination and subordination.
- LA.8.9** Recognizes and uses verbals and verbal phrases (gerunds, participles, and infinitives).

Georgia's Quality Core Curriculum

Mathematics

Grade 8

Introduction to Mathematics Quality Core Curriculum

6-8

The Mathematics Quality Core Curriculum (QCC) presents a vision of mathematics that is designed to meet the diverse needs of students in every Georgia school system. The QCC represents high academic standards across a broad spectrum of mathematical topics. It establishes the basis for a challenging program of study that will increase student achievement in mathematics. The QCC content standards may be expanded and enhanced at the discretion of local school systems, but may not be deleted or replaced.

The vision of the Mathematics QCC is that Georgia's students will be *avid mathematical problem solvers*, will *communicate mathematically* (listen, speak, read, write, and reflect), will *reason mathematically* using basic and higher-order thinking skills concurrently, and will *make connections* within mathematics and with other disciplines. The common strands - Problem Solving, Computation & Estimation, Number & Number Relationships, Number Systems & Number Theory, Geometry, Measurement, Statistics, Probability, Patterns & Functions, and Algebra - are integrated throughout the curriculum to provide cohesion and continuity and to ensure smooth transitions throughout the K-12 curriculum.

The content standards in the Mathematics 6-8 QCC are categorized by these strands. Some content strands relate to all strands, and are listed first at each grade level. Then, for convenience, the strands are listed alphabetically with their corresponding content standards.

The Mathematics QCC is designed to support teachers as they instructionally maximize each student's mathematical experiences. Teachers are urged to provide opportunities for upward movement through the curriculum, so that students are not restricted to their current grade level. Knowledge acquisition requires a transition from concrete, through pictorial, to abstract for all students at all levels and ages. The use of concrete objects (manipulatives) and visual models is vital for students to understand concepts and explore processes.

Incorporating technology into instruction is imperative in order to empower Georgia students to keep pace with the information age and to be competitive in the job market; it will enhance and provide flexibility in the learning process. Scientific calculators and computers are essential tools for learning and doing mathematics at all grade levels. Students should be able to solve practical problems, investigate patterns, explore strategies, and focus on the process of solving problems rather than on tedious computation unrelated to applications.

688

689

Communication is a vital link in the QCC. Thinking, speaking, writing, and applying mathematics are invaluable assets. Teaching students these skills can be facilitated through questioning, discussions, reports, projects, journals, oral presentations, experiments, summarizing collected data, and hypothesizing. Collectively, these experiences help students make transitions from informal, intuitive ideas to more abstract and symbolic mathematical language. Reading, writing, and discussing mathematics promote clarity of thought and facilitate deeper understanding of concepts and ideas. Students will improve and gain confidence in their own abilities to explain, defend, and make conjectures.

The middle school curriculum has been reviewed and revised to ensure that students completing the eighth grade will have had the content necessary for success in Algebra I. The content of the high school prealgebra course is now incorporated throughout the middle school curriculum, with major emphasis in the eighth grade.

The Mathematics QCC Revision Team has carefully considered and incorporated the curriculum standards proposed by national and state initiatives, as well as revision evaluation suggestions made by thousands of Georgians. This process served as an invaluable resource in guiding efforts to provide a quality and competitive education for Georgia's children.

Mathematics: Grade 8

All Strands: Problem Solving; Algebra; Computation & Estimation; Geometry; Measurement; Number & Number Relationships; Number Systems & Number Theory; Patterns & Functions; Probability; Statistics

M.8.1

Solves problems, reasons, and estimates throughout mathematics.

- Selects and uses problem-solving strategies such as reading the problem, drawing a picture or diagram, using trial and error, making a table or chart, looking for patterns, making a simpler problem and then generalizing, working backwards, etc.
- Selects and uses appropriate tools (such as mental computation, calculators, manipulative materials, paper and pencil, computer) in solving problems.
- Uses appropriate estimation strategies (such as front-end, breaking numbers apart, compatible numbers, guess and check, clustering, rounding, compensation) to check the reasonableness of results.
- Solves nonroutine problems for which the answer is not obvious.
- Relates concepts and skills to practical applications.

Problem Solving Strategies,
Reasoning,
Estimation Strategies,
Mental Computation

Appropriate Methods and Tools
Applications

M.8.2

Describe orally and in writing, using the appropriate mathematical vocabulary, mathematical concepts and procedures, such as solving a word problem or computing.

Communication,
Reasoning

Vocabulary

M.8.3

Uses scientific calculator and computer skills to solve problems, to discover patterns and sequences, to investigate situations and draw conclusions.

Technology,
Calculator Skills,
Computer Skills,
Problem Solving,
Reasoning

Pattern,
Sequence

M.8.4

Uses computer software and applications to research, investigate, and analyze data using charts, tables, graphs, or other presentation forms.

Technology,
Computer Skills,
Charts,
Tables,
Graphs

Research,
Investigation,
Data Analysis

Algebra

M.8.5

Identifies the use of a variable as a placeholder in algebraic expressions, equations, and inequalities.

Expressions,
Equations,
Inequalities

Variable

692

693

Strand	Content Standard	Topic	Concept	Notes
M.8.6	Uses signs or symbols to represent words, phrases, numbers, or quantities.	Expressions	Symbol, Variable, Equality, Inequality	
M.8.7	Translates English phrases and sentences into mathematical/algebraic expressions, equations, and inequalities.	Equations, Expressions, Inequalities	Variable, Symbol, Solving Equations	
M.8.8	Determines the number that makes a given number sentence true using the properties of equations.	Number Sentences	Variable	
M.8.9	Uses order of operations to simplify numerical expressions.	Expressions	Order of Operations	
M.8.10	Evaluates algebraic expressions using substitution.	Expressions	Variable	
M.8.11	Solves single- and multi-step algebraic equations (including formulas) and inequalities using addition, subtraction, multiplication, and division.	Equations, Inequalities, Formulas	Variable	
M.8.12	Finds the absolute value of any real number.	Real Numbers	Absolute Value	
M.8.13	Sets up a proportion and solves for the missing term in a proportion.	Proportion	Variable	
M.8.14	Graphs simple and compound inequalities on a number line.	Inequalities, Graphing	Number Line	

Algebra; Patterns & Functions

M.8.15	Examines relations (functions) to determine how changes in one variable can effect another variable (e.g., Given $b = 2a$, If $a = 2$, then $b = 4$. If $a = 3$, then $b = 6$).	Relations, Functions	Variable, Dependent, Independent

Geometry: Measurement

M.8.28 Measures and draws angles using a protractor and classifies angles by their measures (e.g., acute, obtuse, right, straight, complementary, supplementary).

Angle Measurement
Degree,
Protractor

Measurement

M.8.29 Selects and uses appropriate customary and metric units of measure for length (including perimeter and circumference), area, volume, capacity, weight/mass, time, temperature, and angle measure.

Customary Units, Metric Units
Length,
Perimeter,
Circumference,
Area,
Volume/Capacity,
Weight/Mass,
Time,
Temperature,
Angle Measure

M.8.30 Converts from one metric unit to another metric unit and from one customary unit to another customary unit (length, capacity, weight/mass, time, and money.)

Customary Units,
Metric Units,
Conversion within System
Length,
Capacity,
Weight/Mass,
Time,
Money

Number & Number Relationships

M.8.31 Identifies place value for whole numbers and decimals.

Whole Numbers, Decimals
Place Value

M.8.32 Uses fractions, decimals, and percents interchangeably, and recognizes equivalent representations.

Fractions,
Decimals,
Percent
Equivalent Representations

M.8.33 Expresses standard numerals in scientific notation and expresses scientific notation as a standard numeral.

Scientific Notation,
Standard Notation
Exponent,
Power,
Equivalent Representations

Georgia's Quality Core Curriculum

Science Grade 8

Introduction to Science Quality Core Curriculum K-12

The revision of the Science section of the K-12 Quality Core Curriculum (QCC) involved the intensive efforts of science teachers, scientists and other science educators. These practitioners closely examined the 1988 QCC and sought to produce a sequential document that establishes high expectations for every student and enhances day-to-day instruction.

The document reflects a combination of the present (1988) Georgia QCC, the National Science Education Standards, Project 2061: Benchmarks for Science Literacy and the Georgia Framework for Learning Mathematics and Science. K-8 is organized by grade clusters K-3, 4-5, and 6-8. The topics in these clusters which contain concepts, content standards, and skills may be moved from one grade level to another within the cluster by the local school systems.

At each grade level, kindergarten through eighth, the Science QCC has three major strands: physical science, life science and earth/space science as well as content standards dealing with science, technology, and society. The strands can be arranged by grade levels or taught as an integrated science program as determined by the local school system. Physical science, biology, chemistry, and physics for high school were revised to build on the concepts presented in the K-8 curriculum.

At each grade level, objectives are included for science inquiry and processes, reference skills, safety, and tools used in Science. These objectives should be integrated into instructional activities addressing these concepts and content standards rather than taught in isolation.

Science develops thinking, problem-solving, and lifelong learning skills. Science process and inquiry skills are essential to the development of skills necessary to live interesting, responsible, and productive lives. Science instruction lends itself to integration with other subject areas and can generate student interest and motivation for all subject areas. Students should be actively engaged in the learning process via hands-on/minds-on science activities and experiences.

Our economic development and national survival are contingent on the education we provide our students. Educational development in the state of Georgia will help us produce future scientists and engineers who can maintain our country's technological competitiveness.

Assessment in Science should provide opportunities for students to demonstrate in a variety of ways what they have learned. Good assessment is a learning experience. As we provide students with effective assessment opportunities, we can monitor how well instruction is meeting the learning needs of students. If assessment is shared with students as instruction begins, planning, teaching,

and learning become more focused. Ongoing professional development and networking experiences for teachers will promote confidence and competence in science instruction.

The developers of the Georgia Science QCC have drawn extensively on statements published by the American Association for the Advancement of Science, the National Research Council, the Georgia Framework for Learning Mathematics and Science, and the National Science Education Standards as to what all students should know and be able to do.

Philosophy of Science

Science education in Georgia must provide students with the concepts and skills necessary to be responsible, active caretakers of their micro and macro environment. The Science curriculum must be designed to be a blend of science concepts and science process skills. Students must be actively involved in hands-on scientific investigation in the exploration of the world in which they live. Students must develop critical thinking skills that enable them to base decisions on valid scientific evidence. Students must be equipped with the problem-solving skills and scientific concepts to address the influence of science and technology on society. Ultimately, the Science curriculum must be designed to provide students with the opportunity to acquire sufficient scientific knowledge and skills to function effectively in, and contribute positively to, society.

The Science programs in Georgia should be consistent with the cognitive, social, emotional, and physical development of the student. These programs should be consistent with the nature and values of science which include its philosophy, methods of investigation and verification, conceptual organization, and accumulated knowledge. They should reflect an involvement with both immediate and future life needs in terms of solving personal and social problems. Finally, science programs should reflect science as part of an integrated whole, not an isolated discipline.

Science Inquiry and Processes

Students will:

- Ask questions about events
- Keep accurate records of observations and investigations
- Use data to support inferences and predictions
- Use data, experience, evidence, and models to construct explanations

- Make sketches and diagrams to explain ideas, procedures and results
- Organize data into tables, charts, and graphs for interpretation
- Plan, design, and conduct scientific investigations to answer questions

To accomplish the above, students will regularly:

- Make qualitative and quantitative observations
- Classify objects and phenomena
- Communicate with others
- Make inferences and predictions
- Use estimation and metric measurement
- Formulate hypotheses
- Identify and control variables
- Design experiments
- Interpret data

Reference Skills

- Uses encyclopedias, books, science reference magazines, and other media to obtain information related to science concepts.
- Uses computer databases, online resources, and other electronic media to obtain information about science concepts.
- Uses indices, tables of contents, and online searches to locate information related to science concepts.

Safety

Identifies and practices accepted safety procedures in manipulating science materials and equipment.

Tools

Uses appropriate tools to collect and analyze data and solve problems.

Basic Process Skills

Observation includes using one or more of the senses to determine attributes, properties, similarities, differences, and changes in natural phenomena and objects. Observations can be made directly with the senses or indirectly through the use of simple or complex instruments.

Classification includes organizing objects or events according to similarities and differences selected by the observer. Classification includes sorting elements into groups on the basis of common characteristics and ordering (sequencing) elements by relationships among the elements.

Communication includes the presentation and explanation of experiences with objects or events by means of oral or written descriptions, pictures, graphs, charts, maps, demonstration, and/or other methods.

Measurement includes the comparison of an unknown quantity (e.g., length, mass, or temperature) with a known quantity such as a pupil-made standard or the metric standards of length, area, volume, mass, temperature, force, time or electrical charge. Measurement includes the ability to estimate or compare an object or event with a frame of reference. Measurement involves the skillful, effective use of instruments.

Prediction includes suggesting what will occur in the future based on observations, measurements, and inferences about the relationships between or among observed variables. Predictions may be used to generalize that under a certain set of circumstances, a certain outcome may be expected, or they may be used to describe outcomes beyond the observed data. The accuracy of a prediction is closely related to the accuracy of the observations.

Inference includes the use of observations and past experiences to reach a conclusion about a probable cause or about future outcomes. Inferring from a set of data may lead to several nonconclusive inferences. Only further investigations and additional data may validate an inference.

Higher Level Process Skills

Identification of variables includes finding the variables of a system and selecting those to be held constant.

Manipulation of variables includes the identification of trends or patterns in sets of data. Patterns in data may be used to establish generalizations, make predictions and formulate hypotheses. Interpreting data involves organizing, analyzing, synthesizing, and evaluating patterns in the data.

Interpretation of data includes the identification of trends or patterns in sets of data. Patterns in data may be used to establish generalizations, make predictions, and formulate hypotheses. Interpreting data involves organizing, analyzing, synthesizing, and evaluating patterns in the data.

Operational definition includes defining objects in the context of a common experience, telling one what to do to or with an object and what to observe as a result of the action.

Formulation of models includes describing or constructing physical, verbal, mental or mathematical explanations of systems and interrelated phenomena that cannot be observed directly. Models may be used in predicting outcomes of planned investigations.

Experimentation includes the design and implementation of procedures to obtain reliable information about interrelationships between objects and events. Investigating includes formulating and solving a problem and experimenting and drawing conclusions.

Construction of hypotheses includes formulating generalizations that include all objects or events of the same class. Questions, inferences, and predictions can lead to the formation of a hypothesis. The hypothesis must be tested if its credibility is to be established.

Drawing conclusions includes interpreting data acquired through experimentation to determine whether a hypothesis is supported.

Strand	Content Standard	Topic	Concept	Notes
--------	------------------	-------	---------	-------

Science (6-12): Grade 8

Earth Science

S.8.1	Uses process skills of observing, classifying, communicating, measuring, predicting, inferring, identifying, and manipulating variables. Also uses skills of recording, analyzing and operationally defining, formulating models, experimenting, constructing hypotheses and drawing conclusions.	Scientific Inquiry Process	Scientific investigation involves carefully collected, relevant evidence, logical reasoning, and some imagination in developing hypotheses and explanations.	Assessment Recommendations: Teach throughout the year as students perform lab activities.
S.8.2	Understands and applies laboratory safety rules and practices.	Safety Skills	Scientific investigations require safety precautions for the scientist and others.	Assessment Recommendations: Demonstrates in a lab appropriate safety procedures, i.e., NSTA Standards.
S.8.3	Defines and identifies standards of measurement. 3.1 Names the prefixes used in the SI system. 3.2 Identifies SI units and symbols for length, volume, mass, density, time, and temperature. 3.3 Converts measurements among related SI units. 3.4 Uses appropriate tools for determining mass volume, temperature, density, and length.	Standard International (SI) Measurements (Metric System)	Scientists around the world often repeat an experiment many times before accepting a consistent result as a rule. Consequently, a universal system of measurement is necessary.	Assessment Recommendations: Selects and uses appropriate tools for the measurement of mass volume, temperature, and density.
S.8.4	Selects and uses multiple types of print and nonprint sources for information on science concepts.	Reference Skills	Scientific investigation requires the use of proper techniques in order to gather information.	Assessment Recommendations: Writes reports.
S.8.5	Recognizes the effects human beings have on pollution and the environment. 5.1 Identifies ways human beings cause and can correct pollution of water bodies, the atmosphere (acid rain, ozone layer, and greenhouse effect) and the land (soil pollution, and chemical/nuclear waste). 5.2 Examines the effects pollution from cities have on weather and the effect of burning fuels on the atmosphere, melting of polar ice caps, and predicting earthquakes.	Human Interactions with the Environment	The activities of humans on earth have positive and negative effects on the environment, weather, and atmosphere.	Assessment Recommendations: Creates a poster that illustrates a variety of effects of pollution on the environment.
S.8.6	Differentiates among elements, compounds and mixtures. 6.1 Describes the organization or the modern periodic table. 6.1 Recognizes common chemical symbols and chemical formulas. 6.3 Recognizes crystal systems of minerals. 6.4 Defines an ion and describe its role in chemical bonding (e.g., ionic and covalent bonding).	Geology	Atoms chemically combine in different proportions to produce different types of matter with different properties.	Assessment Recommendations: Uses diagrams to compare covalent and ionic bonding.

721

720

Strand	Content Standard	Topic	Concept	Notes
S.8.7	Identifies minerals by physical properties such as hardness, shape, color, luster, streak, cleavage and fracture. 7.1 Uses standard mineral identification tests to identify minerals and their characteristics from unnamed samples.	Geology	Minerals can be identified by their unique physical properties.	Assessment Recommendations: Identifies samples of minerals using standard tests in a lab setting.
S.8.8	Differentiates among rocks based on origins (igneous, metamorphic, and sedimentary) and mineral content.	Geology	Rocks on the Earth's surface and within the Earth are constantly being changed from one type to another in a process known as the rock cycle. The Earth's constructive and destructive forces create the rock cycle.	Assessment Recommendations: Identifies rock samples using standard characteristics. Draws and labels a diagram of the rock cycle
S.8.9	Recognizes that constructive and destructive Earth forces (e.g., continental drift, earthquakes, volcanoes, plate tectonics, weathering, and erosion) change the Earth's surface.	Geology	Land forms are the result of constructive and destructive forces. Constructive forces involve crystal deformation, volcanic eruptions, and deposition of sediments. Destructive forces include weathering and erosion.	Assessment Recommendations: Constructs models of volcanoes, mountain building and tectonics. Conducts experiments involving weathering, erosion and deposition.
S.8.10	Recognizes major symbols, series, scales and colors conventionally used to represent features on topographic maps and various Earth models.	Geology	Topographic maps illustrate the characteristics of landforms on the Earth's surface.	Assessment Recommendations: Interprets earth surface characteristics from topographic maps and earth models.
S.8.11	Examines how land formations influence development of an area. 11.1 Relates the topography of land, climate and resources to economic development.	Geology	The economic development of an area can be related to its overall topography, climate, and resources.	Assessment Recommendations: Researches the relationship of topography and economic development.
S.8.12	Recognizes the use of alternate energy sources. 12.1 Identifies examples of solar energy being used (solar heating in buildings, solar cells in calculators and solar battery automobiles). 12.2 Identifies other alternative energy sources (geothermal, wind, nuclear, synthetic fuels and biomass fuels).	Geology	Various alternate energy sources help to conserve the Earth's natural resources.	Assessment Recommendations: Designs and presents a project that uses solar power.

722

723

Strand	Content Standard	Topic	Concept	Notes
S.8.13	Describes Earth history and recognizes that change occurs constantly and slowly over time. 13.1 Describes the process of radio carbon dating. 13.2 Distinguishes between relative and absolute time.	Geology	Some changes in the Earth are abrupt while other occur very slowly. Scientists use various types of technology to assist in determining the approximate age of the Earth.	Assessment Recommendations: Constructs a time scale to identify geologic eras.
S.8.14	Interprets the geology of Earth based on the principle of uniformitarianism and the principles of superposition.	Geology	Thousands of layers of sedimentary rock confirm the long history of the Earth and contain the remnants of changing life forms in its successive layers. The youngest layers are not always found on the top because of the folding, breaking, and uplifting of layers.	Assessment Recommendations: Makes a poster illustrating the principles of superposition and uniformitarianism.
S.8.15	Illustrates and describes the Earth's composition (crust, mantle, and core).	Geology	The Earth is composed of three distinct layers which have definite characteristics and features.	Assessment Recommendations: Draws a diagram or construct a model of the earth's layers.
S.8.16	Describes the water cycle and its relationship to the movement of surface and subsurface water. 16.1 Identifies parts of the water cycle. 16.2 Describes the formation of a river system. 16.3 Describes the distribution and quality of fresh water on the Earth.	Hydrology	Water, which covers the majority of the Earth's surface, circulates through the crust, oceans, and Earth's atmosphere in what is known as the water cycle.	Assessment Recommendations: Draws and labels a diagram or construct a chart illustrating the water cycle
S.8.17	Describes the characteristics, composition and movement of the oceans. 17.1 Recognizes the chemical and physical composition of ocean water. 17.2 Describes the features of the ocean floor. 17.3 Discusses the movements of ocean water in currents, tides and waves. 17.4 Identifies the three groups of ocean life 17.5 Describes the relationships among ocean organisms	Hydrology	Oceans cover 75 percent of Earth's surface and have definite characteristics, composition, features, movements, and life forms.	Assessment Recommendations: Constructs a graph that shows the composition of ocean water. Using models, charts, maps and drawings, describes and identifies features of the ocean floor. Constructs a diagram showing the three groups of ocean life.
S.8.18	Describes the composition and structure of Earth's atmosphere. 18.1 Identifies the layers of the earth's atmosphere. 18.2 Describes the importance of each layer of the Earth's atmosphere. 18.3 Lists the most abundant gases in the Earth's atmosphere's D)3(pU	Meteorology	The atmosphere is a mixture of nitrogen, oxygen, and trace gases. It includes water vapor and has different properties at different elevations.	Assessment Recommendations: Creates a chart showing the layers of the Earth's atmosphere.

724

725

Georgia Quality Core Curriculum

12/4/97

Strand	Content Standard	Topic	Concept	Notes
S.8.19	Recognizes and investigates weather phenomena and their effect on the Earth's surface. 19.1 Interprets weather maps and make forecasts.	Meteorology	Data collected and interpreted from meteorologists' instruments and maps aid in weather prediction and help to identify the effect of weather phenomena on the Earth's surface.	Assessment Recommendations: Uses meteorological instruments and weather maps to collect and interpret weather data.
S.8.20	Describes atmospheric factors which interact to cause weather: heat energy, air pressure, winds, and moisture. 20.1 Identifies the three basic types of clouds and their formation. 20.2 Compares the four major types of air masses and how they create fronts that affect weather patterns. 20.3 Identifies factors that determine climate. 20.4 Differentiates between the climate zones of the Earth 20.5 Defines and gives examples of microclimates.	Meteorology	The interaction of several factors determine weather patterns and climate on the Earth's surface.	Assessment Recommendations: Researches the factors that affect climates. Draws and labels types of clouds. Draws and labels four major types of air masses. Records weather data.
S.8.21	Describes the components of the solar system. 21.1 Describes features, characteristics and motions of the planets. 21.2 Compares and contrasts asteroids, comets and meteorites and explain their origins.	Astronomy	Our solar system is composed of nine planets that revolve around the sun. Each planet has different size, composition, and surface temperature.	Assessment Recommendations: Constructs a model of the solar system.
S.8.22	Identifies and describes stars and star systems. 22.1 Describes major galaxy types. 22.2 Describes the life cycle of a star. 22.3 Interprets a Hertzsprung-Russell diagram.	Astronomy	The universe is composed of stars having life cycles and forming galaxies that have unique characteristics.	Assessment Recommendations: Identifies and labels major galaxy types.
S.8.23	Compares and contrasts theories on the origin of the universe. 23.1 Discusses geocentric and heliocentric models of the solar system.	Astronomy	Many theories have been developed regarding the origin of the universe.	Assessment Recommendations: Writes a position paper presenting various theories of the origins of the universe.
S.8.24	Describes how information is obtained about space. 24.1 Identifies the use of probes, satellites, light and radio telescopes and spectroscopes to gather information about space.	Astronomy	Various instruments have provided information about space which have enlarged our understanding of the universe.	

720

721

Strand	Content Standard	Topic	Concept	Notes
S.8.25	Describes the history of the space program and examines its effects on our lives.	Astronomy	The space program has given us technological discoveries which have enhanced the overall quality of life on Earth.	Assessment Recommendations: Constructs a timeline of the U.S. space program (moving people and materials back and forth in space; effects of satellites (communications and weather predicting); technology of weather devices; space colonization/ weapons/travel; development of new products.
S.8.26	Describes the relationships of the motions between the sun, moon and Earth. 26.1 Describes how seasons are caused by the Earth's revolution. 26.2 Defines the phases of the moon. 26.3 Compares and contrasts a lunar and solar eclipse. 26.4 Discusses the effect of the sun and moon on tides.	Astronomy	Most objects in the solar system are in regular and predictable motion. This motion explains such phenomena as the day, the year, phases of the moon, eclipses, tides, and seasons.	Assessment Recommendations: Makes posters or a model to illustrate relationships among the sun, moon and earth.

Georgia's Quality Core Curriculum

Social Studies Grade 8

Introduction to Social Studies Quality Core Curriculum K-12

The primary purpose of Social Studies education in Georgia schools is to help students become productive and responsible citizens. The Social Studies curriculum enables students to develop the ability to make informed decisions that balance concern for individual interests and the public good in a culturally diverse and interdependent world.

Exemplary Social Studies instruction provides opportunities for students to acquire knowledge, reflect upon and use that knowledge, and gain a better understanding of self and others. The Social Studies program includes the study of geography, history, political science, economics, behavioral sciences, and the humanities.

Knowledge (what students need to know about various social science and related disciplines), skills (what students should be able to do with acquired knowledge and skills), and values (mandated by the State Legislature in 1991) are the three major elements that comprise the Social Studies guidelines as established by state and national organizations. Social Studies instruction should be meaningful, integrative across teaching and learning, value-based and challenging. Through such a process students will develop the necessary knowledge, skills and values of a committed, competent citizen who participates in the civic affairs of the community and nation.

Georgia's Quality Core Curriculum (QCC) revision team, composed of PK-16 Social Studies educators from throughout the state, focused on the following concerns:

- refining content standards to clarify content and skills
- correlating content standards to appropriate core values
- building on concepts introduced at earlier stages of instruction
- providing content standards that are clearly measurable
- identifying civic responsibility, information processing, and problem-solving skills
- restructuring content for a more equitable grade-level distribution.

Specifically, in two areas within this curricula pattern the content has been redistributed. At the fourth and fifth grade levels, the original content standards that were in the QCC have been incorporated into a two-year study of United States history. The study of Canada, formerly in fifth grade, has now been incorporated into the sixth grade curriculum.

In grades six and seven, the history/geography pattern was retained; however, certain regional areas were rearranged to reflect greater similarity between place and cultures. In both cases, these patterns are being offered to encourage in-depth study of specific content areas, to expand the use of multi-media resources, and to provide greater opportunities for students to engage in active and hands-on learning experiences.

Introduction to Social Studies Quality Core Curriculum Grades 6-8

In the revised 6-8 Social Studies curriculum, emphasis in the sixth and seventh grades is placed on the cultural and geographic study of selected regions. In the eighth grade, students will study the geography and history of Georgia within the broader context of *United States History*.

Suggested regions for sixth grade study are the Americas, Europe, and Oceania. Suggested regions for seventh grade study are Asia, Africa, and the Middle East. However, each school system has the flexibility to sequence these cultural regions to reflect its unique curriculum, goals, and resources.

Notes

Social Studies: Grade 8

Georgia and the American Experience

SS.8.1	Identifies the location of Georgia in relation to region, nation, continent, hemisphere and world using maps, and other geographic tools and technology.	Geographic Environment	Location	Skills: Locates longitude/latitude.
SS.8.2	Locates and describes the geographic regions of Georgia (mountains, piedmont, coastal plain, etc.,) and identifies the physical process which formed them.	Geographic Environment	Geographic Regions	Skills: Identifies physical features on maps.
SS.8.3	Identifies important geographical features of Georgia and describes ecosystems present in each: - Fall Line - Okefenokee Swamp - Appalachian Mountains.	Geographic Environment	Ecosystems	Skills: Identifies physical features on maps.
SS.8.4	Explains how ocean and wind currents affected the exploration and settlement of Georgia and the Southeast.	Geographic Environment	Exploration Ocean and Wind Current	Skills: Climatic zone maps Locates currents.
SS.8.5	Identifies geographical factors and explains how they have influenced Georgia's exploration, settlement and economic development emphasizing - location - climate - mountains - rivers, and - soil and natural resources.	Geographic Environment	Geographic Factors	Skills: Special purpose maps
SS.8.6	Describes and analyzes Georgia pre-historic Indian civilizations.	Early inhabitants of Georgia (up to 1732)	American Indians	Skills: Timelines
SS.8.7	Traces Spanish and English exploration and rivalry from the discovery of the New World up to the colonization of Georgia.	Early Inhabitants of Georgia (Up to 1732)	European Exploration Rivalry	Skills: Timelines Charts Map
SS.8.8	Explains the impact of Spanish and English conquest on the Indian civilizations of North America and the impact of the Indian civilizations on the European settlers.	Early Inhabitants of Georgia (Up to 1732)	Conquests Indian Civilizations	Skills: Location
SS.8.9	Describes the Indian nations and tribes living in Georgia and their relationships with the English colonists.	Early Inhabitants of Georgia (Up to 1732)	Indian Nations English Colonists	Skills: Drawing a map

Course	Content Standard	Topic	Concept	Notes
SS.8.10	Analyzes factors in both England and North America that led Great Britain to create the colonies of North America and identifies and describes settlement patterns of the early colonists.	Colonial Georgia (1607-1732)	Colonies	Skills: Cause and effect chart
SS.8.11	Evaluates the three major reasons for the founding of the colony of Georgia.	Colonial Georgia (1732-1776)	Founding of a Colony	
SS.8.12	Compares and contrasts political, economic and socio-religious development of the New England, Middle Atlantic, and Southern colonies. Discusses how the different physical and religious environments provided opportunities for or placed constraints on human activities.	Colonial Georgia (1732-1776)	Political Economic Socio-Religious	Skills: Chart
SS.8.13	Compares the development of early Georgia with that of other colonies.	Colonial Georgia (1732-1776)	Development	Skills: Venn diagram
SS.8.14	Identifies well-known and influential Georgians from the colonial era (men, women and minorities).	Colonial Georgia (1732-1776)	Influential People	
SS.8.15	Explains the causes of the American Revolution.	Colonial Georgia (1732-1776)	Causes of American Revolution	
SS.8.16	Identifies major events and related personalities of the American Revolution.	The First Century of Statehood (1776-1876)	Personalities	Skills: Timeline
SS.8.17	Analyzes attitudes in Georgia toward independence from England and Georgia's role in the Revolutionary War.	The First Century of Statehood (1776-1876)	Independence Revolutionary War	
SS.8.18	Explains the concept of "statehood" in Georgia in 1776.	The First Century of Statehood (1776-1876)	Statehood	Skills: Vocabulary development
SS.8.19	Analyzes the Georgia Constitution of 1777 and explains why it is inadequate as a basis for state government today.	The First Century of Statehood (1776-1876)	Georgia Constitution	Skills: Flow chart
SS.8.20	Identifies the weaknesses of the Articles of Confederation and analyzes why the Americans created a loose confederation of states.	The First Century of Statehood (1776-1876)	Articles of Confederation	Skills: Analysis
SS.8.21	Analyzes Georgia's role in the 1787 Constitutional Convention at Philadelphia and its support of the new national constitution emphasizing - ratification - political party, and - Bill of Rights.	The First Century of Statehood (1776-1876)	Constitution	Skills: Chart (Comparative)

BEST COPY AVAILABLE

Course	Content Standard	Topic	Concept	Notes
SS.8.22	Traces the westward expansion of Georgia after the Revolution emphasizing - Trans - Oconee Republic, and - Yazoo Land scandal.	The First Century of Statehood (1776-1876)	Westward Expansion	Skills: Map
SS.8.23	Examines and analyzes the events that led to the removal of the Indians from Georgia.	The First Century of Statehood (1776-1876)	Displaced People	Skills: Timeline Flow chart
SS.8.24	Examines and analyzes political, economic, social, demographic and cultural characteristics of antebellum Georgia and describes how Georgia compared to other areas of the United States.	The First Century of Statehood (1776-1876)	Antebellum	Skills: Charts
SS.8.25	Describes views about states' rights and slavery and analyzes reasons for secession.	The First Century of Statehood (1776-1876)	States' Rights Slavery	Skills: North vs. South map
SS.8.26	Analyzes Georgia's role in the Civil War and the impact of that war on the state and nation.	The First Century of Statehood (1776-1876)	Civil War	
SS.8.27	Explains the political, economic and social impact of Reconstruction policies on Georgia and southern states from 1865-1877.	The First Century of Statehood (1776-1876)	Reconstruction	Skills: Charts
SS.8.28	Identifies influential Georgians from Independence through Reconstruction (men, women and minorities).	The First Century of Statehood (1776-1876)	Independence Reconstruction Influential People	
SS.8.29	Analyzes the causes and effects of a one-party political system in Georgia following Reconstruction.	The Rise of Modern Georgia (1877-1945)	One-party political system	
SS.8.30	Analyzes the "New South" movement in the 1870s and 1880s and the subsequent rise of manufacturing in Georgia.	The Rise of Modern Georgia (1877-1945)	"New South" Manufacturing	Skills: Map
SS.8.31	Examines the variety of legal and illegal strategies in Georgia to enforce political, social and economic segregation of the races emphasizing - Jim Crow laws - Ku Klux Klan - grandfather clause/white primaries, and - the literacy test	The Rise of Modern Georgia (1877-1945)	Segregation	Skills: Timeline

Course	Content Standard	Topic	Concept	Notes
SS.8.32	Describes events and conditions that affected Georgia's economy during the early 20th century emphasizing - boll weevil - sharecroppers - Great Depression, and - New Deal.	The Rise of Modern Georgia (1877-1945)	Economy	Skills: Timeline
SS.8.33	Examines Georgia's contributions to U.S. participation in World War I and II.	The Rise of Modern Georgia (1877-1945)	Contributions: World War I, World War II	
SS.8.34	Identifies influential Georgians from Reconstruction through World War II.	The Rise of Modern Georgia (1877-1945)	Influential Georgians	
SS.8.35	Discusses concepts "rural," "urban," "suburban," and "metropolitan" in the context of economic growth in Georgia after the 1950s.	Modern Georgia (1945 to the present)	Rural Urban Suburban	Skills: Population density maps
SS.8.36	Interprets the impact of the growth in the Atlanta metropolitan region after 1950.	Modern Georgia (1945 to the present)	Metropolitan	Skills: Maps
SS.8.37	Identifies the important events and personalities in the Civil Rights movement in Georgia.	Modern Georgia (1945 to the present)	Civil Rights Movement	
SS.8.38	Analyzes how transportation, communication, education and other factors have influenced growth and development within Georgia.	Modern Georgia (1945 to the present)	Transportation Communication	
SS.8.39	Examines and analyzes the political, economic, social, demographic and cultural changes in Georgia since World War II emphasizing - rise of two-party system, and - transition from agricultural to industrial economy.	Modern Georgia (1945 to the present)	Demographic Cultural Political Economic, and Social Changes	
SS.8.40	Identifies influential Georgians of the modern era (women and minorities as well as men).	Modern Georgia (1845 to the present)	Modern Era	
SS.8.41	Identifies contributions made by various ethnic groups to the development of Georgia - past and present.	Culture	Ethnic Groups	
SS.8.42	Examines cultural achievements made by Georgians in such fields as art, music, literature, theater, motion pictures and television - past and present.	Culture	Cultural Achievement	

Georgia Quality Core Curriculum

12/12/97

Course	Content Standard	Topic	Concept	Notes
SS.8.43	Compares and contrasts the Georgia Constitution and the U.S. Constitution.	State and Local Government in Georgia	Georgia Constitution U.S. Constitution	Skills: Charts
SS.8.44	Analyzes the three branches of state government and the role of each.	State and Local Government in Georgia	Three Branches of Government	Skills: Charts
SS.8.45	Examines the organization and powers of local governments, including cities, counties and special districts (e.g., school systems, MARTA and housing authorities).	State and Local Government in Georgia	Special Districts	
SS.8.46	Evaluates how major taxes and other sources of revenue for state and local governments impact services provided to the citizens.	State and Local Government in Georgia	Major Taxes Sources of Revenue Services	
SS.8.47	Describes the historical role of Georgia's political parties in state and local government.	State and Local Government in Georgia	Political Parties	
SS.8.48	Explains the changing role of Georgia's political parties in state and local government.	State and Local Government in Georgia	Political Parties	
SS.8.49	Demonstrates an understanding of the concept "citizenship" and recognizes that there are multiple levels of citizenship (e.g., nation, state, county and city).	State and Local Government in Georgia	Citizenship	
SS.8.50	Examines the role of state and local governments under the system of American federalism.	State and Local Government in Georgia	American Federalism	
SS.8.51	Interprets environmental and geographic issues in Georgia and analyzes the future effects of possible responses to these issues.	State and Local Government in Georgia	Environmental Issues Geographic Issues

Georgia's Quality Core Curriculum

Health & Physical Education Grade 8

Introduction to Health and Physical Education

Quality Core Curriculum

K-12

Health and Physical Education are lifelong processes which are the shared responsibility of the student, home, school, and community. The Health and Physical Education programs in Georgia Public Schools provide each student with the information and skills necessary to be active and healthy. Students have opportunities to practice and apply skills and knowledge learned. Through these programs, students are provided a foundation to be healthy and motivated to participate in physical activity in a variety of school and community settings.

Strand	Content Standard	Topic	Concept	Notes
--------	------------------	-------	---------	-------

Health: Grade 8**Alcohol, Tobacco & Other Drugs**

H.8.1	Assesses the consequences on the fetus and child (birth through age 19) of using alcohol, tobacco products, and other drugs.	Consequences		
H.8.2	Recognizes signs and symptoms of chemical dependency and identifies appropriate sources for help and support.	Effects/Resources		
H.8.3	Describes the consequences associated with the use of alcohol, tobacco products, and other drugs in teen relationships (e.g., physical abuse, date rape, violence, teen pregnancy, and drinking and driving).	Consequences		
H.8.4	Practices countering aggressive behavior and intimidation by refusing to use tobacco products, alcohol and other drugs.	Refusal Skills		
H.8.5	Proposes alternatives to using alcohol, tobacco products, and other drugs (including involvement in groups such as S.A.A.D., ALANON, ALATEEN).	Alternatives		

Disease Prevention

H.8.6	Describes causes, effects and prevention of communicable diseases.	Communicable Diseases		
H.8.7	Recognizes that sexually transmitted diseases, including HIV/AIDS, are communicable diseases.	HIV/AIDS		
H.8.8	Recognizes that HIV/AIDS is caused by a virus and is currently incurable and fatal.	HIV/AIDS		
H.8.9	Identifies and explains the ways in which HIV/AIDS is transmitted and identifies behaviors that increase the risk of contracting HIV/AIDS.	HIV/AIDS		
H.8.10	Lists misconceptions about the virus that causes HIV/AIDS and its transmission.	HIV/AIDS		

BEST COPY AVAILABLE

Strand	Content Standard	Topic	Concept	Notes
H.8.11	Recognizes the importance of individuals abstaining from premarital sex and intravenous drug use to prevent the spread of HIV/AIDS and other sexually transmitted diseases.	Abstinence		
H.8.12	Identifies methods of preventing pregnancy and sexually transmitted diseases and discusses whether or not they are effective.	Pregnancy/STD Prevention		
H.8.13	Recognizes that abstaining from sexual activity and refraining from intravenous drug use are the most effective methods of preventing HIV/AIDS.	Abstinence		
H.8.14	Recognizes abstinence from sexual activity as the only sure method of preventing pregnancy and sexually transmitted diseases.	Abstinence		
H.8.15	Identifies the benefits of setting personal goals for maintaining a healthy body.	Goal Setting		
Family Living				
H.8.16	Identifies factors that promote a positive self-image (e.g., accepting responsibility, respect for self, authority, and others; self-discipline, self-control, and the right to be assertive).	Self Concept		
H.8.17	Recognizes how sexual decisions are influenced by group pressures (e.g., community, media, peer).	Persuasion		
H.8.18	Identifies ways of resisting persuasive tactics regarding sexual involvement (e.g., saying "no," negotiation, using refusal, and decision-making skills).	Refusal Skills		
H.8.19	Identifies social, emotional, intellectual, and economic effects of dating.	Dating		
H.8.20	Recognizes that having children is best undertaken in marriage.	Decision-Making		
Growth and Development				
H.8.21	Analyzes physical, social, and emotional changes that occur during the process of maturing.	Maturation		

Strand	Content Standard	Topic	Concept	Notes
--------	------------------	-------	---------	-------

Mental Health

H.8.22	Assesses personal characteristics associated with positive self-esteem.	Self-Esteem		
H.8.23	Discusses the influence of self-identity and group acceptance in choosing friends.	Friendships		
H.8.24	Analyzes possible causes of conflict among youth and styles/strategies to handle them (e.g., gangs).	Conflict Resolution		
H.8.25	Analyzes causes of suicide, prevention, and its effects on survivors.	Suicide		

Nutrition

H.8.26	Analyzes the relationship between nutrition and disease prevention.	Risk Reduction		
H.8.27	Identifies disorders associated with malnutrition and obesity.	Dietary Imbalance		

Personal Health

H.8.28	Sets a personal goal for improving health and lifestyle based on an individual health risk assessment and makes progress toward its achievement.	Lifestyle		Skills: Goal Setting
H.8.29	Develops strategies and skills for maintaining an adequate level of personal grooming and hygiene, emphasizing changes during adolescence.	Hygiene		

Safety

H.8.30	Analyzes safety factors for motorized and nonmotorized vehicles and equipment for land and water purposes.	Accident Prevention		
H.8.31	Demonstrates appropriate first-aid procedures for shock, bleeding, and muscular and skeletal injuries.	First Aid		

Strand	Content Standard	Topic	Concept	Notes
H.8.32	Identifies threats to personal safety (e.g., incest, rape, date rape).	Violence Prevention		
H.8.33	Identifies local support system concerning personal safety (e.g., family, teacher, religious advisor, friend, and counselor).	Resources

Physical Education: Grade 8

Middle School

PE.8.1

Participates in fitness assessment (e.g., Fitness Gram) and developmentally appropriate health-related fitness activities for the purpose of improving skill performance and physical fitness.

Physical Fitness

Health-Related

Skills:
Cardiovascular endurance, muscular strength, muscular endurance, flexibility, and body composition

Assessment Recommendations:
Fitness Gram, teacher observation

PE.8.2

Uses fitness assessment results to develop a goal statement and plan for improving and maintaining cardiovascular fitness and flexibility.

Physical Fitness

Health-Related

Skills:
Cardiovascular endurance, muscular strength, muscular endurance, flexibility, and body composition

Assessment Recommendations:
Student portfolio including goal statement, plan, progress chart, and activities

PE.8.3

Implements personal plan for cardiovascular fitness and flexibility, and applies basic training principles.

Physical Fitness

Health Related

Skills:
Cardiovascular endurance, muscular strength, muscular endurance, flexibility, and body composition

Assessment Recommendations:
Student journal and log

PE.8.4

Engages in physical activity at the target heart rate for a minimum of 20 minutes.

Physical Fitness

Health Related

Skills:
Cardiovascular endurance, muscular strength, muscular endurance, flexibility, and body composition

Assessment Recommendations:
Student journal and log, teacher observation

Georgia's Quality Core Curriculum

Fine Arts Grade 8

Introduction to Fine Arts Quality Core Curriculum K-12

The revised Quality Core Curriculum (QCC) for Fine Arts reflects intense efforts on the part of educators in dance, music, theatre, and visual arts to coordinate the scope and sequence in all Fine Arts areas. The revision provides standards that represent four major ways of responding to or creating the arts. A discipline-based approach for dance, music, theatre, and visual arts is emphasized. The Fine Arts QCC strands in all areas are:

- **Artistic Skills and Knowledge: Creating, Producing, Performing**
Developing skills and organizing knowledge for creating, producing, and performing the Fine Arts
- **Historical and Cultural Context**
Examining the Fine Arts as creative expression of humankind's relationship to historical, cultural, and social context
- **Critical Analysis and Aesthetic Understanding**
Responding to the Fine Arts through critical analysis and aesthetic understanding
- **Connections**
Identifying and expanding connections within the Fine Arts and other disciplines

The revised Fine Arts QCC will arrive in Georgia schools as the Year for Arts Education is celebrated across the state. Stressing the importance of the arts in the total education of all Georgia students is the primary focus of the celebration. The Fine Arts QCC revision provided continuity, clarity, consistency, and comprehensive standards for all Georgia students participating in Fine Arts education.

Introduction to Dance

Quality Core Curriculum

K-12

The Quality Core Curriculum (QCC) supports dance taught in a physical education context while recognizing that dance is a fine art. Content objectives that may be appropriate within a physical education curriculum are indicated. The QCC objectives recognize the fullest range of dance as an art form with the highest expectations for students participating in this curriculum. The Georgia Department of Education QCC for Dance is based on an educational framework that embraces the highest academic standards and values as well as the philosophy and standards of the GOALS 2000/ Educate America Act.

Each content standard represents a broad or general objective and may be introduced and developed over several grades and through multiple lessons. The content standard is not inclusive of all potential movements, steps, skills or approaches related to the standard or dance activity. The QCC is designed as a *guide and suggests standards for students in dance* with the expectation that the institution or instructor will develop the specific curriculum and lesson plans within the QCC framework. Therefore, the *specific objective* to be mastered relates to the instructor's qualifications, the unique student body, class size, and overall environment and philosophy of the school.

Content is categorized by topic and is presented in four clusters (K-2, 3-5, 6-8, 9-12) with allowances for progression. Some regard is given but not restricted to *prioritized teaching order*. Elements listed (e.g., push-pull, collapse, rise, etc.) within an objective and across objectives are not in any hierarchical placement. They are listed as examples to be integrated into the lesson plan appropriate to the teacher's expertise and the students' needs and abilities. Similarly, examples of techniques are not representative of status or educational preference.

The content standards represent seven topics or categories of knowledge, derived from a DBAE (Discipline Based Arts Education) framework. These include:

- Training and technique
- Elements of movement
- Criticism
- Composition (includes aesthetics)

- Multi-cultural context
- Dance wellness
- Interdisciplinary studies

Topics for content standards sometimes overlap and intersect; however, the one indicated in the topic column is the major focus.

The terms *Dance Technique Principles* and *Elements of Movement* are used. *Elements of Movement* includes aspects of *space, shape* and *force*. The writers of this document recognize and agree that *time* is often referred to as an element of movement, but it is addressed through the interdisciplinary nature of music as it relates to dance. For clarification, the glossary offers definitions of other terms used in the QCC document. This is by no means a complete list of dance terminology. Resources are provided for further reference.

Dance Glossary

Aesthetic criteria. Standards on which to make judgments about the artistic merit of a work of art.

Alignment. Proper body posture for dance.

Artistry. Creative expression of one's thoughts, feelings, and ideas through an artistic performance.

Body shapes. The spatial contour the body makes such as curved, angular, twisted, or straight.

Centering. Using proper body alignment to maintain one's balance.

Choreographic structure. The specific compositional forms in which movement is structured to create a dance, such as themes, variation, canon, aba, rondo, etc.

Choreography. The process of making a dance which involves the understanding of choreographic principles, processes, and structures.

Clarity. Execution of technical dance steps in a clear and concise manner.

Combination: Series of technical dance steps performed by the dancer.

Composition. Using combinations of movement or movement phrases to form a greater body of work.

Dynamics. The expressive content of human movement, sometimes called qualities, in particular, the way in which energy is used.

Energy. An element of dance; the force and quality of movement defined by the degree of impetus and effort.

General space. A defined area of space through which dancers can travel using all the available space. The area of space could include a dance studio, gym, or classroom.

Improvisation. Movement that is created spontaneously; occurring within free structured environments, but always with an element of chance. Provides the dancer with opportunity to bring together elements quickly, and requires focus and concentration. Improvisation can be instant and simultaneous choreography and performance.

Kinesthetic awareness. The ability of the body's sensory organs in the muscles, tendons, and joints to respond to stimuli while dancing or viewing a dance.

Levels. The height of the dance in relation to the floor. Levels in space are referred to as high, middle, and low.

Locomotor movement. Movement that travels from place to place, usually identified by weight transference on the feet. Basic locomotor steps are the walk, run, leap, hop, and jump and the irregular rhythmic combinations of the skip, glide and gallop.

Movement quality. The identifying attributes created by the release, follow-through, and termination of energy, which are key to making movement become dance. Typical terms denoting qualities include sustained, percussive, collapse, and vibratory. It also includes the effort actions created by specific combinations of space, time, and energy, such as float, dab, punch, glide, press, flick, slash, and wring developed by Rudolph Laban.

Movement phrase. Dance sequences that have a sense of completion.

Movement theme. A complete idea in movement that is manipulated and developed within a dance.

Musicality: Ability to respond to a rhythm while moving.

Negative space. The empty or open space created when a shape is made by the body.

Nonlocomotor/axial movement. Any movement that occurs in one location in space using the available space in any direction or movement organized around the axis of the body rather than designed for travel from one location to another. Bending, twisting, stretching, and swinging are examples of axial movement.

Partnering. Leading, following, or mirroring someone.

Pathway. The path traced as movement proceeds through space. A pathway may be either on the floor or through the air and is constructed of straight and/or curved lines.

Personal space. The “space bubble” or the kinesphere that one occupies; it includes all levels, planes, and directions both near and far from the body’s center.

Positive space. The filled space created by the body when a shape is made in space.

Rhythmic acuity. The kinesthetic, auditory recognition of, and response to various complex time elements.

Spatial concept. One’s relationship to the space around them.

Style. A distinctive manner of moving; the characteristic way dance is done, created, or performed that identifies the dance of a particular performer, choreographer, or period (e.g., ballet, modern, jazz, folk, tap).

Time. An element of dance which measures tempo/speed and force/energy.

Technique. Refined physical skills pertaining to a particular style of dance.

Time. The quality of movement dealing with speed, tempo, rhythm, and duration of an action or phrase.

Vibratory. Percussive movement; a series of quivering, fluttering movements when extreme tension is applied to the body.

Warm-up. Movements and/or movement phrases designed to raise the core body temperature, move the body through a preparatory range of movement, and bring the mind into focus for the dance.

Introduction to Music Quality Core Curriculum K-12

In revising the Georgia Quality Core Curriculum (QCC) for Music, the music subcommittee of the fine arts committee, maintains the emphasis on content knowledge, aesthetic analysis and appreciation, and creative and technical skills. The original draft of the music curriculum was submitted to schools during the winter of 1997. More than 200 pages of educators' responses to the initial draft were studied carefully by the committee, and many further revisions were made based on those responses. The scope and sequence of the instructional program have been correlated through all music areas. The fine arts committee defined four strands for the arts that provided the overall framework for the revision. This music guide delineates the strands, topics, and content standards which are expected of all participants. Connections with all fine arts and other curricula have been addressed, and uses of technology resources have been identified.

Knowledge and understanding of music are essential components of education. Music is a valid core discipline in its own right; however, music enhances problem-solving skills, improves discipline, and cultivates social development. The revised QCC for Music includes content standards for General Music (K-8), Band (4-12), Choral (4-12), String Orchestra (4-12), Guitar/Class Piano (6-12), Music Appreciation (6-12), and Music Theory and Composition (9-12).

The fundamental purpose of the study of music in the schools is to develop (1) artistic skills and knowledge, such as creating, performing, and producing; (2) critical analysis and aesthetic understanding; (3) interdisciplinary connections; and (4) historical and cultural context.

Students in the early stages of music education learn by doing. Singing, listening, playing instruments, moving, performing, and creating enable them to develop artistic skills and knowledge. This also provides students with an insight into the form and structure of music - developing their creativity. Broad experience with a variety of music assists the student in making informed musical judgments. The experience further enables them to understand the connections and relationships to other disciplines. Students must be exposed to and understand their own historical and cultural heritage as well as that of others.

The committee encourages the use of available technology to reinforce and enhance student exploration and technical development and to assist them in transcribing and composing music. We also recognize the importance of collaboration among the arts and other disciplines in producing performances.

Students who receive General Music instruction once during the middle school should be taught from the content standards of the sixth grade General Music curriculum. The music appreciation curriculum may be selected in place of the General Music curriculum if music is taught in an exploratory program of six or nine weeks. A curriculum in choral, band, and stringed instruments for grades 4-8 has been provided, taking into account the differences in school systems' course offerings. Each school system is to use the part of this curriculum that applies to it and correlate the curriculum with the grade in which these subjects are taught. School systems should use the content standards that are developmentally appropriate for the students in their music programs.

Many music programs include auxiliary performing groups that are outgrowths of the basic programs. Such groups may include jazz ensemble, show choir, boys' and girls' ensembles, and chamber groups. While no specific content standards were designated for these organizations, the curricula for band, chorus, and orchestra were developed around accepted principles of good musicianship. These standards should be used to guide the training of students in the auxiliary music programs as well as the basic programs.

Music Glossary

Articulation. In performance, the characteristics of attack and decay of tones and the manner and extent to which tones in sequence are connected or disconnected.

Body percussion. Sounds produced by use of the body, e.g., clap, snap, pat, tap, stamp, whistle, etc.

Classroom Instruments. Instruments typically used in the general music classroom including, e.g., recorder-type instruments, auto harp, mallet instruments, simple percussion instruments, fretted instruments, keyboard instruments, and electronic instruments.

Competency level. Proficiency level corresponding with the musical ability of the student.

Cultural. The customs and/or beliefs of a racial, religious, or social group.

Chording instruments. Instruments which enable the performer to sound chords.

Dynamic levels, dynamics. Degrees of loudness.

Developmentally appropriate. The instructional level at which students may most effectively assimilate new information.

Elements of music. Pitch, rhythm, harmony, dynamics, timbre, texture, form.

Environmental sounds. Sounds that naturally occur or which can be produced from materials found in the environment.

Expressive qualities. Any articulation, dynamic, or tempo marking used to interpret music.

Ethnic music. Musical forms or styles indigenous to a specific culture.

Folk source. Identification of a specific genre.

Form. The overall structural organization of a music composition (e.g., AB, ABA, call and response, rondo, theme and variations, sonata-allegro) and the interrelationships of music events within the overall structure.

Formal structure. See *Form*.

Genre. A type or category of music (e.g., sonata, opera, oratorio, art song, gospel, suite, jazz, madrigal, march, work song, lullaby, barbershop, Dixieland).

Intonation. The degree to which pitch is accurately produced in performance, particularly among the players in an ensemble.

Line notation. Horizontal or vertical use of a line to denote rhythm, beat, pitch, and melodic direction.

Meter. The grouping in which a succession of rhythmic pulses or beats is organized; indicated by a meter signature at the beginning of a work.

Meter signature / time signature. An indicator of the meter of a musical work, usually presented in the form of a fraction, the denominator of which indicates the unit of measurement and the numerator of which indicates the number of units that make up a measure.

Media. Written, visual, audible, and technological resources.

Musical heritage. Knowledge of historical and cultural backgrounds.

Ostinato. Short musical patterns that are repeated persistently through some composition.

Pre-notation symbols. Line notation of rhythm and/or melody.

Style. The distinctive or characteristic manner in which the elements of music are treated. In practice, the term may be applied to, e.g., composers (the style of Copeland), periods (Baroque style), mediums (keyboard style), or genre (operatic style, bluegrass style).

Technical accuracy, technical skills. The ability to perform with appropriate timbre, intonation, and diction and to play or sing the correct pitches and rhythms.

Timbre. The character or quality of a sound that distinguishes one instrument, voice, or other sound source from another.

Tonality. The harmonic relationship of tones with respect to a definite center or point of rest; fundamental to much of Western music from ca. 1600.

Technique. The ability to perform with appropriate timbre, intonation, and diction; to play or sing the correct pitches and rhythms.

Technology. A manner of accomplishing a task using technical processes and equipment, methods, and knowledge.

Texture. The quality of sound produced by using a greater or lesser number of musical instruments, voices, or chordal tones within a given section of a musical composition.

Introduction to Theatre Quality Core Curriculum K-12

Philosophically, the Theatre K-12 Quality Core Curriculum (QCC) is discipline-based and uses a process approach to learning. The Theatre QCC was developed based on the continuum of skills and an expectation of a maturing of skills from K-12 that would lead to an acquisition of theatre knowledge and skills. The QCC was built to accommodate the diversity of programs and offerings across the state; it allows, at each grade level, for each school system or school program to choose from the listed objectives to design class curricula that will address that population's needs. While the Theatre QCC was designed as a nonsequential K-12 program, it was crafted as an inclusive set of content standards that would lead to a complete theatre experience K-12.

The content standards were designed for depth and breadth of learning in theatre. They offer an optimum experience for the student at any grade level. Teachers may develop courses by choosing the number and depth of content standards that they decide is appropriate for their schools and classes.

The Theatre QCC provides local systems and schools a high-level outline of what can be taught in various grade levels and courses in Theatre. It can be used as a discrete theatre curriculum or as a support for interdisciplinary theatre education, particularly in grades K-8. In high school, the QCC provides a general course outline for a thorough theatre background. The QCC does not include recommendations, for assessment was seen to be a more system-specific activity, given the nature of diversity of each system's theatre programs.

Philosophically, the QCC celebrates the theatre arts as a vital part of life's learning. It makes connections within the arts and with other disciplines. Its design supports a continual growth in sophistication and depth of understanding in theatre and helps students understand artistic discipline while growing to love the passion for life that theatre celebrates.

While theatre education is not a required section of the Georgia QCC, it is essential to a well-rounded education. The Theatre QCC will help students and teachers continue to be lifelong learners and lifelong contributors to theatre.

Theatre Glossary

Aesthetic criteria. Criteria developed about the visual, aural, and oral aspects of the witnessed event, derived from cultural and emotional values and cognitive meaning.

Aural. Physical element involving listening.

Drama. A literary composition intended to portray life or character or to tell a story usually involving conflicts and emotions exhibited through action and dialogue, designed for theatrical performance.

Electronic media, Dramatic media. Means of communication characterized by the use of technology, such as film, radio, computers, television, virtual reality.

Ensemble. Dynamic interaction and harmonious blending of the efforts of the many artists involved in the dramatic activity of a theatrical production.

Environment. Physical surroundings that establish place, time, and atmosphere/mood; the physical conditions that reflect and affect the emotions, thoughts, and actions of characters.

Front of house. The box office and lobby.

House. Commonly defined as the area in which the audience is seated.

Improvise. To spontaneously use movement and speech to create a character or object in a particular situation.

“In character.” Theatrical term referring to an actor/actress portraying someone or something else while on the stage.

Kinetic. Physical element involving movements of the body.

Motivation. The actor's reason for doing or saying something.

Oral. Physical element involving the use of the voice.

Pitch. The highness or lowness of one's voice.

Properties (Props). Any object used by actors to enhance character portrayal.

Sensory recall. To remember a sensation and recreate the physical activity associated with that sensation in a dramatic activity.

Tempo. The speed at which someone talks or the pace of production.

Theater. The place that is the setting for dramatic performances.

Theatre. The imitation/representation of life, performed for other people; the performance of dramatic literature.

Three dimensional character. A character that has a variety of emotions, strengths, and weaknesses.

Tone. The quality or attitude portrayed using one's voice (gruffness, sweetness, etc.)

Underrepresented artist. Those who work in nontraditional art forms.

Visual. Physical element involving sight.

Introduction to Theatre Quality Core Curriculum

6-8

Students are encouraged toward self-actualization in the middle grades. They are given many content areas to explore. Theatre should attempt to build their self-confidence and connect many of the areas of exploration. The QCC specifically connects to the middle grades Social Studies QCC in content specifics and the Language Arts QCC in process emphasis. A major focus begins in sixth grade with presentational theatre; in eighth grade, the focus begins to change to representational theatre, preparing students for the representational focus in their high school classes. The overall focus is process work, which leads to presentational work when the teacher decides it is appropriate. The Theatre 6-8 QCC is designed as an exploratory curriculum. It allows teachers to select specific standards to teach in conjunction with Social Studies or English, or to teach standards in separate Theatre classes.

Introduction to Visual Arts Quality Core Curriculum K-12

Visual arts education is basic to developing fully literate citizens. Instruction in studio, art history, aesthetics, and art criticism enables students to attain higher levels of performance, critical thinking, and aesthetic judgment.

The strands reflected in the curriculum reveal content standards specified by theater, dance, music, and visual arts.

Critical Analysis and Aesthetic Understanding

Responding to the visual arts involves perception, which is a precursor to the creative process of thinking, imagining, and designing. Perception is the visual and sensory awareness of impressions, images, relationships, experiences, and feelings. The process of visually perceiving encompasses an awareness of the elements of art and the principles of design and how they function and interrelate.

Responding to the arts also involves developing the ability to analyze critically and judge aesthetically works created by artists. Describing and evaluating the media, processes, and meanings of works of visual art and making comparative judgments about them is an integral part of the learning process. Aesthetics is a philosophy concerned with determining the nature and value of art; it is a means of interpreting the deepest human expressions. Methods of inquiry that allow for the examination of complex ideas in structured, sequential ways provide the basis for aesthetic education.

Artistic Skills And Knowledge: Creating, Performing and Producing

Developing skills and organizing knowledge for creating and producing visual art involves continuous exposure to and experimentation with a wide range of artistic processes, tools, and materials. This framework promotes the acquisition of new ways of thinking, working, communicating, reasoning, and investigating.

Creating is at the heart of this instruction. Students learn to coordinate their hands and minds in explorations of the visual world. They learn to make choices that enhance communication of their ideas. Natural inquisitiveness is promoted, and students learn the value of perseverance. This is accomplished through a wide range of visual arts experiences including traditional media and processes and those created by new forms of technology.

Art History: Historical and Cultural Context

Examining the arts involves the study of works of art, style, and movements within their appropriate historical and cultural context. Understanding the connection between art styles and lifestyles in various cultures is important in the study of art. Students become aware that great works of art are a means of understanding human ideals and aspirations, and a means of appreciating the heroic, comic, and tragic aspects of human affairs. Experiences and achievements of individuals and societies are reflected through the history of visual art.

Interdisciplinary Connections

Identifying and expanding the connections within the arts and other disciplines balances the curriculum to help develop the whole intellect. Concepts common to other academic areas are integrated and promoted in the content standards. The goal of the art teacher should be to incorporate a holistic approach to education in the arts.

Visual Arts Glossary

Abstract. Generalized art which retains the essence or characteristics of a recognizable subject or object.

Additive sculpture. Modeling a sculpture by adding materials to it until the desired effect is maintained.

Aerial perspective. The illusion of space on the picture plane created by means other than linear perspective such as contrast, warm and cool colors, etc.

Aesthetics. A branch of philosophy that focuses on the nature of beauty, the nature and value of art, and the inquiry processes and human responses associated with those topics.

Airbrush. Atomizer operated by compressed air used for spraying paint.

Analogous. Three colors that are next to each other on a color wheel and which have a common hue.

Analysis. Identifying and examining separate parts as they function independently and together in creative works and studies of the visual arts.

Animation. The illusion of movement caused by successive presentations of inanimate objects in rapid order.

Architecture. The art of designing and planning the construction of buildings, cities, and/or bridges.

Art history. A record of the visual arts, incorporating information, interpretations, and judgments about art objects, artists, and conceptual influences on developments in the visual arts.

Arts disciplines. Studies which include dance, music, theatre, and visual arts.

Assess. To analyze and determine the nature and quality of achievement through means appropriate to the subject.

Asymmetrical balance. An equal distribution of weight (physically or visually) achieved without identical units on both sides. One large shape or form may be balanced by several smaller ones. Also known as informal balance.

Aural. Art that incorporates sound.

Background. The part of the picture plane that seems to be farthest from the viewer.

Balance. A principle of design referring to a feeling of equality in weight, attention, or attraction within a composition.

Batik. A system of dyeing fabric in which selected areas are protected from the dye with wax.

Biomorphic. See organic.

Calligraphy. The art of lettering.

Ceramics. Handbuilt or wheelthrown sculpture or vessels made of clay which can be fired, or fired and glazed.

Collage. A collection of materials arranged for a composition or design on a flat surface.

Color. A visually perceived hue.

Color scheme. Plan for organizing color.

Complementary. Colors opposite each other on a color wheel that contrast with each other.

Composition. The way in which the parts of an artwork are put together or organized.

Content. Message the artist is trying to communicate in a work of art.

Context. A set of interrelated conditions (such as social, economic, political) in the visual arts that influence and give meaning to the development and reception of thoughts, ideas, or concepts and that define specific cultures and eras.

Contour. Interior and exterior edges of objects.

Contour line. A line that follows the edges or edge of a shape or form.

Contrast. Refers to differences in values, colors, textures, and other elements in an artwork used to achieve emphasis and interest.

Cool colors. Colors that suggest a cool, soothing feeling or mood. Cool colors are blues, some greens, and some violets. Cool colors appear to recede spatially in artwork.

Create. To produce works of visual art using materials, techniques, processes, elements, and analysis; the flexible and fluent generation of unique, complex, or elaborate ideas.

Critical process. Description, analysis, interpretation, and evaluation used in discussing artworks.

Criticism. Describing and evaluating the media, processes, and meanings of works of visual art, and making comprehensive judgments.

Critique. To review, analyze, and discuss works of art.

Cross cultural. Art across cultures (intercultural).

Culture. Behaviors, customs, ideas, and skills of a distinct group of people.

Dominance. A principle of design where one element is emphasized.

Edition. A set number of productions of a work of art.

Elements of design. Line, shape, form, color, space, texture, and value.

Emphasis. A principle of design that refers to the use of areas that lead the eye from one part to another and then to the most important part of a composition.

Enameling. The process of firing special powder or enamel pigments on copper or silver in a kiln.

Ethnic art. Art inspired by a specific culture.

Exhibitions. An organized display of works of art.

Explore. A general concept used in this document that may include compare, contrast, identify, create, discuss, use, etc.

Expression. A process of conveying ideas, feelings, and meanings through selective use of the communicative possibilities of the visual arts.

Fiber arts. Arts which include techniques such as stitchery, weaving, tapestry, basketry, papermaking, softsculpture, batik, needle arts, etc.

Folk art. A style portraying the lives of the common people of a certain region. It generally covers decorative crafts and painting or sculpture produced for practical reasons.

Foreground. The space which appears to be closest to the viewer.

Form. 1. Any style or arrangement which may be repetitive; 2. An arrangement which is the accepted structure.

Free-flowing (Free-form). Any curvilinear, asymmetrical shape not bound by hard edges.

Functional art. Art designed for a certain purpose.

Functions (and purposes) of art. Describes the context and reasons, the desired results, for which the artwork was created. In art education, students examine and use subject matter, themes, and symbols, as well as formal characteristics of art works to give meaning to art content.

Geometric form. Mathematical three-dimensional shapes; cube, triangle, square, pyramid, etc.

Geometric shapes. Two-dimensional shapes created by exact mathematical laws; oval, circle, square, triangle, and rectangle.

Glazing. A technique used in painting in which pigment mixed with a transparent medium is layered, allowing underlying colors to show through. Glazing in ceramics is the process of applying glaze to clay work.

Gradation. A gradual smooth change from light to dark, rough to smooth, or one color to another.

Graphic design. A category of art that includes designing for commercial purposes, packages, signs, and advertisements.

Handbuilding. A process used in ceramics that incorporates slabwork, coils, and sculptural elements.

Harmony. The unity of all visual elements of a composition achieved by the repetition of the same characteristics or those which are similar in nature.

Horizon line. The line, either real or implied, in a work of art that marks where the sky and the ground appear to meet.

Hue. The name of a color.

Illustration. A work of art that usually seeks to join visual and discursive information for the purposes of communication.

Intensity. The brightness (purity) or dullness of a color, also known as chroma.

Intermediate colors (Tertiary). A color made by mixing a primary color with a secondary color.

Jewelry. A functional art form that involves assemblage and/or sculptural techniques to create ornamental objects, i.e., metalsmithing, lapidary, enameling, beading.

Kinetic. Art designed to move by natural or man-made forces.

Line. An uninterrupted actual mark or implied direction going from one point to another.

Linear perspective. Showing depth and distance in a picture with converging lines.

Maquettes. A small sculpture made as a preliminary model.

Materials. Resources used in the creation and study of visual art, such as paint, clay, cardboard, canvas, film, videotape, models, watercolors, wood, and plastic.

Media. Broad categories for grouping works of visual art according to the art materials used.

Media arts. Art forms that deal with electronic technologies.

Middle ground. A term used to define a level surface behind the foreground and in front of the background.

Mixed media. The use of different materials in the same work of art.

Model or modeling. To shape or build up with malleable media.

Monochromatic. Uses only one hue and variations obtained from its tints, shades, and tones.

Montage. A composite picture resulting from the placing of objects, materials, prints, or photographs in a preconceived design.

Mosaic. A method of decoration using small pieces of colored glass, stone, or ceramics which are inlaid on a background to form a design or picture.

Motif. A recurring element, subject, or theme in works of art.

Movement. A principle of design that refers to the arrangement of elements in an artwork organized in such a way as to create a sense of motion.

Movements (arts). Refers to an historical or cultural period when certain styles became prevalent.

Multi-cultural. Refers to more than one culture.

Negative space. The space around and through a shape or object.

Neutral colors. Colors formed by mixing complementary colors on the color wheel.

Non-objective. Shapes/forms created with no regard to an identifiable subject or object.

One-point perspective. A system of creating the illusion of space in the picture plane using one vanishing point.

Organic form. Three-dimensional free-flowing shapes found in nature.

Organic shape. Two-dimensional or flat free-flowing shapes found in nature.

Origami. The art of Oriental paper folding.

Papier Maché. A technique used to create three-dimensional forms with a mixture of shredded or torn paper and paste.

Pattern. Repetition of a motif involving line, shape, color, value, or space in a composition.

Perception. Visual and sensory awareness, discrimination, and integration of impressions, conditions, and relationships with regard to objects, images, and feelings.

Perspective. The representation of three-dimensional objects on a flat, two-dimensional surface; one-point, two-point, linear, aerial/atmospheric.

Photogram. A process in which light-sensitive paper is exposed with objects to create positive and negative space.

Photography. The technique of capturing optical images on light sensitive surfaces.

Pin hole camera. A hand made camera using a pin hole opening to expose the film to light.

Pointillism. A method of painting in which the dots of colors blend visually from a distance to create the illusion of forms, shapes, and outlines.

Portfolio. A comprehensive collection of student work.

Positive space. The space in a composition occupied by the subject or objects.

Primary colors. Red, yellow, blue.

Principles of design. Rhythm/movement, balance, unity/harmony, dominance/emphasis, repetition/pattern, proportion/scale, and contrast/variety.

Printmaking. The design and production of prints through a graphic art process. Processes may include intaglio, monoprint, silkscreen, stamp, engraving, lithograph, collograph, etc.

Process. A complex operation involving a number of methods or techniques, such as the addition and subtraction processes in sculpture, the etching and intaglio processes in printmaking, or the casting or construction processes in making jewelry.

Proportion. Scale or relationship of one part of a work of art to the other and to the whole.

- **Figure** (adult 7 1/2 heads high). Three and one-half heads from waist to top of head; four from waist to toes. Arms fall at mid thigh.
- **Portrait.** Eyes are one-half distance from top of head. Nose is one-half distance between eyes and chin. Mouth is one-half distance between nose and chin.

Radial balance. Type of balance in which forces or elements of a design come out from a central point.

Realism. A style of art that portrays people, objects, or places as we actually see them. Realistic art portrays lifelike colors, textures, shadows, proportions, and arrangements.

Repetition. A principle of design where a single element appears again and again. A technique for creating rhythm and unity.

Rhythm. Repetition of visual elements such as lines, shapes, or colors that may suggest movement.

Scale. Proportion.

Sculpture. Three-dimensional art forms created from processes of carving, modeling, and/or assemblage.

Secondary colors. Colors created by mixing two primary colors; orange, green, and violet.

Self-portrait. A rendering of the artist's own likeness.

Shade. A color with black added to it to change color value.

Shading. Gradation of tone or filling in areas through shadows.

Shape. Any two-dimensional area defined by line, color, tones, or edges.

Space. A perceived area or surface.

Spatial. Of, or existing, in space.

Split-complementary colors. A color and the two colors on either side of its complement on the color wheel.

Stained glass. Colored glass cut into pieces, arranged in a design, and joined with strips of lead.

Structures. Means of organizing the components of a work into a cohesive and meaningful whole, such as sensory qualities, organizational principles, expressive features, and functions of art.

Style. An artistic technique or way of expressing, using materials, constructing, or designing that is characteristic of an individual, group, period, or culture.

Subtractive sculpture. Process in which three-dimensional form is created by removing, cutting away, or carving out unwanted materials.

Symbol. Something that stands for, or represents, something else.

Synthesis. Combining of parts into a whole.

Tactile. Appealing to the sense of touch.

Techniques. Specific methods or procedures used in a larger process; for example, graduation of value or hue in painting, or conveying linear perspective through overlapping, shading, or varying size or color.

Technologies. Complex machines used in the study and creation of art, such as lathes, presses, computers, lasers, and video equipment.

Temporal. Worldly; or time; art enduring for a time.

Tertiary. The combination of a primary and a neighboring secondary color on the color wheel. Also known as intermediate colors.

Texture. The tactile quality of a surface. Actual - the physical roughness or smoothness of a surface. Simulated - the illusion of roughness or smoothness of a surface.

Theme. A subject or topic in artwork.

Three-dimensional form. Objects which have height, width, and depth.

Thumbnail sketches. Small drawings used to develop an idea or composition.

Timeline. Chart showing the chronological progression of art history.

Tint. A color with white added to raise or lighten its value.

Tone. Changes in intensity.

Triadic. The colors found on the color wheel which form an equilateral triangle.

Two-dimensional. Flat area having height and width but no actual depth.

Two-point perspective. Perspective viewed when an object is observed from an angle. There are two vanishing points.

Unity. A principle of design referring to the arrangement of a work in which all parts seem interrelated.

Value. The element of art that refers to the lightness or darkness of an object or color.

Value scale. Gradation of dark to light usually made on a scale of 1-10.

Variety. A principle of design concerned with difference or contrast.

Visual art. A broad category that includes the traditional fine arts such as drawing, painting, printmaking, sculpture; communication and design arts such as film, television, graphics, product design; architecture and environmental arts such as urban, interior, and landscape design; folk arts; and works of art such as ceramics, fibers, jewelry, works in wood, paper, and other materials.

Warm colors. Colors which appear to advance spatially in an art work and suggest a warm, hot, or active mood. Warm colors include reds, yellows, and oranges.

Introduction to Visual Arts Quality Core Curriculum Middle School Art

Content standards in the middle grades are designed to expand the students' knowledge of concepts and skills. Visual arts curriculum is designed to integrate with other disciplines at the middle school level and address the needs of learners with different social and cultural backgrounds. The curriculum reflects the adolescent's and preadolescent's need to develop collaborative and teamwork skills, technological competencies, flexible thinking, and appreciation for diversity.

Middle grades content standards are built upon the K-5 curriculum. Often, middle grades art programs are taught as six-, nine-, or 12-week rotations. Standards, therefore, are clustered to provide the middle grade teacher flexibility in presenting standards of different grade levels.

It is recommended that students who have not experienced formal visual arts education prior to the middle school experience use the K-5 content standards as a starting place, focusing on sequential order of content standards: criticism, art production, art history, and aesthetics.

Fine Arts: Visual Arts: Grade 8

Artistic Skills and Knowledge: Creating, Performing, Producing

FAVA.8.1	Selects subject matter, including symbols and ideas, to communicate a message in an original artwork.	Art Production	Symbols	
FAVA.8.2	Designs and produces artworks such as graphics, jewelry, pottery, weaving, and public art for a specific function.	Art Production	Creating Art with Specific Functions	
FAVA.8.3	Uses various art materials and techniques. (See Introduction: Matrix.)	Art Production	Art Materials and Techniques	
FAVA.8.4	Renders a subject in realistic detail using either linear or atmospheric perspective.	Art Production	Spatial Techniques	
FAVA.8.5	Creates a series of artworks that imitate nature (Realism).	Art Production	Artistic Theory	
FAVA.8.6	Plans and creates a series of different illustrations on a single theme using the elements of art and principles of design.	Art Production	Creating Multiple Solutions	
FAVA.8.7	Demonstrates proper care and safe use of art materials and tools.	Art Production	Maintenance and Safety	

Connections

FAVA.8.8	Applies concepts and ideas from another discipline and its topics as sources of ideas for own artworks. (See Introduction: Matrix.)	Interdisciplinary	Other Subject Relationships	
-----------------	---	-------------------	-----------------------------	--

Critical Analysis and Aesthetic Understanding

FAVA.8.9	Evaluates artists' use of color relationships (value, intensity, tints and shades, cool and warm colors) to create an intended descriptive and expressive effect in artworks.	Criticism	Color	
-----------------	---	-----------	-------	--

Strand	Content Standard	Topic	Concept	Notes
FAVA.8.10	Interprets how artists and architects have applied linear and atmospheric (aerial) perspective to communicate the illusion of space.	Criticism	Spatial Techniques	
FAVA.8.11	Analyzes the interrelationships between the elements of art and principles of design in artworks and in the environment.	Criticism	Elements of Art Principles of Design	
FAVA.8.12	Differentiates between various media and techniques used to produce two-and three-dimensional artworks.	Criticism	Art Media & Techniques	
FAVA.8.13	Reads an art review or critique to analyze and evaluate the viewpoint (main idea) of the art critic citing statements within the source.	Criticism	Art Reviews/Critiques	
FAVA.8.14	Expands and develops a personal position on aesthetics: What is aesthetics? Why do people create art? Why are certain objects considered art and others are not considered art? How do we justify judgments about what is art? Must art be beautiful? Does art have to be functional? If it is in an art museum, is it art?	Aesthetics	Aesthetic Perception	
FAVA.8.15	Judges a utilitarian object on the basis of how well it functions or fits a context.	Aesthetics	Functions of Utilitarian Objects	
FAVA.8.16	Evaluates, using appropriate criteria, two or more artworks that are different in appearance, but are often judged to be essentially of the same aesthetic worth.	Aesthetics	Aesthetic Perception	
Historical and Cultural Context				
FAVA.8.17	Examines how political, geographic, and social developments of colonial America are reflected in artworks created during this time period.	Art History	Art of Colonial America	
FAVA.8.18	Uses timelines, graphs, and visuals to trace important historical developments of colonial America using indigenous artworks (including those of Native American cultures and local and regional art and artists.	Art History	Art of Colonial America	
FAVA.8.19	Explains why artworks from technologically developed societies differ from those of primitive societies.	Art History	Art of Different Societies	
FAVA.8.20	Writes an historical account of an artist and/or artwork based on several sources (e.g., periodicals, books, Internet, and other telecommunication technology).	Art History	History Sources	

Georgia's Quality Core Curriculum

Technology/Career Education Grades 6-8

Introduction to Technology/Career Education Quality Core Curriculum

6-12

The primary purpose of the revised Technology/Career QCC is to equip students with the academic, technical, and leadership skills that they will need to succeed in life. Through a partnership between education and industry, the Technology/Career curriculum will provide students with a solid foundation for their future careers.

Technology/Career education provides students with knowledge that enables them to continue learning on the postsecondary level and throughout their careers. The revised Technology/Career QCC facilitates development of programs of study that reflect career goals of individual students and incorporate current industry standards, high-level academic knowledge, and postsecondary requirements. The revised QCC also addresses the need to reinforce classroom skill development through participation in co-curricular vocational student organizations and structured work-based learning programs such as youth apprenticeship, internship, and cooperative education.

Because technology is evolving rapidly, the Technology/Career QCC standards are broadly based and permit development of curriculum that can be updated to meet changing industry standards. Each Technology/Career area has a common set of standards that address higher thinking, leadership, team cooperation, and other workplace readiness skills, as well as content standards specific to various occupational programs.

Technology/Career Education: Grade 6-8**Exploratory Technology**

TECHED.6-8.1	Examines traits, skills training, education, and conditions needed to succeed in various technical and engineering occupations.		Career Exploration	
TECHED.6-8.2	Defines and uses skills to manage life transitions related to changes in career environment.		Career Exploration	
TECHED.6-8.3	Researches and uses information about specific occupations.		Career Exploration	
TECHED.6-8.4	Examines career opportunities in communication, production, energy, power and transportation, and bio-related areas.		Career Exploration	
TECHED.6-8.5	Examines career goals and career ladders.		Career Exploration	
TECHED.6-8.6	Utilizes tools, materials, and processes to solve technical problems involving the application of science, mathematics, and inventiveness.		Technical Information	
TECHED.6-8.7	Demonstrates a basic knowledge of the various aspects of the technologies of communication, manufacturing, construction, and/or energy and power control.		Technical Information	
TECHED.6-8.8	Demonstrates both personal and equipment safety.		Technical Information	
TECHED.6-8.9	Solves a given problem using the inductive and deductive processes of the scientific method.		Technical Information	
TECHED.6-8.10	Demonstrates employability skills such as dependability, good work habits, pride in work, cooperation with fellow students, respect for authority, and the ability to follow both verbal and written directions.		Technical Information	

Georgia's Quality Core Curriculum

Agriculture Education Grades 6-8

Introduction to Agriculture Education Quality Core Curriculum

6-12

The Quality Core Curriculum (QCC) standards in Agriculture Education were revised with an emphasis on student needs based on changes in industry, education, and community needs and expectations. The Quality Basic Education Act charges the State Board of Education with establishing competencies that each student is expected to master and ensuring that each student has the opportunity to master them. The QCC standards in Agriculture Education were revised to meet these needs.

Local school systems are responsible for implementing the QCC according to state standards. Expansion and enrichment of this curriculum are needed to improve delivery and service to the students and community. The revision committee highly recommends the use of state-approved curriculum guides and course outlines in Agriculture Education to facilitate curriculum delivery.

PROCESS

The QCC revision process was started by establishing a framework for evaluating the QCC standards established in 1984. The committee set six relevant criteria for measuring proposed changes. Revisions to the QCC should:

- Reflect technological and biological advances in agricultural science, business, and industry
- Promote high academic achievement through application of basic academic skills
- Emphasize workplace competencies
- Reflect changes in the Agriculture Education program included in recent industry- validated curriculum guides
- Reflect Agriculture Education program philosophy, purpose, and goals
- Promote leadership development

A program outline was created as a foundation for review of the QCC standards. Using the program outline and the revision criteria, the committee reviewed and revised specific QCC statements.

CHANGES

Most changes in the QCC statements are in terminology and sequence. Additions to the QCC consist mostly of expansion of statements which give more and clearer emphasis to that area of curriculum. The use of technology was emphasized. Statements were written to promote the continuous incorporation and updating of technology in the curriculum. Statements regarding leadership and personal development, basic skills, and employability were expanded and clarified to promote greater emphasis in these areas. In addition these statements were considered important enough that they have been included in each subject area.

USE OF THE QCC

The QCC in Agriculture Education is organized by school level (high school and middle school) and into six major instructional areas identified by the State Department of Education:

- Agricultural Business Management
- Agricultural Mechanization and Technology
- Agricultural Production and Management
- Agriscience and Biotechnology
- Environmental Horticulture
- Conservation and Renewable Natural Resources

The QCC standards are arranged into a logical teaching and development sequence within these parameters. Each local school system is encouraged to build its curriculum in Agriculture Education through selection of subject and subject areas of instruction based on local community and student needs. Courses may be developed through adoption of the suggested QCC sequence or by using the eclectic approach based on local needs. Once course content has been determined using the QCC standards, a number of resources may be used to facilitate course development. These include state curriculum guides, textbooks, and industry-developed materials.
